

FISCAL 2022 ANNUAL REPORT ON FORM 10-K

Dear Fellow Stockholders,

I am pleased to provide you with the Annual Report to Stockholders of *The Simply Good Foods Company* for fiscal year 2022.

Fiscal year 2022 was a successful year for our company, but like last year, there were many challenges to overcome, including higher costs, supply chain disruptions, slowing demand driven primarily by higher list prices, and pressures related to an evolving recessionary economy. Despite this, we completed another year of strong financial and marketplace performance:

- Net sales increased 16.2% to \$1.17 billion;
- Net income increased to \$108.6 million and Adjusted EBITDA[†] increased 12.9% to \$234.0 million resulting in Adjusted EBITDA margin of 20.0%;
- Cash and cash equivalents of \$67.5 million along with \$50 million of term loan debt repayments resulted in a trailing twelve-month Net Debt to Adjusted EBITDA[†] ratio of 1.4x at the end of the fiscal year; and
- Our market share increased within the nutritional snacking category and our brands outperformed in the relevant subsegments of the category — active nutrition and weight management.

This performance is a testament to the resilience of our business, the strength of our growth strategies as well as the capabilities of our organization to execute. This year is strong evidence of the long-term growth prospects of our business.

We continue to believe the advantages of our business are compelling.

We compete in the attractive nutritional snacking category, which is under-penetrated from a consumer household standpoint relative to other food and snacking categories. Further, the category has a long track record of consumption growth driven by increases in household penetration. At around 50% household penetration, we believe there is a long runway for future growth.

Our brands and our category benefit from long-term consumer trends towards health and wellness, convenience, portability, snacking, and meal replacement. While some of these consumer trends were disrupted during the pandemic, for the most part, they are returning to pre-pandemic behaviors.

In Quest and Atkins we possess two scale lifestyle consumer brands that generate over \$500 million each in net sales. These brands are uniquely positioned around protein-rich, low-sugar and low-carbohydrate macronutrient profiles, which are growingly sought by wellness-seeking consumers. In fact, low-carbohydrate, low-sugar, protein-rich nutrition has arguably become a mainstream approach today. That is a big change among both consumers and nutrition experts over the last five years or so.

Our well-diversified business is a strength. We have a broad offering of brands and products and are nicely developed across sales channels and customers, giving us multiple avenues for growth.

And lastly, our growth strategies have proven resilient and our organization capable of executing well despite the myriad external challenges we have faced and will face in the future.

As we emerge from the challenges of the pandemic and look to fiscal 2023, we are even more confident in our strategies, our people and the future growth prospects of our business.

Fiscal Year 2022 Overview

We began fiscal year 2022 with a price increase to offset high inflation within our supply chain. This was soon followed by a resurgent COVID-19 Omicron virus that affected consumer shopping behavior and mobility. However, the investments we made in innovation, marketing and growing retail channels were major contributors to our performance and our ability to continue to attract new consumers to our brands.

[†] Adjusted EBITDA and Net Debt to Adjusted EBITDA are non-GAAP financial measures. Please refer to Annex II of our proxy statement for the 2023 Annual Meeting of Stockholders for a reconciliation of these non-GAAP financial measures.

During the year, we continued to invest in advertising and marketing to drive new buyers to both of our brands. Marketing expense increased about 9% in the year. The Atkins advertising campaign featuring Rob Lowe continues to resonate with consumers. Atkins brand relevance remains strong, supported by a growing base of buyers, up 11% year-over-year. Quest launched on-air television advertising for the first time in the brand's history. It is a fun campaign focused on four individuals; unheralded NFL and WNBA rookies and two working professionals who changed careers to follow their respective passions. The common theme is they are all fueled by "Athlete worthy nutrition in pursuit of their Quest." Our strong gross margins, despite an inflationary cost environment, give us the financial flexibility to make these investments.

Recent product launches outside our core protein bar and ready-to-drink shake forms have resonated with consumers, driving growth in new snacking occasions. In fiscal year 2022, we launched products such as the Quest frosted cookie and Atkins protein chips and cookies. These products are off to a good start and we are continuing to drive awareness, trial and repeat. Additionally, Quest launched mini versions of its flagship protein bars in Chocolate Chip Cookie Dough and Cookies & Cream flavors. While early, the new minis are off to a great start and driving incremental users to the brand.

We continue to invest with brick-and-mortar grocery and mass channel retailers who are focused on driving foot traffic to their stores. During the year, we also made investments in the Atkins e-commerce business, leveraging the capabilities acquired during the Quest acquisition, concentrating on digital marketing and portfolio alignment. Our focus on fewer SKUs with larger pack sizes resulted in greater levels of consumption, sales growth, and profitability. We also invested in outsourced cold ship capabilities so we could sell and ship meltable products more broadly and efficiently during the warmer May to September months.

Our supply chain team continued to perform well in a challenging environment and customer service performance approached pre-pandemic target levels. Their efforts, combined with sales and marketing plans, enabled us to gain market share within the nutritional snacking category. For the full fiscal year 2022, Simply Good Foods retail takeaway in measured channels increased 15.0% versus nutritional snacking category growth of 14.7%. Furthermore, as noted above, both of our brands meaningfully outperformed their respective subsegments of weight management and active nutrition.

Mission, Vision and Values

Our mission, vision and values continue to be very important to us and underpin how we act as individuals and an organization.

Our mission is to empower healthy lives through smart and satisfying nutrition. Our vision is to lead the nutritious snacking movement with trusted brands that offer a variety of convenient, innovative, great-tasting, better-for-you snacks, meal replacements, and other product offerings. Our values are critical to our success in fulfilling our mission. They are:

- Act with Integrity;
- Lead with Innovation;
- Succeed through Interdependence;
- Be Empowered; and
- Bring Passion Every Day.

Commitment to Our Communities

We believe we play an important role in helping to improve nutrition and overall wellness in the United States through scientific research, education, advocacy, and community engagement.

Since 2016, we have advocated for more inclusive guidance in the U.S. Department of Agriculture's and U.S. Department of Health and Human Services' Dietary Guidelines for Americans (the "Dietary Guidelines"), which is released every five years. Our goal is to expand the Dietary Guidelines to offer solutions for more Americans, including the more than half of the U.S. population suffering from negative metabolic-related conditions such as cardiovascular disease, prediabetes, diabetes and obesity. We also believe expanding the Dietary Guidelines would help to address health equity in many underserved populations in the United States who have higher rates of metabolic-related diseases. The advocacy work we have done is aligned with recent guidance issued by major health organizations such as the American Diabetes Association and the American Heart Association, both of which recommend a lower carbohydrate dietary approach as an option for those with diabetes.

We also strive to make a difference in our communities. During fiscal 2022, we launched The Quest Challenge, a grant program for individuals making a difference in their respective communities supporting health and wellness. In our inaugural year, we provided four separate \$20,000 grants. The Quest Challenge grants were awarded following a competitive process in which applicants expressed their current philanthropic work and what they aim to achieve if they received a

grant. Recipients of this year's grants have used this money to improve the health and wellbeing of underserved and at-risk children, create safe spaces for children to play or learn a new skill, and encourage physical and artistic activities to build confidence and self-esteem. We will continue to follow the progress of our recipients and their effect on their communities. Additionally, for the second year, we participated in Walmart's "Fight Hunger. Spark Change." campaign. Through this program, Simply Good Foods secured at least 500,000 meals for Feeding America.

We are proud of our commitment to advancing health, nutrition, and wellbeing education and products as a way for consumers to achieve their wellness goals.

Commitment to Diversity, Equity & Inclusion ("DE&I")

Our Board of Directors and senior leadership team remain committed to fostering a diverse, equitable and inclusive culture for our employees as we believe it has a positive effect on our ability to achieve our mission. Our Board of Directors created its Corporate Responsibility and Sustainability Committee to oversee both our environmental, social and governance ("ESG") initiatives and our DE&I strategies and related matters. During fiscal year 2022, we established a Diversity, Equity, Inclusion and Belonging Council consisting of mid-level and senior leaders, so our DE&I efforts are informed and led by a cross section of our leaders. The Council's mission is to foster a positive, open, and trusted culture of belonging where every person feels empowered to bring their unique selves to the workplace resulting in a competitive advantage through thought-leadership and talent growth that halos beyond our workforce to our partners and community, creating an inclusive ecosystem.

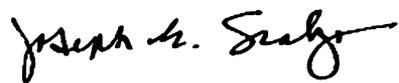

Focused on Success in Fiscal 2023

We executed well against our priorities in fiscal year 2022, and we believe we are well-positioned to succeed in fiscal year 2023. We are confident in the strength of our business and the diversification of our portfolio across brands, products, and channels. The current recessionary conditions and their potential effect on shopping behavior and consumer demand provide a challenging environment for our business, especially given historically high retail prices. However, we are cautiously optimistic about our growth prospects.

I am fortunate to work with a best-in-class leadership team and Board of Directors. Our ability to effectively communicate and collaborate with each other is a big part of our success. I would like to personally thank all our Directors and in particular those in key leadership positions: James M. Kilts, our Chairman, David J. West our Vice Chairman, Nomi P. Ghez, our Nominating and Corporate Governance Committee Chair, Michelle P. Goolsby, our Corporate Responsibility and Sustainability Committee Chair, Clayton C. Daily, Jr., our Compensation Committee Chair, and Joseph J. Schena, our Audit Committee Chair.

Lastly, on behalf of our Board of Directors, employees and myself, I want to thank you, our stockholders, for your investment in The Simply Good Foods Company and your confidence in us to continue to build stockholder value. We hope you and your families remain healthy and safe.

Sincerely,

Joseph E. Scalzo
President & Chief Executive Officer

Cautionary Note Regarding Forward Looking Statements

This Form 10-K (this “Report”) contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). When used anywhere in this Report, the words “expect,” “believe,” “anticipate,” “estimate,” “intend,” “plan” and similar expressions are intended to identify forward-looking statements. These statements relate to future events or our future financial or operational performance and involve known and unknown risks, uncertainties and other factors that could cause our actual results, levels of activity, performance or achievement to differ materially from those expressed or implied by these forward-looking statements. We caution you that these forward-looking statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. You should not place undue reliance on forward-looking statements. These statements reflect our current views with respect to future events, are based on assumptions and are subject to risks and uncertainties. These forward-looking statements include, among other things, statements regarding our operations being dependent on a global supply chain and effects of supply chain constraints and inflationary pressure on us and our contract manufacturers, our ability to continue to operate at a profit or to maintain our margins, the effect of the novel coronavirus (“COVID-19”) on our business, financial condition and results of operations, the sufficiency of our sources of liquidity and capital, our ability to maintain current operation levels and implement our growth strategies, our ability to maintain and gain market acceptance for our products or new products, our ability to capitalize on attractive opportunities, our ability to respond to competition and changes in the economy including changes regarding increasing ingredient and packaging costs and labor challenges at our contract manufacturers and third party logistics providers, the amounts of or changes with respect to certain anticipated raw materials and other costs, difficulties and delays in achieving the synergies and cost savings in connection with acquisitions, changes in the business environment in which we operate including general financial, economic, capital market, regulatory and geopolitical conditions affecting us and the industry in which we operate, changes in consumer preferences and purchasing habits, our ability to maintain adequate product inventory levels to timely supply customer orders, changes in taxes, tariffs, duties, governmental laws and regulations, the availability of or competition for other brands, assets or other opportunities for investment by us or to expand our business, competitive product and pricing activity, difficulties of managing growth profitably, the loss of one or more members of our management team, potential for increased costs and harm to our business resulting from unauthorized access of the information technology systems we use in our business, expansion of our wellness platform and other risks and uncertainties indicated in this Report, including those set forth under “Risk Factors” in this Report. Important factors could cause actual results to differ materially from those indicated or implied by forward-looking statements such as those contained in documents we have filed with the U.S. Securities and Exchange Commission (the “SEC”), including in this Report in “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” “Risk Factors” and those contained in subsequent reports we will file with the SEC. All forward-looking statements in this Report are qualified entirely by the cautionary statements included in this Report and such other filings. These risks and uncertainties or other important factors could cause actual results to differ materially from results expressed or implied by forward-looking statements contained in this Report. These forward-looking statements speak only as of the date of this Report. We undertake no intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable law, and readers should not rely on the forward-looking statements as representing the Company’s views as of any date subsequent to the date of the filing of this Report.

Explanatory Note

The Simply Good Foods Company (“Simply Good Foods”) was formed on March 30, 2017, to consummate a business combination (the “Business Combination”) between Conyers Park Acquisition Corp. (“Conyers Park”) and NCP-ATK Holdings, Inc. (“Atkins”), which occurred on July 7, 2017. As a result, Simply Good Foods owns all of the equity in Atkins.

Conyers Park, a special purpose acquisition company, was formed in 2016 for the purpose of effecting a merger, capital stock exchange, asset acquisition, stock purchase, reorganization or similar business combination with one or more businesses. Simply Good Foods is listed on the Nasdaq Capital Market under the symbol “SMPL.”

As part of Simply Good Foods’ strategy to become an industry leading snacking platform, in November 2019, it acquired Quest Nutrition, LLC (“Quest”). This transaction is referred to as the “Quest Acquisition.”

Effective September 24, 2020, Simply Good Foods sold the assets exclusively related to its SimplyProtein® brand of products to a newly formed entity led by the former Canadian-based management team who had been responsible for this brand prior to the sale transaction (the “SimplyProtein Sale”). In addition to purchasing these assets, the buyer assumed certain liabilities related to the SimplyProtein® brand’s business. The transaction enables our management to focus its full time and our resources on our core Atkins® and Quest® branded businesses and other strategic initiatives.

Unless the context otherwise requires, “we,” “us,” “our” and the “Company” refer to the following: (i) for periods prior to the completion of the Business Combination, to Atkins and its subsidiaries, (ii) for periods upon or after the completion of the Business Combination, to The Simply Good Foods Company and its subsidiaries, excluding Quest, and (iii) for periods after completion of the Quest Acquisition, The Simply Good Foods Company and its subsidiaries, including Quest. In context, “Atkins” may also refer to the Atkins® brand and “Quest” may also refer to the Quest® brand.

Summary of Risk Factors

An investment in our securities involves a high degree of risk. You should carefully consider the risks described in Item 1A “Risk Factors” of this Report, which are summarized below, before making an investment decision. Our business, prospects, financial condition or operating results could be harmed by any of these risks, and other risks not currently known to us or that we currently consider immaterial. The trading price of our securities could decline due to any of these risks, and, as a result, you may lose all or part of your investment.

Risks Related to our Business

- Our dependence on a global supply chain and effects of supply chain constraints and inflationary pressure on us or our suppliers.
- Our ability to maintain or increase prices or fail to implement our growth strategies successfully.
- Pandemics, epidemics or disease outbreaks, such as the novel coronavirus (“COVID-19”), which may disrupt our business, including, among other things, consumption and trade patterns, our supply chain and production processes.
- Our inability to compete successfully in the highly competitive nutritional snacking industry.
- Changes in consumer preferences, habits, perceptions and discretionary spending, which may negatively affect our brand loyalty and net sales.
- Our inability to continually enhance our brand recognition, increase distribution of our products, grow and maintain shelf space, attract new consumers to our brands and introduce new and innovative products, either on a timely basis or at all.
- The perception of our brands or organizational reputation are damaged, including as a result of negative information on social media.
- The fact that we must expend resources to maintain consumer awareness of our brands, build brand loyalty and generate interest in our products and the evolution of our marketing strategies and channels, and our programs may not be successful.
- Our geographic focus, which makes us particularly vulnerable to economic and other events and trends in North America.

Risks Related to our Operating Model

- Ingredient and packaging costs are volatile and may rise significantly.
- Our reliance on sales to a limited number of retailers for a substantial portion of our net sales and we maintain “at will” contracts with these retailers, which do not require recurring or minimum purchase amounts of our products.
- Losses in, disruption of and lack of efficiency in our fulfillment network.
- Shortages or interruptions in the supply or delivery of our core ingredients, equipment, packaging and products as we rely on a limited number of third-party suppliers to supply our core ingredients and a limited number of contract manufacturers to manufacture our products.
- Severe weather conditions, natural disasters, government regulations related to climate change, the effects of climate change and geopolitical events, which can all affect crop supplies and supply chain infrastructure.
- We intend to grow through mergers, acquisitions or joint ventures, and we may not successfully integrate, operate or realize the anticipated benefits of such business combinations.
- Our insurance policies may not provide adequate levels of coverage against claims.
- Loss of our key executive officers or other personnel, or an inability to attract and retain such management and other personnel.
- We may not be able to adequately protect our material intellectual property and other proprietary rights.
- Any inadequacy, failure or interruption of our information technology systems may harm our ability to effectively operate our business, and our business is subject to online security risks, including security breaches and identity theft.

Regulatory Risks and Litigation Risks

- All of our products must comply with regulations of the U.S. Food and Drug Administration and state and local regulations.
- Our advertising is regulated for accuracy, and if our advertising is determined to be false or misleading, we may face fines or sanctions.
- Changes in the legal and regulatory environment could limit our business activities, increase our operating costs, reduce demand for our products or result in litigation.
- Litigation or legal proceedings could expose us to significant liabilities and have a negative effect on our reputation.

Risks Related to our Capital Structure

- Our indebtedness could materially and adversely affect our financial condition and ability to operate our company, and we may incur additional debt.
- Changes in interest rates may adversely affect our earnings and cash flows.
- We may need additional capital in the future, and it may not be available on acceptable terms or at all.
- We have incurred and will continue to incur significant costs because of operating as a public company.
- If we cannot maintain appropriate systems, procedures and controls, we may not be able to successfully procure, offer or ship our products, grow our business, account for transactions, accurately report our financial results in an appropriate and timely manner or prevent fraud.
- The past restatement of certain of our financial statements subjected us to additional risks.
- Our only significant asset is ownership of 100% of Atkins Intermediate Holdings, LLC which could limit our ability to pay any dividends on our common stock or satisfy our other financial obligations.

Risks Related to our Common Stock

- We do not expect to declare any dividends in the foreseeable future.
- Our amended and restated certificate of incorporation contains anti-takeover provisions which could impair a takeover attempt.
- Our common stock price may be affected by future sales of common stock or other dilution.

Other Risks

- We experience risks associated with our international operations and exposure to the worldwide economy.
- Our amended and restated certificate of incorporation excludes certain of our Board members from the doctrine of “corporate opportunity.”

PART I

Item 1. Business.

Overview

The Simply Good Foods Company is a consumer packaged food and beverage company that aims to lead the nutritious snacking movement with trusted brands that offer a variety of convenient, innovative, great-tasting, better-for-you snacks and meal replacements, and other product offerings. The product portfolio we develop, market and sell consists primarily of protein bars, ready-to-drink (“RTD”) shakes, sweet and salty snacks and confectionery products marketed under the Atkins®, Atkins Endulge®, Quest® and Quest Hero™ brand names. Simply Good Foods is poised to expand its wellness platform through innovation and organic growth along with acquisition opportunities in the nutritional snacking space.

The Company’s nutritious snacking platform consists of brands that specialize in providing products for consumers that follow certain nutritional philosophies and health-and-wellness trends: Atkins for those following a low-carb lifestyle or seeking to lose weight and Quest for consumers seeking a variety of protein-rich foods and beverages that also limit sugars and simple carbs. We distribute our products in major retail channels, primarily in North America, including grocery, club, and mass merchandise, as well as through e-commerce, convenience, specialty, and other channels. Our portfolio of nutritious snacking brands gives us a strong platform with which to introduce new products, expand distribution, and attract new consumers to our products.

We believe snacking occasions have been on the rise in recent years as consumers continue to desire more convenient, healthy and delicious foods, snacks, and meal replacements. We believe our emphasis on product formats such as our protein bars, cookies, chips and salty snacks, and RTD shakes positions us to fill important needs for consumers. We believe a number of existing and emerging consumer trends within the U.S. food and beverage industry will continue to both drive the growth of the nutritional snacking category and increase the demand for our product offerings. Some of these trends include increased consumption of smaller, more frequent meals throughout the day, consumers’ strong preference for convenient, “better-for-you” snacks, consumers’ greater focus on health and wellness, consumers’ movement toward limiting carbohydrate and sugar consumption, and the trend of consumers seeking to add convenient sources of protein and fiber to their diets.

With our Atkins brand, we strive to offer a compelling line of protein bars, RTD shakes, cookies, protein chips and salty snacks, and confections, and with our Quest brand, we strive to offer an attractive line up of protein bars, cookies, protein chips and salty snacks, RTD shakes, and confections, which target these existing and emerging consumer trends. Our sales, marketing, and research and development capabilities enable us to distribute products to a national customer base across a spectrum of retail channels, including the mass merchandise, grocery, drug, club stores, e-commerce, and small format retail such as convenience stores and gas stations.

Simply Good Foods was formed in Delaware on March 30, 2017, to consummate the Business Combination, which occurred on July 7, 2017. As part of our strategy to become an industry leading snacking platform, in November 2019, we acquired Quest Nutrition, LLC.

In addition to pursuing attractive run-rate cost synergies over time by leveraging efficiencies of scale with our legacy Atkins business, we completed the Quest Acquisition with the goal of realizing several other potential benefits. Quest’s products compete in many attractive, fast growing sub-segments within the nutritional snacking category. In addition, Quest’s research and development insights and capabilities have benefited our broader business. Quest has an extremely loyal following and strong appeal among consumers ages 18-35, which complements Atkins’ strength among consumers ages 35+. The Quest Acquisition also allowed us to benefit from Quest’s existing relationships and effectiveness within certain channels of trade, such as e-commerce and the small format channel, and leverage Quest’s social media-based marketing capabilities. Since completion of the Quest Acquisition, we have benefited from utilizing certain of Quest’s systems, such as its enterprise resource planning platform, and associated reporting tools.

Our principal executive offices are located at 1225 17th Street, Suite 1000, Denver, Colorado, 80202. Our telephone number is (303) 633-2840. We maintain a web site at www.thesimplygoodfoodscompany.com.

Business Trends in Fiscal Year 2022

Throughout fiscal year 2022, our business continued to improve from the end of fiscal year 2021, driven in part by the increasing normalization of consumer mobility and shopper traffic patterns in brick-and-mortar retailers versus prior periods that were more severely pressured by COVID-19 mitigation strategies, including movement restrictions and closures of or reduced access to customer establishments. We expect our business performance during fiscal year 2023 will continue to be affected by the dynamic macroeconomic inflationary environment in the United States and elsewhere, elevated levels of supply chain cost inflation, and the level of consumer mobility, which includes the rate at which consumers return to working outside the home.

Overall consumer spending, particularly in the United States, continued to recover from the effects of the COVID-19 pandemic, which resulted in well documented industry-wide supply chain disruptions across the United States and globally during fiscal year 2022. As a result, we experienced corresponding unfavorable effects of higher raw material costs, higher freight and logistics costs, and supply chain challenges, including supply chain disruptions resulting from labor shortages and disruptions in ingredients. We expect to continue to see these cost pressures and supply chain challenges persist into fiscal year 2023. We have also continued to see contract manufacturer and logistics challenges, largely related to availability of labor, which we believe along with the ingredient shortages discussed above have contributed to lower retail and e-commerce sales of our products due to periodic out-of-stock situations, delayed recognition of sales and higher than historical inventory levels at times.

The improvement in consumer mobility and shopper traffic patterns experienced during fiscal year 2022 has been variable, and there continues to be uncertainty related to the sustainability and longevity of these trends. The ultimate effect COVID-19, supply chain challenges, cost pressures discussed above, and the overall effects of the current high inflation environment on consumer purchasing patterns could have on our business continues to be not fully known. Additionally, management is continuing to monitor the conflict in Ukraine, especially regarding the availability and cost of raw materials that are produced in this region and Europe in general. Management is also monitoring for signs of any expansion of economic or supply chain disruptions or broader supply chain inflationary costs resulting either directly or indirectly from the crisis in Eastern Europe.

Our Strengths

Powerful brands with strong consumer awareness and loyalty. We are a leader in the fast growing nutritional snacking category, and both the Atkins and Quest brands are leading brands with combined scale in protein bars, protein chips, confections, cookies, and RTD shakes. Our highly focused snacking portfolio provides us with a leading position within retailers' nutrition and wellness aisles, resulting in meaningful shelf space. Our brands are able to appeal to both consumers interested in an active lifestyle who are seeking protein-rich, low-carb snacking options as well as weight management program consumers, which makes our brands highly attractive and strategic for a diverse set of retailers across various distribution channels.

Aligned with consumer mega trends. Increasing global concern about growing rates of obesity and weight-related diseases and other health issues has resulted in increased scientific, media and consumer focus on nutrition. Over 100 independent, peer reviewed, clinical studies show the benefits of controlling carbohydrates. Management believes this focus is prompting consumers to rebalance their nutritional breakdown away from carbohydrates. Our brand attributes, "low-carb," "low-sugar" and "protein-rich" nutrition, are well aligned with consumer mega trends. In addition, we believe consumers' eating habits are gradually shifting towards increased convenience, snacking and meal replacement. We also believe our portfolio of convenient and nutritious products and our ongoing effort to meet consumer demands for convenient options to support their individual health, nutrition and lifestyle goals.

Scalable snacking and food platform. We have been able to grow our product offerings for both of our nutritious snacking brands through our line extensions and through acquisitions. Our in-house product development experience, combined with our outsourced manufacturing model, allow us to bring new products to market quickly. We pride ourselves on knowing our consumers and glean insights that lead to new products and ideas. We believe we can leverage our strong relationships with our retail customers and distributors, a strong brand building track record, and category management expertise to help new products, brands and brand extensions gain distribution and consumer recognition, allowing us to continue to successfully expand our snacking platform.

Asset-light business with strong cash generation. We retain core in-house capabilities including sales, marketing, brand management, customer relationships, product development, and supply-chain expertise, while collaborating with a diversified pool of contract manufacturers and distributors to execute manufacturing and distribution. Outsourcing these competencies allows us to focus our efforts on innovation, marketing, and sales to meet consumer demands. Our lean infrastructure allows for significant flexibility, speed-to-market, and minimal capital investment, which translates into relatively consistent and robust free cash flow generation over time, driven by strong gross margins.

Experienced leadership team. Simply Good Foods has an experienced team of industry veterans with extensive experience across multiple branded consumer products, food and nutrition categories. Our management team's extensive experience is complemented by the significant industry expertise of our directors, including James Kilts, the former Chief Executive Officer of The Gillette Company and Nabisco, and former President of Kraft USA and Oscar Mayer, and David West, the former Chief Executive Officer of Big Heart Pet Brands and The Hershey Company. Our management team's deep expertise and proven record of accomplishment in managing brands and operating packaged food businesses is a key driver of our success and positions Simply Good Foods as an attractive vehicle for future long-term growth within the nutritional snacking space.

Our Strategies

Leverage platform to expand in attractive food and snacking categories. Management believes the fragmented snacking category presents an opportunity for consolidation and the opportunity to build, through disciplined acquisitions, a leading platform in the nutritional snacking space. As a leader in nutritious snacking, we believe we have the unique capability to leverage our operating platform, product innovation expertise and customer relationships to expand beyond the Atkins and Quest brands. In addition, we believe the nutritious snacking category will continue to grow given its relatively low household penetration and favorable consumer trends of snacking, health and wellness, convenience, and on-the-go consumption. Our experienced management team has deep expertise in brand building that we believe will help us to expand the business into additional brands and products in the snacking segment. Over time, we expect to continue seeking to identify and evaluate acquisition opportunities to complement our platform, and we see significant opportunity for growth and synergies in complementary adjacent snacking categories such as the “better-for-you” eating space.

Innovate and expand the portfolio of product offerings to meet consumer demand for higher protein products and new product forms. We intend to continue to enhance, strengthen and expand our product offerings with new and innovative flavors and forms and packaging alternatives, all while maintaining a commitment to delivering products that meet our nutritional profile and provide the convenience that consumers crave. Our in-house research and development laboratories allow us to develop new products internally and bring them to market quickly through our contract manufacturing network without diverging from high standards of taste, nutritional content, quality, and safety. Additionally, we intend to satisfy developing and changing consumer preferences through the pursuit of merger and acquisition transactions.

Expand distribution in white space opportunities. In the fifty-two weeks ended August 27, 2022, approximately 88% of Atkins’ gross sales in the U.S. and approximately 75% of Quest’s gross sales in the U.S. were through the mass retailer, grocery and convenience store distribution channels. Our management believes there is opportunity for the brands to further penetrate those channels as well as other distribution channels such as convenience and club stores. In addition, while shoppers have increased e-commerce purchases generally, approximately 12% of Atkins’ gross sales for the fifty-two weeks ended August 27, 2022, were through its e-commerce channel and approximately 21% of Quest’s gross sales for the same period were through its e-commerce channel. We intend to leverage our brand recognition to develop further the distribution channels through which we reach consumers, including through the continued expansion of the e-commerce channel.

Continue our marketing efforts to increase household penetration. We intend to expand our marketing efforts to bring first-time buyers into the Atkins and Quest brand franchises. Consumers who have tried our Atkins and Quest products have a relatively high repeat buying rate and long-term buying behavior, as evidenced by servings per buyer, per year. For our Atkins brand, our historic consumer base has been people interested in weight loss, and for the Quest brand it has been individuals pursuing a performance-based active and athletic lifestyle.

For both the Atkins and the Quest brands, we have an active and growing digital and social presence, using a comprehensive approach of search, banner, and search engine optimization efforts. We are a leader in social media, with a top-tier presence on Facebook, Instagram, Pinterest, Twitter and YouTube. We also have a growing network of social influencers and content creators, who promote our products in their targeted social media posts. We believe that social media is a cost-effective way of continuing to attract and retain our consumers. We believe that our ongoing efforts to educate consumers about the benefits of a lower carbohydrate lifestyle will further reinforce our brands. For our Atkins brand, we use targeted broadcast and streaming television and print ads with a celebrity-based campaign that attempts to motivate potential programmatic weight loss consumers to try the Atkins approach to healthier eating and weight loss as these Atkins consumers are our most loyal, profitable and frequent purchasers. For our Quest brand, we launched a national, targeted broadcast ad campaign, and continue to leverage targeted streaming television ads and an extensive network of social media influencers and content creators who prompt our Quest brand products through their online posts to motivate new buyers and new product introductions.

Further develop our brand marketing strategies to reach consumers beyond our core historic buyers. We intend to continue to make focused changes to our approach to consumer outreach to attract consumers beyond our historic core buyers. For the Atkins brand, we intend to continue our marketing efforts to attract self-directed low-carbohydrate and health motivated eaters (those individuals not on a program diet) who buy and consume our Atkins products. For our Quest brand, we intend to continue our marketing efforts to reach consumers who are seeking products that are aligned with their choice to pursue a healthy and active lifestyle. We also note the Atkins brand has approximately 91% aided brand awareness with U.S. consumers and the Quest brand has approximately 68% aided brand awareness with U.S. consumers.

Our Vision and Mission

Our vision is to lead the nutritional snacking movement with trusted brands that offer a variety of convenient, innovative, great-tasting, better-for-you snacks and meal replacements and other product offerings. Our mission is to empower healthy lives through smart and satisfying nutrition.

Our Products

Core Atkins Products

Our core Atkins brand products consist of protein bars, RTD shakes, confections, cookies, and chips.

Protein Bars. To keep on-the-go consumers energized and fueled, our Atkins bars offer a convenient and effective solution, providing consumers with protein, fiber and a delicious taste. Atkins offers two main types of bars: Atkins Meal Bars and Atkins Snack Bars. Atkins Meal Bars contain 13 to 17 grams of protein and are available in more than 10 different flavors. Atkins Snack Bars contain 7 to 13 grams of protein, with 2 to 4 grams of net carbs, and are available in 15 different varieties.

RTD Shakes. Our rich and creamy Atkins RTD shakes contain 10 to 15 grams of protein, as well as other important vitamins and minerals. Available in a variety of flavors, including cookies and crème, café caramel and creamy chocolate, Atkins' RTD shakes are made with high quality ingredients and are designed to provide energy balance through the day. Our Atkins' Plus RTD shakes contain 30 grams of protein, for our consumers seeking higher protein content.

Confections. Our Atkins Endulge® line, which is designed to satisfy consumers' sweet cravings, and which we call Treats, consists of delicious desserts without all of the added sugar. Atkins offers a variety of different Treats, such as peanut butter cups and pecan caramel clusters, each with only 1 gram of sugar or less and low net carbs, providing consumers with the option to indulge.

Cookies. First launched in fiscal year 2021, Atkins' soft and chewy cookie products are a convenient source of high-protein combined with low net carbs and low-sugar. These sweet tasting cookies are available in double chocolate chip, peanut butter and chocolate chip. Atkins' cookies contain approximately 10 grams of protein, 3 grams of net carbs and approximately 1 gram of sugar or less depending on the flavor.

Chips. First launched during fiscal year 2022, Atkins's protein chips offer an attractive nutrition profile when compared to conventional chip products. Offered in nacho cheese, ranch, and chipotle BBQ flavors, Atkins's chips typically contain about 13 grams of protein, about 4 grams of net carbs, and around 7 grams of fat compared to 2 grams of protein, 15 grams of net carbs and 8 grams of fat for a well-known leading conventional brand.

Recipes. While provided free of charge, we also offer over 1,600 protein-rich, low-carbohydrate and low-sugar recipes designed to help consumers achieve and maintain a healthy lifestyle, while still enjoying delicious food.

Core Quest Products

Our core Quest brand products consist of protein bars, cookies, chips and confections.

Protein Bars. To keep on-the-go consumers energized and fueled, our Quest bars offer a convenient and effective solution, providing consumers with protein, fiber and a delicious taste. The typical Quest bar profile contains about 20 grams of protein, 5 grams or less of net carbs and about 1 gram of sugar. Quest offers more than 25 different flavors of protein bars.

Cookies. First launched in 2018, Quest's cookie products are a convenient source of high-protein combined with low net carbs and low-sugar. Available in a variety of flavors including Chocolate Chip, Peanut Butter, Oatmeal Raisin and Snickerdoodle, Quest's cookies typically contain about 15 grams of protein, 4 grams or less of net carbs and less than 1 gram of sugar.

Chips. Quest's protein chips, including the tortilla-style chips launched in spring 2018, quickly became a high-selling product offering an attractive nutrition profile when compared to conventional chip products. Offered in flavors including nacho cheese, ranch, chili lime, BBQ, loaded taco and spicy sweet chili, Quest's chips typically contain about 18 grams of protein, about 4 grams of net carbs, and around 6 grams of fat compared to 2 grams of protein, 15 grams of net carbs and 8 grams of fat for a well-known leading conventional brand.

Confections. Recently launched confections include full-size and mini peanut butter cups and "fudgy" brownie and "gooey" caramel candy bites sold in a variety of packaging. The full-size peanut butter cups feature a nutrition profile for two cups of 11 grams of protein, 1 gram of net carbs, less than 1 gram of sugar and 4 grams of fiber. The mini peanut butter cups feature a nutrition profile per serving of 8 grams of protein, 1 gram of net carbs, less than 1 gram of sugar and 3 grams of fiber. The candy bites feature a nutrition profile of 5 grams of protein, 1 gram of net carbs, less than 1 gram of sugar, and candy bars feature 4 grams of fiber to 12 grams of protein, 3 grams of net carbs, 1 gram of sugar and 9 grams of fiber.

Marketing, Advertising and Consumer Outreach

Our marketing efforts are designed to increase consumer awareness of and demand for our products. We employ a broad mix of marketing, including coupons, product sampling, consumer and trade events, advertising (television, online and print) and recipe and food plans, to target our consumers. We also use online resources, including social media sites, to communicate with consumers and build interest in our brands. Our advertising and use of online resources are aimed at increasing consumer preference and usage of our brands. Our trade promotions focus on obtaining retail feature and display support, achieving optimum retail product prices and securing retail shelf space. We use coupons (freestanding insert newspaper, store register, on-pack and online coupons) to help stimulate product trial and repeat purchases by providing consumers with economic incentives. The mix of these marketing activities varies between the Atkins and Quest brands.

As part of our advocacy on the advantages of a protein-rich, low-carbohydrate, and low-sugar dietary approach, we have devoted portions of our respective brand websites and social media to promote consumer education, engagement, and dialogue about the benefits of our nutritional approaches and how our products can fit within those approaches. Our sales and marketing team gathers information and feedback from consumers and retailers to enable us to better meet changing consumer needs. We also believe that an effective marketing tool is to share educational information through our brand websites to explain each brand's approach to nutrition, teaching consumers how to make smarter food choices and the nutritional qualities of our products. We also provide access to consumer service representatives to answer questions and educate consumers on nutrition, new products and developments.

For both brands, in order to facilitate awareness and knowledge of the health benefits of a low-carbohydrate, low-sugar and protein-rich eating approach, we have established a variety of marketing and advertising strategies to connect with consumers, including digital marketing and social media platforms, television broadcast and streaming advertising as well as celebrity and social media influencer endorsements.

For both brands, we have built large consumer followings. Beyond the core historic consumers for each of our brands, we believe there is significant opportunity to increase household penetration for our products by expanding our marketing, product offerings and educational efforts to consumers who are focused more generally on long-term healthy living.

In the fifty-two weeks ended August 27, 2022, approximately 69% of *Selling and marketing* expenses were spent on advertising costs.

Product Innovation

A portion of our sales is driven by new products, and as a result, we believe innovation is, and will continue to be, an important component of our business. We take a deliberate approach to new product development, focusing on enhancing existing products, innovating flavor and form varieties, and expanding into adjacent snacking products. Our innovation model is designed to respond to competitive demands, with a primary focus on enhancing the quality and flavor of our products while simplifying composition and ingredients to meet consumer demands for unique nutrition options.

Our innovation strategy is based on ongoing research into consumers' healthy lifestyle and nutritional needs. We pride ourselves on knowing our consumers and developing products that meet their needs. Providing variety in snacking options to our consumers is an important strategy in our product innovation. New flavors, textures and snacking formats are important to meeting consumer needs.

Management believes that an important component of meeting consumers' nutritional needs is a focus on evolving current products and creating new products with cleaner and fewer ingredients. Accordingly, we are committed to continually finding new and innovative formulations to reduce the number of ingredients in our products, as well as using "better-for-you" ingredients like nuts, fiber and whey protein, while continually improving taste and quality.

We maintain an in-house research and development team as well as market research and consumer insight capabilities. Through our research and development labs in El Segundo, California and Broomfield, Colorado, we control our brands' innovations and product formulations from the ground up. By developing new products, prototypes and adjacencies in-house, we facilitate our core competencies in product innovation, and enhance our speed to market.

In addition, as part of our innovation process, we collaborate with nationally recognized third-party flavor providers and product development firms for new product development and then conduct our own proprietary consumer research to identify and improve upon new product concepts. We plan to continue conducting extensive consumer research to develop successful new products including product flavor and concept testing, marketing and trend analysis, and consumer prototype testing.

Management also believes the fragmented snacking category presents an opportunity for consolidation and the opportunity to build, through disciplined acquisitions, a leading platform in the nutritional snacking space. As a leader in nutritious snacking,

management believes we have the unique capability to leverage our operating platform and customer relationships to expand beyond our current brands. Our experienced management team has deep expertise in brand building to expand the business into additional brands and products in the nutritional snacking segment. Simply Good Foods is actively seeking to identify and evaluate new acquisition opportunities to complement our existing portfolio, and sees significant opportunity for growth and synergies in complementary adjacent snacking categories such as sports/active and adult nutritional snacks, salty snacks and protein snacks, as well as in the “better-for-you” eating space.

Intellectual Property

We own numerous domestic and international trademarks and other proprietary rights that are important to our business. Depending upon the jurisdiction, trademarks are valid if they are used in the regular course of trade and/or their registrations are properly maintained. We believe the protection of our trademarks, copyrights, patents, domain names, trade dress and trade secrets are important to our success. We aggressively protect our intellectual property rights by relying on a combination of watch services and trademark, copyright, patent, trade dress and trade secret laws, and through the domain name dispute resolution system. We also own virtually all of the recipes and specifications for our products.

Competition

We compete primarily with nutritional snacking brands in large retail and e-commerce environments. The nutritional snacking industry is fragmented and highly competitive and includes a number of diverse competitors. Our identified branded competitors include, but are not limited to, CLIF Bar, KIND bars, Special K, Boost, Slimfast, Muscle Milk, ONE bar, Pure Protein, Premier Nutrition and think!. We believe that the principal competitive factors in the nutritional snacking and weight management industries are:

- brand awareness and loyalty among consumers;
- product ingredients;
- macronutrient profile of products;
- product claims;
- product taste;
- convenience of products;
- media spending;
- product variety, packaging and labeling; and
- access to retailer shelf space.

We believe that we currently compete effectively with respect to each of these factors. However, a number of companies in the nutritional snacking and weight management industry have greater financial resources, more comprehensive product lines, broader market presence, longer standing relationships with distributors and suppliers, longer operating histories, greater distribution capabilities, stronger brand recognition, and greater marketing resources than we have.

Supply Chain

We operate an asset-light business model. For the manufacture of our products, we subcontract with contract manufacturers, and as a result, our operations are highly flexible and require minimal capital expenditure. The supply chain for our international business also uses exclusively contract manufacturers.

U.S. Supply Chain. The majority of our products are shipped directly to one central warehouse, which is a leased warehouse managed by a third-party logistics provider. We also have a separate warehouse for a portion of our distribution needs. A substantial portion of our inventory is shipped directly to our retailers from this warehouse by the same third-party logistics provider. Most of our remaining customers pick-up their orders at our distribution centers and make their own arrangements for delivery to their fulfillment network. For certain customers, RTD shakes are shipped directly from the contract manufacturer to the customers’ locations. We believe our use of demand forecasting and vendor-managed inventory systems enables us to meet shipping demands, ensure timely delivery of orders and offer service levels to our customers.

Sourcing. The principal ingredients to manufacture our products include chocolate and other coatings, dairy, proteins, soy, and nuts. Our packaging consists of flexible film, cartons, tetra paper, and corrugate. All of our core ingredients are purchased according to rigorous standards to assure food quality and safety. These core ingredients are generally available in adequate quantities from several suppliers, and to date, most core ingredient supplies have largely not been affected by the supply chain challenges related to the COVID-19 pandemic or recent geopolitical events. We competitively bid with major suppliers to source competitively priced, quality ingredients and packaging that meet our standards. For certain ingredients we establish direct purchasing agreements with suppliers, under which our contract manufacturers source ingredients to produce finished products. We also actively manage the cost of most of our packaging supplies, such as corrugate, film, and tetra caps and cartons. The cost of sourcing our ingredients and packaging has been affected by the

current elevated levels of supply chain cost inflation in the United States and elsewhere. For more information, see “– *Business Trends in Fiscal Year 2022*,” above.

Manufacturing. We rely on contract manufacturers to manufacture our products. The contract manufacturers schedule and receive ingredient and packaging inventory according to parameters set in their contracts and forecasts we provide. As noted above, some ingredients and packaging are purchased by our contract manufacturers pursuant to framework contracts we have with the applicable suppliers. Our contract manufacturers are regularly audited by third parties and are required to follow rigorous food safety guidelines. We believe our contract manufacturers have capacity to meet our anticipated supply needs, although short-term high demand can cause disruptions. We monitor both near-term and long-term capacity as well as fulfillment rates and overall performance of our manufacturing partners and qualify alternate suppliers as needed. In general, we purchase finished products from our contract manufacturers, which includes all packaging and ingredients used, as well as an agreed-upon tolling charge for each item produced. These finished products are then shipped directly to our distribution centers, or shipped directly from the contract manufacturer to the customer.

U.S. Storage. We lease two distribution centers, both in Greenfield, Indiana, referred to collectively as the Distribution Centers, where we store finished goods. We utilize over 1.29 million square feet of floor space among our Distribution Centers.

Distribution. For the majority of our customers, our logistics provider distributes the finished goods via truckloads from our Distribution Centers, which first flow through regional terminals. At the terminals, our orders are consolidated with other companies’ products being shipped to the customer. The finished goods are then distributed to retailer distribution centers. The regular weekly shipments and consolidation have reduced our costs. For some products, we ship directly to customers from our contract manufacturer through a third-party logistics provider. In some instances, the customer will arrange to pick-up directly finished products from our Distribution Centers.

Retailers. We have a wide variety of customers across the mass, food, club, drug, and e-commerce channels. A substantial majority of our sales are generated from a limited number of retailers. Sales to our largest retailer, Walmart, represented approximately 31% of consolidated sales in fiscal year 2022, of which approximately 23% is through their mass retail channel and approximately 8% is through their Sam’s club and e-commerce channels. Sales to our next two largest retailers, Amazon and Target, represented approximately 13% and 10% of consolidated sales in fiscal year 2022, respectively. No other customer represents more than 10% of sales. For additional information, please see the risk factor “*We rely on sales to a limited number of retailers for a substantial majority of our net sales, and losing one or more such retailers may materially harm our business. In addition, we maintain “at will” contracts with these retailers, which do not require recurring or minimum purchase amounts of our products.*”

E-Commerce. We aim to ensure that our consumers may access our brand in the way that best suits their lifestyles by offering online ordering of our products. We sell our products on *Atkins.com*, *questnutrition.com*, *Amazon.com* and e-commerce platforms of our brick-and-mortar customers, which all deliver our products directly to the location designated by the consumer.

Food Safety and Quality. Food safety and quality is a top priority, and we dedicate substantial resources to ensure that consumers receive safe, high quality food products. Our products are manufactured in facilities that have programs and controls in place regarding consistent quality and food safety. Product attributes such as taste, aroma, texture, and appearance are regularly monitored. Good Manufacturing Practices and comprehensive food safety programs are designed to produce a safe, wholesome product. Our suppliers are required to have equally robust processes in place and confirm their compliance with product specifications with Letters of Guaranty and Certificates of Analysis for shipments of core ingredients to be used in our products. Finally, random samples of finished goods are regularly sent to a third-party laboratory for testing. In addition, during fiscal year 2022, we obtained ISO 22000 certification for our U.S. operations.

International. Our products are also sold outside North America. Our top international sales are in Australia and New Zealand. For the fifty-two weeks ended August 27, 2022, international net sales represented approximately 2.9% of total net sales. Our international supply chain is run by a lean team solely focused on international operations. Similar to U.S. operations, international operations utilize contract manufacturers for products, and distributors for distribution and sales.

Information Technology

We rely heavily on information systems for management of our supply chain, inventory, payment of obligations, collection of cash, human capital management, financial tools and other business processes and procedures. Our ability to manage our business functions efficiently and effectively depends significantly on the reliability and capacity of these systems. We have instituted controls, including information technology governance controls that are intended to protect our computer systems and our information technology systems and networks. We also have business continuity plans that attempt to anticipate and mitigate failures. However, we cannot control or prevent every potential technology failure, adverse environmental event, third-party service interruption or cybersecurity risk.

We increasingly rely on cloud computing and other technologies that result in third parties holding significant amounts of customer, consumer or employee information on our behalf.

Except for limited information voluntarily submitted by users of our website, we typically do not collect or store consumer data or personal information. However, third-party providers, including our licensees, contract manufacturers, e-commerce contractors and third-party sellers may do so. The website operations of such third parties may be affected by reliance on other third-party hardware and software providers, technology changes, risks related to the failure of computer systems through which these website operations are conducted, telecommunications failures, data security breaches and similar disruptions.

Segments

During the fifty-two weeks ended August 27, 2022, we substantially completed our efforts to fully integrate our operations and organization structure after the Quest Acquisition. We aligned the nature of our production processes and the methods used to distribute products to customers for the Atkins® and Quest® brands. We also designed our organizational structure to support entity-wide business functions across brands, products, customers, and geographic regions. Additionally, our chief operating decision maker reviews operating results and forecasts at the consolidated level. As a result, we determined our operations are organized into one, consolidated operating segment and reportable segment.

Regulation and Compliance

Along with contract manufacturers, brokers, distributors, ingredients and packaging suppliers, Simply Good Foods is primarily subject to laws and regulations in the United States promulgated by federal, state and local government authorities. In the United States, the federal agencies governing the manufacture, distribution and advertising of products include, among others, the U.S. Federal Trade Commission (“FTC”), the U.S. Food and Drug Administration (“FDA”), the U.S. Environmental Protection Agency, and the Occupational Safety and Health Administration, in addition to similar state and local agencies. Under various statutes, these agencies prescribe the requirements and establish the standards for quality and safety and regulate marketing and advertising to consumers. In certain circumstances, these agencies must not only approve products, but also review the manufacturing processes and facilities used to produce these products before they can be marketed in the United States.

Simply Good Foods is subject to labor and employment laws, laws governing advertising, privacy laws, safety regulations and other laws, including consumer protection regulations that regulate retailers or govern the promotion and sale of merchandise. Our operations, and those of our contract manufacturers, distributors, and suppliers, also are subject to various laws and regulations relating to environmental protection and worker health and safety matters. We continue to monitor their development and our compliance.

Food-Related Regulations

As a manufacturer and distributor of food products, we are subject to several food-related regulations, including the Federal Food, Drug and Cosmetic Act and regulations promulgated thereunder by the FDA. This comprehensive regulatory framework governs the manufacture (including composition and ingredients), labeling, packaging and safety of food in the United States. The FDA:

- regulates manufacturing practices for foods through its current good manufacturing practices regulations;
- specifies the standards of identity for certain foods, including many of the products we sell; and
- prescribes the format and content of certain information required to appear on food product labels.

We are subject to the Food Safety Modernization Act, which, among other things, mandates that the FDA adopt preventative controls to be implemented by food facilities in order to minimize or prevent hazards to food safety. We are subject to numerous other federal, state and local regulations involving such matters as the licensing and registration of manufacturing facilities, enforcement by government health agencies of standards for our products, inspection of our facilities and regulation of our trade practices in connection with the sale of food products.

Environmental Regulations

We are subject to various state and federal environmental laws, regulations and directives, including the Food Quality Protection Act of 1996, the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Federal Insecticide, Fungicide and Rodenticide Act and the Comprehensive Environmental Response Compensation and Liability Act of 1980, as amended. Governments may in the future implement new laws, regulations and directives aimed to meet certain climate change goals and objectives which could affect our business operations as they relate to ingredient and packaging procurement.

We believe that we are in material compliance with existing environmental regulations applicable to our business. We do not expect the cost of our continued compliance with existing environmental regulations to have a material effect on our capital expenditures, earnings, cash flows or competitive position in the foreseeable future. In addition, any asset retirement obligations are not material.

Labeling Regulations

We are subject to various labeling requirements with respect to our products at the federal, state and local levels. At the federal level the FDA has authority to review product labeling, and the FTC may review labeling and advertising materials, including online and television advertisements, to determine if advertising materials are misleading. We are also subject to various state and local consumer protection laws. We believe we are in material compliance with all labeling laws and regulations applicable to our business.

Human Capital Resources

As of August 27, 2022, our workforce consisted of 260 employees globally who were largely based in an office or in research and development (“R&D”) lab locations. Of that total, approximately 95% of our employees were in the United States, and the rest were in Canada, Europe, Australia, and New Zealand. 111 employees were engaged in marketing and sales, 81 were engaged in R&D, operations and quality, and 68 were engaged in administration. Of our United States employees, 20 employees were hourly and 227 were salaried. No employees were covered by a collective bargaining agreement.

Mission, Vision and Values. Our mission is to empower healthy lives through smart and satisfying nutrition. Our vision is to lead the nutritious snacking movement with trusted brands that offer a variety of convenient, innovative, great-tasting, better-for-you snacks and meal replacements. Our values, *Act with Integrity, Lead with Innovation, Succeed through Interdependence, Be Empowered, and Bring Passion Every Day*, are critical to our success in fulfilling our mission and vision.

Training & Development. Training and development is critical to our mission’s success, helps our employees grow their career, and is one way we attract, motivate and retain our employees. We regularly host “Be Empowered” sessions for employees, which are educational classes and networking opportunities that teach our nutrition philosophy and our different business functions. To develop effective and empowered leaders, we host regular trainings and informational sessions.

In our normal performance review cycle, which took place in early fiscal year 2022, 99% of our employees held career discussions with their managers to identify opportunities for development and career progression. Our accelerated mentorship program pairs junior talent with executive leadership, which is designed to broaden talent networks, increases exposure to cross-functional problem solving and builds leadership competencies and impact. Because of these career discussions, the accelerated mentorship program and the talent review process conducted by our senior leadership, during fiscal year 2022, we promoted 11% of our workforce and provided associated compensation increases.

Our Commitment to Diversity, Equity & Inclusion (“DE&I”). We recognize the importance of a diverse, equitable and inclusive culture for our employees and its effect on our ability to achieve our mission, so we have made commitments to track and improve our performance in each of these areas. Our Board of Directors created its Corporate Responsibility & Sustainability committee that has been tasked with, among other things, overseeing human capital resources and all our DE&I initiatives. These initiatives include the following, among others:

- We hired a third-party DE&I consultant to survey our employees and provide guidance and best practice inputs to our management and the Corporate Responsibility & Sustainability Committee, as we continue to make progress on our DE&I efforts.
- During fiscal year 2022, we established a Diversity, Equity, Inclusion and Belonging Council consisting of mid-level and senior leaders so our DE&I efforts are informed and led by a cross section of our leaders. Its mission is to foster a positive, open, and trusted culture of belonging where every person feels empowered to bring their unique selves to the workplace resulting in a competitive advantage through thought-leadership and talent growth that halos beyond our workforce to our partners and community, creating an inclusive ecosystem.
- We complete a pay equity audit every fiscal year to evaluate equity in our pay practices and work to address any issues that may arise.
- We post every open position or promotional opportunity in the United States that is not confidential, and we include the job’s pay range to provide transparency to candidates. This practice provides every qualified candidate an opportunity to apply with knowledge of the range of pay for the role.
- We are committed to interviewing diverse candidates for open corporate leadership positions.
- Environmental, social and governance (“ESG”) initiatives are included as part of the determination of the discretionary component of our annual short-term incentive program.
- All employees are required to attend preventing discrimination and harassment training.
- We observe Juneteenth as a company-paid holiday every year in the United States as a day of reflection, education, and celebration.

The table below provides information as of August 27, 2022, the end of our fiscal year, about the representation of women and minorities as a percentage of our employees at various levels of management categories used by our Executive Leadership Team to manage our workforce. This information is also reviewed by our Board of Directors about the representation of women and minorities as a percentage of our employees at various levels of management and our Board of Directors, as of August 27, 2022.

Female and Minority Representation

	Female	Minority ¹
All Employees	55%	32%
All People-leaders	43%	19%
Director-level	49%	15%
VP-level	31%	13%
Executive Leadership Team	23%	8%
Board of Directors	18%	9%

¹ Minority representation includes the percent of United States employees who identify as Black or African American, Asian, Hispanic, Native American, or two or more races.

The table below provides information for the period December 1, 2021 through December 15, 2021 in our 2021 EEO-1 report. We have condensed the EEO-1 report to eliminate rows and columns that have no employees in this report or in the previous year's report total. This table shows our gender, racial, and ethnic composition by EEO-1 job category as set forth in the Section D Employment Data section of the Consolidated EEO-1 Report that we filed with the U.S. Equal Employment Opportunity Commission (EEOC) in 2022. The information is provided for the time period that is consistent with the report's filing instructions.

Job Categories	Hispanic or Latino		Not-Hispanic or Latino										Overall Totals
			Male					Female					
	Male	Female	White	Black or African American	Asian	American Indian or Alaskan Native	Two or More Races	White	Black or African American	Native Hawaiian or Pacific Islander	Asian	Two or More Races

Total	11	25	82	5	10	1	4	90	5	—	13	4	250
Previous Report Total	14	27	74	4	9	—	7	82	5	1	18	4	245

Employee Culture. We regularly ask our employees to respond to pulse surveys to gather feedback on topics ranging from organization changes to overall engagement and inclusion. This encourages open communication with employees and management, and tracks employee engagement over time. We use the information we gain from the surveys to inform our strategy and actions as we continue to work towards improving our culture. We have also committed to summarizing results for each survey and providing responses quickly after the surveys close.

Total Rewards. The health, satisfaction and security of our employees and their families are important to us and an important part of reaching our organization's goals. We offer total rewards packages that include valuable and competitive compensation and benefit plans. These programs reflect our commitment to attracting and retaining top talent and keeping our staff healthy and secure. Our compensation philosophy is to pay for performance, and we do so through a mix of base salary, annual short-term incentive and long-term incentive.

We understand that each employee's situation is unique, so we offer benefits that can be shaped and molded by each employee to fit their individual or family's needs. Our current benefits vary by region, but generally include medical, dental and vision insurance, 401(k) retirement plan, savings accounts, life and disability insurance coverage, free mental telehealth support, and other voluntary benefits. We also offer time-off benefits including vacation time, flexible vacation for exempt positions, sick leave, and paid parental leave.

Employee Safety and Wellbeing Measures. After over two years of working remotely due to the COVID-19 pandemic, we returned to our offices in the United States on May 31, 2022. In continuing our focus on keeping our teams safe, we continue to follow local regulations for each of our offices.

We recognize the importance of balance in our employees' lives to their overall wellbeing, so we offer our employees time off benefits described above to recharge, ten company-paid holidays per year, flexible remote workdays every Monday and Friday, and paid parental leave. We also had one company-wide mental health day in April 2022 and encouraged employees to take extra time away from work to recharge in late December 2021.

Advancing Health, Nutrition and Wellbeing. Our mission is to empower healthy lives through smart and satisfying nutrition. We believe we play an important role in helping to improve nutrition and overall wellness in the United States through scientific research, education, advocacy and community engagement.

Since 2016, we have advocated with various branches of the U.S. federal government to encourage more inclusive guidance in the U.S. Department of Agriculture's and U.S. Department of Health and Human Services' Dietary Guidelines for Americans (the "Dietary Guidelines"), which is released every five years. Our goal is to expand the Dietary Guidelines to offer solutions for more Americans, including the more than half of the U.S. population suffering from negative metabolic-related conditions such as cardiovascular disease, prediabetes, diabetes and obesity. We also believe expanding the Dietary Guidelines would help to address health equity in many underserved populations in the United States who have higher rates of metabolic-related diseases. The advocacy work we have done is aligned with recent guidance issued by major health organizations such as the American Diabetes Association and the American Heart Association, both of which recommend a lower carbohydrate dietary approach as an option for those with diabetes.

Our public policy advocacy includes presenting significant scientific research comprised of several hundred, peer-reviewed clinical studies in numerous meetings with policymakers, congresspeople, and decision-makers in the U.S. Department of Agriculture and the U.S. Department of Health and Human Services. In addition, we have sponsored numerous continuing education courses for registered dietitians and other healthcare professionals, and we are a member of multiple collaborative groups focused on improving the nutritional quality of the U.S. food system.

As part of our advocacy on the advantages of a protein-rich, low-carbohydrate, and low-sugar dietary approach, we have devoted portions of our respective brand websites and social media to promote consumer education, engagement, and dialogue about the benefits of our nutritional approaches and how our products can fit within those approaches. Through our websites and social media, we also share educational information to explain each brand's approach to nutrition, teaching consumers how to make smarter food choices and the nutritional qualities of our nutritional approach and our products. Our Atkins website also offers free of charge information regarding the Atkins protein-rich, low-carbohydrate and low-sugar approach to eating, several tools to assist consumers in pursuing the Atkins approach and over 1,600 recipes designed to help consumers achieve and maintain a healthy lifestyle, while still enjoying delicious food.

In late 2021, we launched The Quest Challenge, a grant program for individuals who are making a difference in their community in support of health and wellness. In our inaugural year, we provided four separate \$20,000 grants. The Quest Challenge grant was awarded following a competitive process in which applicants expressed their current philanthropic work and what they aim to achieve if they received the grant. Recipients of this year's grant have used this money to improve the health and wellbeing of underserved and at-risk children, create safe spaces for children to play or learn a new skill, and encourage physical and artistic activities to build confidence and self-esteem. We will continue to follow the progress of our past recipients and their effect on their communities.

For the second year, we participated in Walmart's "Fight Hunger. Spark Change." campaign. For each purchase of participating Simply Good Foods' Atkins and Quest products at Walmart from April 18 – May 15, 2022, we donated the monetary equivalent of at least one meal to Feeding America. Through this program, Simply Good Foods secured at least 500,000 meals for Feeding America. Additionally, we encourage and support our employees to give back to charities they are passionate about, and we match up to \$100 of each employee's donations.

Available Information

We file annual, quarterly and current reports, proxy statements and other information with the SEC.

We file our reports with the SEC electronically through the SEC's Electronic Data Gathering, Analysis and Retrieval ("EDGAR") system. The SEC maintains an Internet site that contains reports, proxy and information statements and other information regarding companies that file electronically with the SEC through EDGAR, which are available free of charge. The address of this Internet site is www.sec.gov.

We also make available free of charge through our website at www.thesimplygoodfoodcompany.com our Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. We are not, however, including the information contained on our website, or information that may be accessed through links on our website, as part of, or incorporating such information by reference into, this Report.

Item 1A. Risk Factors.

An investment in our securities involves a high degree of risk. You should carefully consider the risks described below before making an investment decision. Our business, prospects, financial condition or operating results could be harmed by any of these risks, and other risks not currently known to us or that we currently consider immaterial. The trading price of our securities could decline due to any of these risks, and, as a result, you may lose all or part of your investment.

Risks Related to our Business

Our operations are dependent on a global supply chain and effects of supply chain constraints and inflationary pressure on us or our suppliers could adversely affect our operating results.

Our operations and the operations of our contract manufacturers have been, and may continue to be, affected by supply chain constraints and packaging, ingredient and labor shortages, resulting in increased costs caused, in part, by the COVID-19 pandemic, the uncertain economic environment, and macroeconomic and geopolitical events and trends. In addition, current or future governmental policies may increase the risk of further inflation, which could further increase the costs of ingredients, packaging and finished goods for our business. Similarly, if costs of goods and labor continue to increase, our suppliers may continue to seek price increases from us. If we cannot mitigate the effect of supply chain constraints and inflationary pressure through price increases or cost saving measures, our results of operations and financial condition could be negatively affected.

Even if we can raise the prices of our products, consumers might react negatively to these price increases, which could have a material adverse effect on, among other things, our brands, reputation, and sales. If our competitors maintain or lower their prices while we raise prices, we may lose customers or the purchase frequency of our products may slow, which would both adversely affect sales. Our profitability may be negatively affected by higher costs, inadequate pricing or a reduction in purchase frequencies of our products, which may negatively affect gross margins and sales. Even though we are working to alleviate supply chain constraints through various measures, we cannot predict the effect of these constraints on the timing of revenue and operating costs of our business in the near future. Supply chain challenges and supply chain constraints relating to ingredients, freight and packaging, including cost inflation, have negatively affected our gross margins and profitability during fiscal year 2022 and may continue to have a negative effect on our future operating results and profitability. In addition, prolonged unfavorable economic conditions, including because of COVID-19 or similar outbreaks, endemics or pandemics, and any resulting recession or slowed economic growth, may have an adverse effect on our sales and profitability.

If we cannot maintain or increase prices of our products to cover elevated input costs, our margins may decrease.

We rely, in part, on price increases to offset cost increases and maintain or improve the profitability of our business. Our ability to maintain prices or effectively implement price increases, including our price increases effective in fiscal year 2022, may be affected by several factors, including competition, effectiveness of our marketing programs, the continuing strength of our brands, market demand and general economic conditions, including broader inflationary pressures. During challenging economic times, consumers may be less willing or able to pay a price premium for our branded products and may shift purchases to lower-priced or other value offerings, making it more difficult for us to maintain prices and/or effectively implement price increases. In addition, our retail partners and distributors may pressure us to rescind price increases we have announced or already implemented, whether through a change in list price or increased trade and promotional activity. If we cannot maintain or increase prices for our products or must increase trade and promotional activity, our margins may be adversely affected. For more information on the implementation of our price increases and the effects of supply chain cost increases on our profitability during fiscal year 2022, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in this Form 10-K. Furthermore, price increases generally result in volume losses, as consumers tend to purchase fewer units at higher price points. If such losses are greater than expected or if we lose distribution due to price increases, our business, financial condition and results of operations may be materially and adversely affected.

Pandemics, epidemics or disease outbreaks, such as the novel coronavirus (“COVID-19”), have in the past and may in the future disrupt our business, including, among other things, consumption and trade patterns, our supply chain and production processes, each of which could materially affect our operations, liquidity, financial condition and results of operations.

The actual or perceived effects of a disease outbreak, epidemic, pandemic or similar widespread public health concern, such as COVID-19, could negatively affect our operations, liquidity, financial condition and results of operations. The COVID-19 pandemic situation continues to remain dynamic and subject to rapid and possibly material change, including but not limited to changes that may materially affect the operations of our customers and supply chain partners in the future, which ultimately could cause material negative effects on our business and results of operations. For example, the operations of several of our contract manufacturers were affected by the COVID-19 pandemic’s effect on the availability of labor.

Pandemics, epidemics or disease outbreaks may affect demand for our products because quarantines or other government restrictions on movement may cause erratic consumer purchase behavior. Our business experienced these effects during fiscal year 2022 as described in more detail in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in this Form 10-K. Governmental or societal impositions of restrictions on public gatherings, especially if prolonged, may have adverse effects on consumption rates and in-person traffic to retail stores and, in turn, our business. Even the perceived risk of infection or health risk may adversely affect traffic to our store-based retail customers and, in turn, our business, liquidity, financial condition and results of operations, particularly if any mobility restrictions are in place for significant time.

The spread of pandemics, epidemics or disease outbreaks such as COVID-19 may also disrupt our third-party business partners’ ability to meet their obligations to us, which may negatively affect our operations. These third parties include those who supply our ingredients, packaging, and other necessary operating materials, contract manufacturers, distributors, and logistics and transportation services providers. For example, the operations of several of our contract manufacturers were affected by the COVID-19 pandemic’s effect on the availability of labor. Ports and other channels of entry may be closed or operate at only a portion of capacity, as workers may be prohibited or otherwise unable to report to work and means of transporting products within regions or countries may be limited for the same reason. Because of the COVID-19 pandemic, transport restrictions have been put in place and global supply was and may become again in the future constrained, each of which may cause and have caused price increases or shortages of certain ingredients and raw materials used in our products. In addition we may experience disruptions to our operations. Further, our contract manufacturers’ ability to manufacture our products was, and may again in the future be, impaired by disruption to their employee staffing, procurement, manufacturing, or warehousing capabilities because of COVID-19 or similar outbreaks.

Our results of operations depend on, among other things, our ability to maintain and increase sales volume with our existing customers, to attract new consumers and to provide products that appeal to consumers at prices they are willing and able to pay. Our ability to implement our innovation, advertising, display and promotion activities designed to maintain and increase our sales volumes on a timely basis may be negatively affected because of modifications to retailer shelf reset timing or retailer pullback on in-store display and promotional activities during the COVID-19 pandemic or similar situations. Retailers may also alter their normal inventory receiving and product restocking practices during pandemics, epidemics or disease outbreaks such as COVID-19, which may negatively affect our business.

Workforce limitations and travel restrictions resulting from pandemics, epidemics or disease outbreaks such as COVID-19 and related government actions may affect many aspects of our business. If a significant percentage of our workforce cannot work or we cannot visit our contract manufacturers’ locations, including because of illness, travel or government restrictions related to pandemics or disease outbreaks, our operations may be negatively affected. In addition, pandemics or disease outbreaks could cause a widespread health crisis that could adversely affect the economies and financial markets of many countries where we offer products, resulting in an economic downturn that could affect customers’ and consumers’ demand for our products.

Adverse and uncertain economic conditions, such as decreases in per capita income and level of disposable income, increased unemployment or a decline in consumer confidence because of the COVID-19 pandemic or similar situations, could have an adverse effect on distributor, retailer and consumer demand for our products. Consumers may shift purchases to lower-priced or other perceived value offerings during economic downturns.

Our consolidated results of operations for the full fiscal year ended August 27, 2022 were affected by ongoing changes in consumer shopping and consumption behavior likely due, in part, to COVID-19 infections, the ongoing shift to work-from-home arrangements and school disruptions as described in more detail in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in this Form 10-K. While our Quest brand has outperformed its portion of the nutritious snacking segment, the performance of our Atkins brand, which is part of the weight management portion of the market, has remained slower due to factors that may include the temporary softer interest in weight management for consumers and fewer on-the-go usage occasions.

We believe these effects on consumer demand and shopping behavior because of the COVID-19 pandemic may continue, including because of new virus variants and the effect these variants have on consumer shopping patterns, until a more consistent return of work outside the home to more normal patterns and our brand benefits of active nutrition and weight management drive more better-for-you snacking and meal replacement usage occasions.

Our efforts to manage and mitigate these factors may be unsuccessful, and the effectiveness of these efforts depends on factors beyond our control, including the duration and severity of any pandemic, epidemic or disease outbreak, and third party actions taken to contain its spread and mitigate public health effects.

We may not be able to compete successfully in the highly competitive nutritional snacking industry.

Our business is committed to providing people a more nutritious way to eat. As a result, we compete in the nutritional snacking industry, which is included in the general snack foods industry. The nutritious snacking industry is large and intensely competitive. Competitive factors in the nutritional snacking industry include product quality, taste, brand awareness among consumers, nutritional content, simpler and less processed ingredients, innovation of “on-trend” snacks, variety of snacks offered, grocery aisle placement, access to retailer shelf space, price, advertising and promotion, product packaging and package design. We compete in this market against numerous multinational, regional and local companies principally based on our low-carb, low-sugar and protein-rich nutritional content, product taste and quality, our brand recognition and loyalty, marketing, advertising, price and the ability to satisfy specific consumer dietary needs. An increasing focus on healthy and simpler products in the marketplace will likely increase these competitive pressures within the category in future periods.

Our competitors in the nutritional snacking industry include companies selling branded weight loss programs who support these programs by offering a wide variety of diet foods, meal replacement bars, shakes and nutritional supplements, and through the promotion of weight loss and weight management approaches such as keto, paleo, vegan, gluten free, vegetarian and others. Views towards nutritional snacking, weight loss and management, and other nutritional approaches, are cyclical and trendy, with constantly changing consumer perceptions. Besides remaining competitive through the quality of our products, consumer perceptions of the Atkins’ weight management approach and the effectiveness of a low-carb, low-sugar and protein-rich eating approach for both our Atkins and Quest brands must continue to be viewed favorably, or our business and reputation may be materially and adversely affected. For the Atkins brand, if other weight management approaches become more popular, or are generally perceived to be more effective, we may not be able to compete effectively.

Some of our competitors have resources substantially greater than we have and sell brands that may be more widely recognized than our brands. Our current and potential competitors may offer products similar to our products, a wider range of products than we offer, and may offer such products at more competitive prices than we do. Local or regional markets often have significant additional competitors, many of whom offer products similar to ours and may have unique ties to regional or national retail chains. Any increased competition from new entrants into the nutritional snacking industry or any increased success by existing competition could cause reductions in our sales, require us to reduce our prices, or both, which could materially and adversely affect our business, financial condition and results of operations.

If we fail to implement our growth strategies successfully, timely, or at all, our ability to increase our revenue and operating profits could be materially and adversely affected.

Our future success depends, largely, on our ability to implement our growth strategies effectively. However, we may fail to accomplish this. We expect to continue focusing on nutritional snacking and intend to add additional brands to our product portfolio. As a business with more than one brand, we face increased complexities and greater uncertainty regarding consumer trends and demands than as a single-brand business. Our ability to expand successfully our nutritional snacking brands and other growth strategies depends on, among other things, our ability to identify, and successfully cater to, new demographics and consumer trends, develop new and innovative products, identify and acquire additional product lines and businesses, secure shelf space in grocery stores, wholesale clubs and other retailers, increase consumer awareness of our brands, enter into distribution and other strategic arrangements with third-party retailers and other potential distributors of our products, and compete with numerous other companies and products.

In addition, regarding our Atkins brand, lifestyle consumers of products may have different preferences and spending habits than the consumers of traditional weight loss products. We may fail in reaching and maintaining the loyalty or purchase frequency rate of new Atkins consumers to the same extent, or at all, as we have with our historical Atkins consumers. We may also not succeed in evolving our advertising and other efforts to appeal to our target consumers for both Atkins and Quest.

If we cannot identify and capture new audiences and demographics for all our brands, our ability to integrate additional brands successfully will be adversely affected. Accordingly, we may not be able to successfully implement our growth strategies, expand the number of our brands, or continue to maintain growth in our sales at our current rate, or at all. If we fail to implement our growth strategies or if we invest resources in growth strategies that ultimately prove unsuccessful, our sales and profitability may be negatively affected, which would materially and adversely affect our business, financial condition and results of operations.

Changes in consumer preferences, habits, perceptions of certain nutritional snacking products and discretionary spending may negatively affect our brand loyalty, purchase frequency rate and net sales, and materially and adversely affect our business, financial condition and results of operations.

We focus on products we believe have positive effects on health and compete in a market that relies on innovation and evolving consumer preferences. The packaged food industry in general, and the nutritional snacking industry in particular, is subject to changing consumer trends, demands and preferences and emerging nutrition science is constantly evolving. Products or methods of eating once considered healthy may become disfavored by consumers, scientifically disproven or no longer be perceived as healthy.

Trends within the food industry change over time and our failure to anticipate, identify or react to changes in these trends could, among other things, lead to reduced consumer demand, shelf or retail space and price reductions, and could materially and adversely affect our business, financial condition and results of operations. Additionally, certain ingredients used in our products may become negatively perceived by consumers, resulting in reformulation of existing products to remove such ingredients, which may negatively affect the taste or other qualities of our products. Factors that may affect consumer perception of healthy products include dietary trends and attention to different nutritional aspects of foods, concerns regarding the health effects of specific ingredients and nutrients, trends away from specific ingredients and processing in products and increasing awareness of the environmental and social effects of product production.

Consumer perceptions of the nutritional profile of our products and related eating practices may shift, and consumers may no longer perceive products with fewer carbohydrates, higher levels of protein, higher levels of fat and additional fiber as healthy or needed to achieve personal weight management, wellness, or fitness goals. Adverse messaging in the media, including social media, or within certain influencer communities, relating to the marketing of weight management products or programs may adversely affect the overall consumer impression of certain of our products, programs or brands, which may materially and adversely affect our business. Approaches regarding weight management and healthy lifestyles are the subject of numerous studies and publications, often with differentiating views and opinions, some of which may be adverse to us. Conflicting scientific information on what constitutes good nutrition, diet fads or other weight loss trends may also materially and adversely affect our business. Our success depends, in part, on our ability to anticipate the tastes and dietary habits of consumers and other consumer trends and to offer products with marketing messaging that appeal to their needs and preferences on a timely and affordable basis. A change in consumer discretionary spending, due to inflationary pressures, economic downturn or other reasons may also materially and adversely affect our sales, and our business, financial condition and results of operations.

If we do not continually enhance our brand recognition, increase distribution of our products, attract new consumers to our brands and introduce new and innovative products, either on a timely basis or at all, our business may suffer.

The nutritional snacking industry is subject to rapid and frequent changes in consumer demands. Because consumers are constantly seeking new products and strategies to achieve their healthy eating goals, our success relies heavily on our ability to continue to enhance our brand recognition amongst consumers, develop and market new and innovative products and extensions and effectively inform consumers of these new products. New product sales represent a growing and important portion of our net sales. To respond to new and evolving consumer demands, achieve market acceptance and keep pace with new nutritional, weight management, technological and other developments, we must constantly introduce new and innovative products into the market, some of which may not be accepted by consumers, may be sent to market prematurely or may not be consistent with our quality and taste standards. Accordingly, we may not succeed in timely developing, introducing or marketing any new or enhanced products. If we cannot commercialize new products, our revenue may not grow as expected, which would materially and adversely affect our business, financial condition and results of operations.

Our growth may be limited if we cannot maintain or secure additional shelf or retail space for our products in brick-and-mortar retailers.

Our results depend on our ability to drive revenue growth, in part, by expanding the distribution channels for our products. Our ability to do so may be limited by an inability to secure new retailers or maintain or add shelf and retail space for our products. Shelf and retail space for nutritional snacks is limited and subject to competitive and other pressures. There can be no assurance that retailers will provide sufficient, or any, shelf space, nor that online retailers will provide online access to, or adequate product visibility on, their platform to enable us to meet our growth objectives.

Unattractive placement or pricing, including as a result of our recent price increases, may put our products at a disadvantage compared to those of our competitors. Even if we obtain shelf space or preferable shelf placement, our new and existing products may fail to achieve the sales expectations set by our retailers, potentially causing these retailers to remove our products from their shelves. Additionally, an increase in the quantity and quality of private label products in the product categories in which we compete could create more pressure for shelf space and placement for branded products within each such category, which could materially and adversely affect our sales.

If the perception of our brands or organizational reputation are damaged, our consumers, distributors and retailers may react negatively, which could materially and adversely affect our business, financial condition and results of operations.

We believe we have built our reputation on the efficacy of our nutritional approach, and the high-quality flavor and nutritional content of our food. We must protect and expand on the value of our brands to continue to be successful in the future. Any incident that erodes consumer affinity for our brands or our business operations could significantly reduce our value and damage our business. For example, negative third-party reports regarding the Atkins or Quest nutritional approach or the quality of our food, whether accurate or not, may adversely affect consumer perceptions, which could cause the value of our brands to suffer and adversely affect our business. In addition, if we recall certain products, including frozen foods or licensed products over which we may not have full quality control, the public perception of the quality of our food may be diminished. We may also be adversely affected by news or other negative publicity, regardless of accuracy, regarding other aspects of our business, such as public health concerns, the perception of our environmental stewardship and the effects our business has on the environment, illness, safety, security breaches of confidential consumer or employee information, employee related claims relating to alleged employment discrimination, health care and benefit issues or government or industry findings about our retailers, distributors, manufacturers or others across the industry supply chain.

As part of our marketing initiatives, we have contracted with certain public figures to market and endorse our products. While we maintain specific selection criteria and are diligent in our efforts to seek out public figures that resonate genuinely and effectively with our consumer audience, the individuals we choose to market and endorse our products may fall into negative favor with the general public. Because our consumers may associate the public figures that market and endorse our products with us, any negative publicity on behalf of such individuals may cause negative publicity about us and our products. This negative publicity could materially and adversely affect our brands and reputation and our revenue and profits.

Negative information, including inaccurate information, about us on social media may harm our reputation and brands, which could have a material and adverse effect on our business, financial condition and results of operations.

There has been a marked increase in using social media platforms and similar channels that provide individuals with access to a broad audience of consumers and other interested persons. The availability of information on social media platforms is virtually immediate, as is its effect. Many social media platforms make available the content their subscribers and participants post, often without filters or checks on accuracy of the content posted. The opportunity for dissemination of information, including inaccurate information, is potentially limitless. Information about our business and/or products may be circulated on such platforms at any time. Negative views regarding our products and the efficacy of the Atkins or Quest eating approaches have been posted on various social media platforms, may continue to be posted in the future, and are out of our control. Regardless of their accuracy or authenticity, such information and views may be adverse to our interests and may harm our reputation and brands. The harm may be immediate without affording an opportunity for redress or correction. Ultimately, the risks associated with any such negative publicity cannot be eliminated or completely mitigated and may materially and adversely affect our business, financial condition and results of operations.

We must appropriately allocate resources to maintain consumer awareness of our brands, build brand loyalty and generate interest in our products. Our marketing strategies and channels will evolve, and our programs may or may not be successful.

To remain competitive and expand and keep shelf placement for our products, we may need to increase our marketing and advertising spending to maintain and increase consumer awareness, protect and grow our existing market share or promote new products, which could affect our operating results. Substantial advertising and promotional expenditures may be required to maintain or improve the market position of our brands or to introduce new products to the market. We along with participants in our industry are increasingly engaging with non-traditional and evolving media channels, including consumer outreach through social media and web-based communications, which may not prove successful. An increase in our marketing and advertising efforts may not maintain our current reputation or lead to increased awareness for our brands. Moreover, we may not maintain current awareness of our brands due to any potential fragmentation of our marketing efforts as we continue to focus primarily on a low-carb, low-sugar and protein-rich nutritional approach for everyday snacking consumers. In addition, as media becomes increasingly fragmented, with consumers viewing media more and more through a variety of different platforms, channels and devices such as mobile devices and online streaming and less from traditional broadcast and cable television outlets, our costs to reach a comparable number of target consumers for our advertising activities has increased.

We also consistently evaluate our product lines to determine whether to discontinue certain products. Discontinuing products may increase our profitability but could reduce our sales and cause consumers to shop other brands. The discontinuation of product lines may have an adverse effect on our business, financial condition and results of operations.

Our geographic focus makes us particularly vulnerable to economic and other events and trends in North America.

We operate mainly in North America and, therefore, are particularly susceptible to adverse regulations, economic climate, consumer trends, market fluctuations, including commodity price fluctuations or supply shortages of key ingredients, and other adverse events in North America. The concentration of our businesses in North America could present challenges and may increase the likelihood that an adverse event in North America would disproportionately materially and adversely affect product sales, financial condition and operating results.

Risks Related to our Operating Model

Ingredient and packaging costs are volatile and may rise significantly, which may negatively affect the profitability of our business.

We negotiate the prices for large quantities of core ingredients, such as soy, nuts, dairy, protein, fiber and cocoa, and packaging materials. Several ingredients are manufactured outside of the United States. Costs of ingredients and packaging are volatile and can fluctuate due to conditions difficult to predict, including global competition for resources, fluctuations in currency and exchange rates, weather conditions, the effects of climate change, natural or man-made disasters, consumer demand, geopolitical events, and changes in governmental trade and agricultural programs and environmental regulation. Volatility in the prices of the core ingredients and other supplies we purchase increased significantly in fiscal year 2022 and are expected to remain elevated during fiscal year 2023. As a result, our cost of goods sold increased, and our profitability was reduced.

We do not use hedges for availability of any core ingredients. Any material upward movement in core ingredient pricing could negatively affect our margins if we cannot find efficiencies or pass these costs on to our consumers, or our sales if we are forced to increase our prices. If we are unsuccessful in managing our ingredient and packaging costs, if we cannot increase our prices to cover increased costs or if such price increases reduce our sales volumes, then such increases in costs will materially and adversely affect our business, financial condition and results of operations. For more information on the effects of supply chain cost increases results of operations during fiscal year 2022, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in this Form 10-K.

Certain of our core ingredient contracts have minimum volume commitments that could require purchases without matching revenue during weaker sales periods. Future core ingredient prices may be affected by new laws or regulations, tariffs, suppliers’ allocations to other purchasers, interruptions in production by suppliers, natural disasters, volatility in the price of crude oil and related petrochemical products and changes in exchange rates.

We rely on sales to a limited number of retailers for a substantial portion of our net sales and losing one or more such retailers may materially harm our business. In addition, we maintain “at will” contracts with these retailers, which do not require recurring or minimum purchase amounts of our products.

A substantial majority of our sales are generated from a limited number of retailers. Sales to our largest retailer, Walmart, represented approximately 31% of consolidated sales in fiscal year 2022, of which approximately 23% is through their mass retail channel and approximately 8% is through their Sam’s club and e-commerce channels. Sales to our next two largest retailers, Amazon and Target, represented approximately 13% and 10% of consolidated sales in fiscal year 2022, respectively. Although the composition of our significant retailers may vary from period-to-period, we expect that most of our net sales will continue to come from a relatively small number of retailers for the foreseeable future. These retailers may take actions that affect us for reasons we cannot anticipate or control, such as their financial condition, changes in their business strategy or operations, including their inability to meet their labor or other human capital needs, the perceived quality of their products and introducing competing products. There can be no assurance that Walmart, Amazon, Target or our other significant customers will continue to purchase our products in the same quantities or on the same terms as in the past, particularly as increasingly powerful retailers continue to demand lower pricing.

Our retailers rarely provide us with firm, long- or short-term volume purchase commitments. As a result, we could have periods with little to no orders for our products while still incurring costs related to workforce maintenance, marketing, general corporate and debt service. Furthermore, despite operating in different channels, our retailers sometimes compete for the same consumers. Because of actual or perceived conflicts resulting from competition, retailers may take actions that negatively affect us. We may not find new retailers to supplement our revenue in periods when we experience reduced purchase orders or recover fixed costs because of experiencing reduced purchase orders. Periods of reduced purchase orders could materially and adversely affect our business, financial condition and results of operations.

Conversely, occasionally, we may experience unanticipated increases in orders of our products from these retailers that can create supply chain problems and may cause unfilled orders. If we cannot meet increased demand for our products, our reputation with these retailers, and ultimately our consumers, may be harmed. Unanticipated fluctuations in product requirements could cause fluctuations in our results from quarter-to-quarter. Consolidation among retailers may also materially and adversely affect our results. An increase in the concentration of our sales to large customers may negatively affect our profitability due to the effect of higher shelving fees and reduced volumes of product sold. Furthermore, as retailers consolidate or account for a larger percentage of our sales, they may reduce the number of branded products they offer to accommodate private label products and pressure us to lower the prices of our products.

The loss of, a disruption in or an inability to efficiently operate our fulfillment network could materially and adversely affect our business, financial condition and results of operations.

For our U.S. operations, we utilize distribution centers in Greenfield, Indiana. A substantial portion of our inventory is shipped directly to our retailers from these centers by a third-party logistics provider. Most of our other customers pick-up their orders at our distribution centers and make their own arrangements for delivery to their fulfillment network. A small percentage of our customers are shipped certain products directly from a co-manufacturing location. We rely significantly on the orderly operation of our distribution centers and logistics providers. If complications arise, a particular facility is damaged or destroyed or if either our third-party logistics partners or our customers who transport their own orders to their fulfillment network are not able to meet their labor or other human capital needs for delivery drivers or other warehouse personnel, our ability to deliver inventory timely will be significantly impaired, which could materially and adversely affect our business as a result of lost consumer purchases at retail thereby negatively affecting our results of operations.

We rely on a single-sourced logistics provider for distribution and product shipments in the United States from our distribution centers. Our utilization of delivery services for shipments is subject to risks that may affect the ability to provide delivery services that adequately meet our shipping needs including increases in fuel prices, labor shortages, employee strikes and inclement weather. Occasionally, we may change third-party logistics providers and we could face logistical difficulties that could adversely affect deliveries. In addition, we could incur costs and expend resources in connection with such change and fail to obtain terms as favorable as those we currently receive.

Disruptions at our distribution facilities or in our operations due to natural or man-made disasters, pandemics (such as COVID-19) or other disease outbreaks, fire, flooding, terrorism or other catastrophic events, system failure, labor shortages or disagreements or shipping problems may cause delays in the delivery of products to retailers and could materially and adversely affect our results of operations.

Shortages or interruptions in the supply or delivery of our core ingredients, packaging, products or equipment we purchase could materially and adversely affect our operating results as we rely on a limited number of third-party suppliers to supply our core ingredients and packaging and a limited number of contract manufacturers to manufacture our products.

The core ingredients used in manufacturing our products include soy, nuts, dairy, protein, fiber and cocoa. We rely on a limited number of third-party suppliers to provide these core ingredients, a portion of which are international companies. There may be a limited market supply of any of these core ingredients. Any disruption in supply could materially and adversely affect our business, particularly our profitability and margins. Events that adversely affect our suppliers could impair our ability to obtain core ingredient inventories in the quantities desired. Such events include problems with our suppliers' businesses, finances, labor relations, sustainability concerns, evolving applicable environmental regulations, ability to import core ingredients, delays in imported core ingredients being processed through local customs, costs, production, insurance, reputation and weather conditions during growing, harvesting or shipping, including flood, drought, frost and earthquakes, man-made disasters or other catastrophic occurrences, and geopolitical events such as the conflict between Ukraine and Russia.

Our financial performance depends largely on our ability to purchase core ingredients and packaging in sufficient quantities at competitive prices. We may not have continued supply, pricing or exclusive access to core ingredients and packaging from these sources. Any of our suppliers could discontinue or seek to alter their relationships with us. We may be adversely affected by increased demand for our specific core ingredients, a reduction in overall supply of required core ingredients, suppliers raising their prices, and increases in the cost of packaging and distributing core ingredients. Additionally, we may be adversely affected if suppliers stop selling to us or enter into arrangements that impair their abilities to provide us with core ingredients and packaging.

We rely on a limited number of contract manufacturers to manufacture our products. If any of these manufacturers:

- experience adverse effects on their businesses, including an inability to fulfill their labor or other human capital needs;
- cannot continue manufacturing our products at required levels, on a timely basis, or at all; or
- choose to cancel or not renew our contract with them to manufacture our products;

we may be forced to seek other manufacturers. We may not be able to identify and qualify new manufacturers promptly that could allocate sufficient capacity to meet our requirements, which could adversely affect our ability to make timely deliveries of products. Furthermore, we may be unable to negotiate pricing or other terms with existing or new manufacturers as favorable as what we currently enjoy. In addition, there is no guarantee a new manufacturing partner could accurately replicate the production process and taste profile of the existing products. In addition, from time to time we determine to select new contract manufacturers to replace existing manufacturers to produce our products. If the transition to a new manufacturer is delayed or we experience product quality or other production issues during the transition to the new manufacturer, our business may be negatively affected until these issues are resolved.

Our contract manufacturers also independently contract for and obtain certain ingredients and packaging for our products. If we or our contract manufactures cannot obtain certain ingredients or packaging in the required amounts or at all, their ability to manufacture our products could be adversely affected. It could take a significant period of time to locate and qualify such alternative production sources or alternative ingredients or packaging, which could materially and adversely affect our business.

If having our products available for consumer purchase through our retail customers is disrupted as a result of an inability to obtain ingredients or packaging, labor challenges at our logistics providers or our contract manufacturers, or if our customers experience delays in stocking our products in their locations, we will experience a reduction in sales at retail and our results of operations could be material and adversely affected.

We are subject to risks associated with protection of our trade secrets by our third-party contract manufacturers. If our contract manufacturers fail to protect our trade secrets, either intentionally or unintentionally, our business, financial condition and results of operations could be materially and adversely affected. If we experience significant increased demand for our products, or need to replace an existing supplier or manufacturer, additional supplies of core ingredients or manufacturers may not be available when required, on acceptable terms, or at all. Suppliers may not allocate sufficient capacity to meet our requirements, fill our orders promptly or meet our strict quality standards. Even if our existing suppliers and manufacturers can expand their capacities to meet our needs, or we can find new sources of core ingredients or new contract manufacturers, we may encounter delays in production, inconsistencies in quality and added costs. We may not be able to pass increased costs onto the consumer immediately, if at all, which may decrease or eliminate our profitability. Any manufacturing and/or supply disruptions or cost increases could have an adverse effect on our ability to meet consumer demand for our products and result in lower net sales and profitability, both in the short and long-term.

We rely in large part on our third-party contract manufacturers to maintain the quality of our products. The failure or inability of contract manufacturers to comply with the specifications and requirements of our products could cause product recalls, which could materially and adversely affect our reputation and subject us to significant liability should the consumption of any of our products cause or be claimed to cause illness or injury. Our products implicate risks such as product contamination, spoilage, product tampering, other adulteration, mislabeling and misbranding. We also license certain products that contain our brands and logos, but which are produced and distributed exclusively by third parties of whom we have limited control. In addition, we do not own our warehouse facilities, but they are managed for us by a third party.

Under certain circumstances, we may be required to, or may voluntarily, recall or withdraw products. For example, in 2016, as part of a larger national recall by several other food companies, we incurred losses, including recalled product because of potential contamination from an ingredient supplied to one of our third-party manufacturers at their manufacturing center. While the contamination did not result in any consumer illness, and we were indemnified for a substantial portion of our direct product loss, the recall may have damaged the reputation for the brand. A widespread recall or withdrawal of any of ours or licensed products may negatively and significantly affect our sales and profitability and could cause significant losses depending on the costs of the recall, destruction of product inventory, reduction in product availability, and reaction of competitors and consumers.

We may be subject to claims or lawsuits, including class actions lawsuits (which could significantly increase any adverse settlements or rulings) or judgments, resulting in liability for actual or claimed injuries, illness or death. Any of these events could materially and adversely affect our business, financial condition and results of operations. Whether or not a product liability claim or lawsuit is unsuccessful or is not fully pursued, the negative publicity surrounding any assertion that our products caused illness or injury could adversely affect our reputation with existing and potential consumers and our corporate and brand image. Moreover, claims or liabilities of this sort might not be covered by our insurance or by any rights of indemnity or contribution we may have against others. We maintain product liability insurance in an amount we believe to be adequate. However, we may incur claims or liabilities for which we are not insured or that exceed our insurance coverage. A product liability judgment against us or a product recall could materially and adversely affect our business, financial condition and results of operations.

Severe weather conditions, natural disasters such as fires, floods, droughts, hurricanes, earthquakes and tornadoes, government regulation related to climate change, and the effects of climate change and geopolitical events can affect crop supplies, and supply chain infrastructure, and negatively affect the operating results of our business.

Severe weather conditions and natural disasters, such as fires, floods, droughts, frosts, hurricanes, earthquakes, tornadoes, insect infestations and plant disease, and geopolitical events may affect the supply of core ingredients and packaging used to make and protect food products or may prevent the manufacturing or distribution of food products by third parties. In addition, a number of these weather conditions could become even more severe over time as a result of the effects of climate change. Competing manufacturers might be affected differently by weather conditions, natural disasters, and geopolitical events depending on the location of their sources of supplies and manufacturing or distribution facilities. If supplies of core ingredients and packaging available to us are reduced, we may not be able to find enough supplemental supply sources on favorable terms, which could materially and adversely affect our business, financial condition and results of operations. In addition, because we rely on few contract manufacturers for a majority of our manufacturing needs and because our distribution warehouses are all in a similar geographic location, adverse weather conditions could affect the ability for those third-party operators to manufacture, store or move our products.

We intend to grow through mergers and acquisitions or joint ventures, and we may not successfully integrate, operate or realize the anticipated benefits of such business combinations.

As part of our strategic initiatives, we intend to pursue mergers and acquisitions or joint ventures. Our acquisition strategy is based on identifying and acquiring brands with products that complement our existing products and identifying and acquiring brands in new categories and new geographies to expand our platform of nutritional snacks and potentially other food products. Although we regularly evaluate multiple acquisition candidates, we cannot be certain that we can successfully identify suitable acquisition candidates, negotiate acquisitions of identified candidates on favorable terms, or integrate acquisitions we complete.

Acquisitions involve numerous risks and uncertainties, including intense competition for suitable acquisition targets, which could increase target prices and/or materially and adversely affect our ability to consummate deals on favorable terms, the potential unavailability of financial resources necessary to consummate acquisitions, the risk we improperly value and price a target, the potential inability to identify all of the risks and liabilities inherent in a target company or assets notwithstanding our diligence efforts, the diversion of management's attention from the day-to-day operations of our business and additional strain on our existing personnel, increased leverage resulting from the additional debt financing that may be required to complete an acquisition, dilution of our net current book value per share if we issue additional equity securities to finance an acquisition, difficulties in identifying suitable acquisition targets or in completing any transactions identified on sufficiently favorable terms and the need to obtain regulatory or other governmental approvals that may be necessary to complete acquisitions.

Any future acquisitions may pose risks associated with entry into new geographic markets, including outside the United States and our current international markets, distribution channels, lines of business or product categories, where we may not have significant prior experience and where we may not be as successful or profitable as we are in businesses and geographic regions where we have greater familiarity and brand recognition. Potential acquisitions may entail significant transaction costs and require significant management time and distraction from our core business, even where we cannot consummate or decide not to pursue a particular transaction.

Besides the risks above, even when acquisitions are completed, integration of acquired entities can involve significant difficulties. These include failure to achieve financial or operating objectives regarding an acquisition, systems, operational and managerial controls and procedures, the need to modify systems or to add management resources, difficulties in the integration and retention of consumers or personnel and the integration and effective deployment of operations or technologies, amortization of acquired assets (which would reduce future reported earnings), possible adverse short-term effects on cash flows or operating results, integrating personnel with diverse backgrounds and organizational cultures, coordinating sales and marketing functions and failure to obtain and retain key personnel of an acquired business. Failure to manage these acquisition growth risks could have an adverse effect on our business.

Our insurance policies may not provide adequate levels of coverage against claims.

We believe that we maintain insurance policies customary for businesses of our size and type. However, there are losses we may incur that cannot be insured against or that we believe are not economically reasonable to insure. Such losses could have a material adverse effect on our business, financial condition and results of operations.

Loss of our key executive officers or other personnel, or an inability to attract and retain such management and other personnel, could negatively affect our business.

Our future success depends to a significant degree on the skills, experience and efforts of our key executive officers and the strength of our talent positions throughout the organization. The sudden loss of key personnel or our failure to appropriately plan for any expected key executive succession, including for our president and chief executive officer whose employment agreement expires in July 2023, could materially and adversely affect our business and prospects, as we may not be able to find suitable individuals to replace them on a timely basis, if at all. Additionally, we also depend on our ability to attract and retain qualified personnel to operate and expand our business. If we fail to attract talented new employees, our business and results of operations could be negatively affected.

We may not be able to adequately protect our intellectual property and other proprietary rights that are material to our business.

Our ability to compete effectively depends in part upon protection of our rights in trademarks, trade dress, copyrights and other intellectual property rights we own or license. Our use of contractual provisions, confidentiality procedures and agreements, and trademark, copyright, unfair competition, trade secret and other laws to protect our intellectual property and other proprietary rights may not be adequate. We may not be able to preclude third parties from using our intellectual property regarding food or beverage products and may not be able to leverage our branding beyond our current product offerings. In addition, our trademark or other intellectual property applications may not always be granted. Third parties may oppose our intellectual property applications, or otherwise challenge our use of trademarks or other intellectual property. Third parties may infringe, misappropriate, or otherwise violate our intellectual property. Changes in applicable laws could lessen or remove the current legal protections available for intellectual property. Any legal action we may bring to protect our brand and other intellectual property could be unsuccessful, result in substantial costs and could divert management's attention from other business concerns. A successful claim of trademark, copyright or other intellectual property infringement, misappropriation, or other violation against us could prevent us from providing our products or services or could require us to redesign or rebrand our products or packaging if we cannot license such third-party intellectual property on reasonable terms. Certain of our intellectual property licenses have fixed terms, and even for those that do not, we cannot guarantee all our intellectual property licenses will remain in effect indefinitely. Termination or breaches of intellectual property licenses granted by or to us could cause the loss of profits generated under such licenses. Any of the foregoing outcomes could materially and adversely harm our business, financial condition or results of our operations.

Any inadequacy, failure or interruption of our information technology systems may harm our ability to effectively operate our business, and our business is subject to online security risks, including security breaches and identity theft.

We rely heavily on information systems for management of our supply chain, inventory, payment of obligations, collection of cash, human capital management, financial tools and other business processes and procedures. Our ability to efficiently and effectively manage our business functions depends significantly on the reliability and capacity of these systems. Our operations depend upon our ability to protect our computer equipment and systems against damage from physical theft, fire, power loss and outages, telecommunications failure or other catastrophic events and from internal and external security breaches, viruses and other disruptive problems. The failure of these systems to operate effectively, whether from maintenance problems, upgrading or transitioning to new platforms, or a breach in security of these systems, could result in interruptions or delays in our operations, reduce efficiency or negatively affect our operations. If our information technology systems fail and our redundant systems or disaster recovery plans are not adequate to address such failures, or if our business interruption or cyber-security insurance does not sufficiently compensate us for any losses that we may incur, our revenue and profits could be reduced, and the reputation of our brand and our business could be materially adversely affected. In addition, remediation of any problems with our systems could result in significant, unplanned expenses.

We have instituted controls, including information system governance controls that are intended to protect our computer systems and our information technology systems and networks. We also have business continuity plans that attempt to anticipate and mitigate failures. However, we cannot control or prevent every potential technology failure, adverse environmental event, third-party service interruption or cybersecurity risk.

Unauthorized users who penetrate our information security systems could misappropriate proprietary, employee, or consumer information. As a result, it may become necessary to expend additional amounts of capital and resources to protect against, or to alleviate, problems caused by unauthorized access. Data security breaches could cause damaged reputation with consumers and reduced demand for our products. Additional expenditures may not prove to be a timely remedy against breaches by unauthorized users who are able to penetrate our information security. Besides purposeful security breaches, the inadvertent transmission of computer viruses could adversely affect our computer systems and, in turn, harm our business.

We increasingly rely on cloud computing and other technologies that result in third parties holding significant amounts of customer, consumer or employee information on our behalf. There has been an increase over the past several years in the frequency and sophistication of attempts to compromise the security of these types of systems. If the security and information systems that we or our outsourced third-party providers use to store or process such information are compromised or if we, or such third parties, otherwise fail to comply with applicable laws and regulations, we could face litigation and the imposition of penalties that could adversely affect our financial performance. Our reputation as a brand or as an employer could also be adversely affected by these types of security breaches or regulatory violations, which could impair our ability to attract and retain qualified employees.

A significant number of states require that consumers be notified if a security breach results in disclosing their personal financial account or other information. Additional states and governmental entities are considering such “notice” laws. In addition, other public disclosure laws may require that material security breaches be reported. If we experience a security breach, and such notice or public disclosure is required in the future, our reputation and our business may be harmed.

Except for limited information voluntarily submitted by users of our website, we typically do not collect or store consumer data or personal information. However, third-party providers, including our licensees, contract manufacturers, e-commerce contractors and third-party sellers may do so. The website operations of such third parties may be affected by reliance on other third-party hardware and software providers, technology changes, risks related to the failure of computer systems through which these website operations are conducted, telecommunications failures, data security breaches and similar disruptions.

If we or our third-party providers fail to maintain or protect our respective information technology systems and data integrity effectively, fail to implement new systems, update or expand existing systems, or fail to anticipate, plan for or manage significant disruptions to or compromises of systems involved in our operations, we could:

- lose existing customers;
- have difficulty preventing, detecting, and controlling fraud;
- have disputes with customers, suppliers, distributors or others;
- be subject to regulatory sanctions, including sanctions stemming from violations of the Health Insurance Portability and Accountability Act of 1996;
- suffer reputational harm, and
- incur unexpected costs to remediate any unauthorized access of our systems and implement protective measures against future attacks.

As a result of these possible outcomes we could incur increases in operating expenses and our results of operations could be materially and adversely affected. While we maintain insurance against losses related to unauthorized access to our systems, there can be no assurance our level of coverage will be sufficient to address the losses we sustain.

Regulatory Risks and Litigation Risks

All of our products must comply with federal, state and local regulations. Any non-compliance with the FDA, USDA or other applicable regulations could harm our business.

Our products must comply with various rules and regulations, including those regarding product manufacturing, food safety, required testing and appropriate labeling of our products. The FDA has not defined nutrient content claims regarding low-carbohydrates, but has not objected to using net carbohydrate information on food labels if the label adequately explains how the term is used so it would not be false or misleading to consumers. The FDA requires all carbohydrates per serving to be listed on the Nutrition Facts Panel (“NFP”) of a package. Besides the information on the NFP, we use the term “net carbohydrate” (or “net carbs”) on our existing product packaging to assist consumers in tracking the carbohydrates in that serving of food that effect their blood sugar (glucose) levels. We determine the number of net carbs in a serving by subtracting fiber, and sugar alcohols if any, from the total carbohydrates listed on the NFP. It is possible that FDA regulations and/or their interpretations may materially change related to, for example, definitions of certain of our core ingredients, such as fiber, labeling requirements for describing other ingredients or nutrients, such as sugar alcohols or protein, or disclosures of any ingredient labeled as genetically modified (“GMO”). As such, there is a risk that our products could become non-compliant with the FDA’s regulations, and any such non-compliance could harm our business.

In addition, if FDA or other regulations restrict us from labeling and marketing certain ingredients or product attributes, such as fiber or “net carb” count, we may not effectively reach our target demographics, promote what we believe to be the benefits of our products or communicate that our products are composed of what we consider to be low-carb, low-sugar and protein-rich ingredients.

We must rely on the contract manufacturers we engage to produce our products to maintain compliance with applicable regulatory requirements. Although we require our contract manufacturers to be compliant with regulatory requirements, we do not have direct control over such facilities. Failure of our contract manufacturers to comply with applicable regulation could have a material and adverse effect on our ability to sell our products to our customers and our results of operations.

Conflicts between state and federal law regarding definitions of our core ingredients, and labeling requirements, may lead to non-compliance with state and local regulations. For example, certain states may maintain narrower definitions of certain ingredients, and more stringent labeling requirements, of which we are unaware. Any non-compliance at the state or local level could materially and adversely affect our business, financial condition and results of operations.

Our advertising is regulated for accuracy, and if our advertising is determined to be false or misleading, we may face fines or sanctions.

Our advertising is subject to regulation by the FTC under the Federal Trade Commission Act, which prohibits dissemination of false or misleading advertising. In addition, the National Advertising Division of the Council of Better Business Bureaus, Inc., which we refer to as NAD, administers a self-regulatory program of the advertising industry to ensure truth and accuracy in national advertising. NAD both monitors national advertising and entertains inquiries and challenges from competing companies and consumers. Should our advertising be determined to be false or misleading, we may have to pay damages, revise or withdraw our campaign and possibly face fines or sanctions, which could have a material adverse effect on our sales and operating results.

Changes in the legal and regulatory environment could limit our business activities, increase our operating costs, reduce demand for our products or result in litigation.

Elements of our business, including the production, storage, distribution, sale, display, advertising, marketing, labeling, health and safety practices, transportation and use of many of our products, are subject to various laws and regulations administered by federal, state and local governmental agencies in the United States, and the laws and regulations administered by government entities and agencies outside the United States in markets in which our products or components thereof, such as core ingredients and packaging, may be made, manufactured or sold. These laws, regulations and interpretations thereof may change, sometimes dramatically, because of a variety of factors, including political, economic or social events. Such factors may include changes in:

- food and drug laws (including FDA regulations);
- laws related to product labeling, advertising and marketing practices;
- laws and programs restricting the sale and advertising of certain of our products;
- laws and programs aimed at reducing, restricting or eliminating ingredients present in certain of our products;
- laws and programs aimed at reducing, restricting or eliminating ingredients or packaging present in certain of our products to meet government objectives to combat climate change or certain labor practices;
- laws and programs aimed at discouraging the consumption of products or ingredients or altering the package or portion size of certain of our products;
- state consumer protection and disclosure laws;
- taxation requirements, including the imposition or proposed imposition of new or increased taxes or other limitations on the sale of our products; competition laws;
- anti-corruption laws, including the U.S. Foreign Corrupt Practices Act of 1977, as amended (the “FCPA”), and the UK Bribery Act of 2010 (the “Bribery Act”);
- economic sanctions and anti-boycott laws, including laws administered by the U.S. Department of Treasury, Office of Foreign Assets Control (“OFAC”) and the European Union (“EU”);
- laws relating to export, re-export, transfer, tariffs and import controls, including the Export Administration Regulations, the EU Dual Use Regulation and the customs and import laws administered by the U.S. Customs and Border Protection and other local governments where our contract manufacturers are located;
- employment laws;
- privacy laws;
- laws regulating the price we may charge for our products;
- regulatory requirements from any required disclosures related to climate change; and
- farming and environmental laws.

New laws, regulations or governmental policies and their related interpretations, or changes in any of the foregoing, including taxes, tariffs or other limitations on the sale of our products, ingredients in our products or commodities used in the production of our products, may alter the environment in which we do business and, therefore, may affect our operating results or increase our costs or liabilities. In addition, if we fail to adhere to such laws and regulations, we could be subject to regulatory investigations, civil or criminal sanctions, and class action litigation, which has increased in the industry in recent years.

Litigation or legal proceedings could expose us to significant liabilities and have a negative effect on our reputation.

Occasionally, we may defend against various claims and litigation. We evaluate these claims and litigation, assess the likelihood of unfavorable outcomes, and estimate, if possible, potential losses when appropriate. We may establish reserves, as appropriate based on the information available to management at the time. These assessments and estimates involve a significant amount of management judgment and may differ materially from actual outcomes.

There is an additional risk that potential litigation may lead to adverse publicity, consumer confusion, distrust and additional legal challenges for us. Should we become subject to related or additional unforeseen lawsuits, including claims related to our products, labeling or advertising, which may vary under state and federal rules and regulations, consumers may avoid purchasing our products or seek alternative products, even if the basis for the claims against us is unfounded.

Risks Related to our Capital Structure

Our indebtedness could materially and adversely affect our financial condition and ability to operate our company, and we may incur additional debt.

As of August 27, 2022, we had approximately \$406.5 million in outstanding term loan indebtedness and a revolving credit facility with availability of up to \$75 million with no amounts drawn on that revolving credit facility. Our current and future debt level and the terms of our debt arrangements could materially and adversely affect our financial condition and limit our ability to successfully implement our growth strategies. In addition, under the credit facilities governing our indebtedness, we have granted the lenders a security interest in substantially all of our assets, including the assets of our subsidiaries and an affiliate.

Our ability to meet our debt service obligations will depend on our future performance, which will be affected by the other risk factors described herein. If we do not generate enough cash flow to pay our debt service obligations, we may have to refinance all or part of our existing debt, sell our assets, borrow more money or raise equity. We may not be able to take any of these actions timely, on terms satisfactory to us, or at all.

The credit facilities governing our debt arrangements contain financial and other covenants.

The credit facilities governing our existing debt arrangements contain certain financial and other covenants. Our revolving credit facility has a maximum total net leverage ratio equal to or less than 6.00:1.00 contingent on credit extensions in excess of 30% of the total amount of commitments available under the revolving credit facility, and limitations on our ability to, among other things, incur and/or undertake asset sales and other dispositions, liens, indebtedness, certain acquisitions and investments, consolidations, mergers, reorganizations and other fundamental changes, payment of dividends and other distributions to equity and warrant holders, and prepayments of material subordinated debt, in each case, subject to customary exceptions materially consistent with credit facilities of such type and size. Any failure to comply with the restrictions of the credit facilities may cause an event of default. The credit facilities governing our existing debt arrangements bear interest at variable rates. If market interest rates increase, variable rate debt will create higher debt service requirements, which could materially and adversely affect our cash flow.

Changes in interest rates may adversely affect our earnings and cash flows.

Our indebtedness under our revolving credit facility bears interest at variable interest rates that use the Secured Overnight Financing Rate (“SOFR”) as a benchmark rate. SOFR is calculated based on short-term repurchase agreements, backed by Treasury securities. SOFR is observed and backward looking, which stands in contrast with the London Inter-Bank Offered Rate (“LIBOR”) under the previous methodology, which is an estimated forward-looking rate and relies, to some degree, on the expert judgment of submitting panel members. Given that SOFR is a secured rate backed by government securities, it is a rate that does not take into account bank credit risk, as was the case with LIBOR. SOFR is therefore likely to be lower than LIBOR and is less likely to correlate with the funding costs of financial institutions. Because of these and other differences, there is no assurance that SOFR will perform in the same way as LIBOR would have performed at any time, and there is no guarantee that it is a comparable substitute for LIBOR. Whether or not SOFR attains market traction as a LIBOR replacement tool remains in question.

At this time, it is not possible to predict the effect of any establishment of alternative reference rates or any other reforms that may be enacted in the United Kingdom or elsewhere. Uncertainty as to the nature of such potential changes, alternative reference rates, including SOFR, or other reforms may adversely affect the trading market for LIBOR- or SOFR-based securities, including ours. As a result, our interest expense may increase, our ability to refinance some or all of our existing indebtedness may be affected, and our available cash flow may be adversely affected.

We may need additional capital in the future, and it may not be available on acceptable terms or at all.

We have historically relied upon cash generated by our operations to fund our operations and strategy. We may also need to access the debt and equity capital markets, however, these sources of financing may not be available on acceptable terms, or at all. Our ability to obtain additional financing will be subject to several factors, including market conditions, our operating performance, investor sentiment and our ability to incur additional debt in compliance with agreements governing our outstanding debt. These factors may make the timing, amount, terms or conditions of additional financing unattractive to us. If we cannot generate sufficient funds from operations or raise additional capital, our growth could be impeded.

We have incurred and will continue to incur significant costs because of operating as a public company, and our management has been and will continue to be required to devote substantial time to compliance efforts.

We have incurred and expect to continue to incur significant legal, accounting, insurance and other expenses because of being a public company. The Dodd-Frank Wall Street Reform and Customer Protection Act (the “Dodd-Frank Act”) and the Sarbanes-Oxley Act of 2002 (the “Sarbanes-Oxley Act”), and related rules implemented by the SEC, have required changes in corporate governance practices of public companies. In addition, rules that the SEC is implementing or is required to implement pursuant to the Dodd-Frank Act are expected to require additional changes. Compliance with these and other similar laws, rules and regulations, including compliance with Section 404 of the Sarbanes-Oxley Act (“Section 404”), has and will continue to substantially increase expense, including our legal and accounting costs, and make some activities more time-consuming and costly. We may be unable to hire, train or retain necessary staff and may be reliant on engaging outside consultants or professionals, which could adversely affect our business if our internal infrastructure is inadequate to fulfill our public company obligations. These laws, rules and regulations could also make it more expensive for us to obtain director and officer liability insurance and we may be forced to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. These laws and regulations could also make it more difficult for us to attract and retain qualified persons to serve on our board of directors, our board committees or as our executive officers.

In addition, more investors and other market professionals are expecting more detailed environmental, social and governance or ESG reporting from public companies of our size that are currently produced by public companies with human and financial resources that are greater than ours. Furthermore, the SEC has proposed rule changes that would require registrants to include certain climate-related disclosures, including greenhouse gas emission data with third-party attestation and climate-related financial statement metrics in a note to their audited financial statements. These SEC proposals related to the enhancement and standardization of climate-related disclosures may require us to change our accounting policies, to alter our operational policies and to implement new or enhance existing systems so that they reflect new or amended financial reporting standards, or to restate our published financial statements. Such changes may have an adverse effect on our business, financial position and operating results, or cause an adverse deviation from our revenue and operating profit targets, which may negatively affect our financial results.

As a result, we expect to incur additional expenses to meet these reporting expectations as well as any climate related reporting mandated in the future by government regulations.

If we cannot implement appropriate systems, procedures and controls, we may not be able to successfully procure, offer or ship our products, grow our business and account for transactions in an appropriate and timely manner.

Our ability to successfully offer our products, grow our business and account for transactions in an appropriate and timely manner requires an effective planning and management process and certain other automated management and accounting systems. We recently implemented an integrated enterprise resource planning system and certain other automated management and accounting systems. We periodically update our operations and financial systems, procedures and controls; however, we still rely on certain manual processes and procedures that may not scale proportionately with our business growth. Our systems will continue to require automation, modifications and improvements to respond to current and future changes in our business. Failure to implement promptly appropriate internal systems, procedures and controls could materially and adversely affect our business, financial condition and results of operations.

If we do not maintain effective internal control over financial reporting, we may not be able to accurately report our financial results in a timely manner or prevent fraud, which may adversely affect investor confidence in our financial reporting and adversely affect our business and operating results and the market price for our common stock.

Effective internal control over financial reporting is necessary for us to provide reliable financial reports. In May 2021 we identified a material weakness in our internal control over financial reporting. In the future, we may discover areas of our internal control over financial reporting that need improvement. In addition, our internal financial and accounting team is leanly staffed, which can lead to inefficiencies regarding segregation of duties. If we fail to properly and efficiently maintain an effective internal control over financial reporting, we could fail to report our financial results accurately.

On April 12, 2021, the staff of the SEC issued a staff statement (the “SEC Statement”) on the accounting and reporting considerations for warrants issued by special purpose acquisition companies (“SPACs”). Specifically, the SEC Statement focused in part on provisions in warrant agreements that provide for potential changes to the settlement amounts dependent upon the characteristics of the warrant holder. Following consideration of the guidance in the SEC Statement, we concluded that our warrants issued through private placement (the “Private Warrants”) should be classified as a liability and measured at fair value, with changes in fair value each period reported in earnings. As a result, on May 13, 2021, management and the audit committee of our board of directors determined that our previously issued fiscal quarterly and year-to-date unaudited consolidated financial statements for November 28, 2020 and February 27, 2021 included and our audited consolidated financial statements for the fiscal years ending August 29, 2020, August 31, 2019 and August 25, 2018 should no longer be relied upon and would need to be restated. As part of the restatement process, we identified a material weakness in our internal control over financial reporting related to the determination of the appropriate accounting and classification of our Private Warrants. This material weakness was fully remediated with the filing of restated financial statements with the SEC for the required affected periods.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of a company’s annual or interim financial statements will not be prevented or detected on a timely basis. Effective internal controls are necessary for us to provide reliable financial reports and prevent fraud. We developed and implemented a remediation plan to address the material weakness related to the accounting for warrants. These remediation measures may from time to time be time consuming and costly and there is no assurance that the remedial measures we have taken to date, or any remedial measures we may take in the future, will be sufficient to avoid potential future material weaknesses. The material weakness will not be considered remediated until a sustained period of time has passed to allow management to test the design and operational effectiveness of the corrective actions.

We may identify new material weaknesses in the future, which could limit our ability to prevent or detect a material misstatement of our annual or interim financial statements. The occurrence of, or failure to remediate, the material weakness we have identified or any other material weakness could result in our failure to maintain compliance with legal requirements, including Section 404 of the Sarbanes-Oxley Act and rules regarding timely filing of periodic reports, in addition to applicable stock exchange listing requirements, could cause investors to lose confidence in our financial reporting and could have an adverse effect on our the market price of our common stock.

The restatement of certain of our financial statements subjected us to increased costs and may subject us to additional risks and uncertainties, including the increased possibility of legal proceedings.

On April 12, 2021, the staff of the SEC issued the SEC Statement on the accounting and reporting considerations for warrants issued by SPACs. Specifically, the SEC Statement focused in part on provisions in warrant agreements that provide for potential changes to the settlement amounts dependent upon the characteristics of the warrant holder. Following consideration of the guidance in the SEC Statement, we concluded that our Private Warrants should be classified as a liability and measured at fair value, with changes in fair value each period reported in earnings. As a result, on May 13, 2021, management and the audit committee of our board of directors determined that our previously issued fiscal quarterly and year-to-date unaudited consolidated financial statements for November 28, 2020 and February 27, 2021 and our audited consolidated financial statements for the fiscal years ending August 29, 2020, August 31, 2019 and August 25, 2018 should no longer be relied upon and would need to be restated. In addition, we determined that related press releases, earnings releases, and investor communications describing our financial statements for these periods should no longer be relied upon. The errors identified are non-cash and related to our classification of our Private Warrants. Accordingly, we restated the annual, quarterly and year-to-date audited and unaudited consolidated financial statements for these periods.

In connection with the restatement, we identified a material weakness in our internal controls over financial reporting related to the determination of the appropriate accounting and classification of our Private Warrants. As a result of that material weakness, the restatement, the change in accounting for our Private Warrants, and other matters raised or that may in the future be raised by the SEC, we incurred increased accounting and legal costs and may become subject to additional risks and uncertainties, including, among others, the increased possibility of legal proceedings or a review by the SEC and other regulatory bodies. The costs of defending against such legal proceedings or administrative actions could be significant. In addition, we could face monetary judgments, penalties or other sanctions that could have a material adverse effect on our business, results of operations and financial condition and could have an adverse effect on the market price of our common stock. This material weakness was fully remediated with the filing of restated financial statements with the SEC for the required affected periods.

Our only significant asset is ownership of 100% of Atkins Intermediate Holdings, LLC and such ownership may not be sufficient to pay dividends or make distributions or loans to enable us to pay any dividends on our common stock or satisfy our other financial obligations.

We have no direct operations and no significant assets other than the direct ownership of 100% of Atkins Intermediate Holdings, LLC. We currently depend on Atkins Intermediate Holdings, LLC for distributions, loans and other payments to generate the funds necessary to meet our financial obligations and to pay any dividends regarding our common stock. Legal and contractual restrictions in agreements governing our debt arrangements and future indebtedness of Atkins Intermediate Holdings, LLC, and the financial condition and operating requirements of Atkins Intermediate Holdings, LLC, may limit our ability to obtain funds in a timely manner from Atkins Intermediate Holdings, LLC. The earnings from, or other available assets of, Atkins Intermediate Holdings, LLC may not be sufficient to pay dividends, make distributions or loans to enable us to pay any dividends on our common stock, or satisfy our other financial obligations.

Risks Related to our Common Stock

Our stock price may be volatile.

Our common stock is traded on the Nasdaq Capital Market (“Nasdaq”). The market price of our common stock has fluctuated in the past and could fluctuate substantially in the future, based on a variety of factors, including future announcements covering us or our key customers or competitors, government regulations, litigation, changes in earnings estimates by analysts, fluctuations in quarterly operating results or general conditions in our industry and may be exacerbated by historical limited trading volume in our common stock. Furthermore, stock prices for many companies fluctuate widely for reasons that may be unrelated to their operating results. Those fluctuations and general economic, political and market conditions, such as recessions or international currency fluctuations and demand for our services, may adversely affect the market price of our common stock.

We do not expect to declare any dividends in the foreseeable future.

We do not anticipate declaring any cash dividends to holders of our common stock in the foreseeable future. Consequently, investors may need to rely on sales of their shares of common stock after the price has appreciated, which may never occur, as the only way to realize any future gains on their investment. Investors seeking cash dividends should not purchase our common stock.

There may be future sales or other dilution of the Company’s equity, which may adversely affect the market price of our common stock.

We are not generally restricted from issuing additional shares of common stock, or any securities convertible into or exchangeable for, or that represent the right to receive, shares of common stock. Issuing any additional shares of common stock or preferred shares or securities convertible into, exchangeable for or that represent the right to receive shares of common stock or the exercise of such securities could be substantially dilutive to holders of our common stock.

The market price of our common stock could decline because of sales of our common stock made in the future or the perception that such sales could occur. Because our decision to issue securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of future offerings, if any. Thus, our stockholders bear the risk of future offerings reducing the market price of our common stock and diluting their holdings in the Company.

Anti-takeover provisions in our amended and restated certificate of incorporation and second amended and restated bylaws, and provisions of Delaware law, could impair a takeover attempt.

Our amended and restated certificate of incorporation and second amended and restated bylaws contain provisions that may discourage unsolicited takeover proposals that stockholders may consider to be in their best interests. We are also subject to anti-takeover provisions under Delaware law, which could delay or prevent a change of control. Together these provisions may make the removal of management more difficult and may discourage transactions that otherwise could involve payment of a premium over prevailing market prices for our securities. These provisions include:

- no cumulative voting in the election of directors, which limits the ability of minority stockholders to elect director candidates;
- the right of our board of directors to elect a director to fill a vacancy created by the expansion of the board of directors or the resignation, death, or removal of a director in certain circumstances, which prevents stockholders from filling vacancies on our board of directors;
- the ability of our board of directors to determine whether to issue shares of our preferred stock and to determine the price and other terms of those shares, including preferences and voting rights, without stockholder approval, which could be used to significantly dilute the ownership of a hostile acquirer;

- a prohibition on stockholder action by written consent, which forces stockholder action to be taken at an annual or special meeting of our stockholders;
- a prohibition on stockholders calling a special meeting, which forces stockholder action to be taken at an annual meeting of our stockholders or at a special meeting of our stockholders called by the chairman of the board or the chief executive officer pursuant to a resolution adopted by a majority of the board of directors;
- the requirement that a meeting of stockholders may be called only by the board of directors, which may delay the ability of our stockholders to force consideration of a proposal or to take action, including the removal of directors;
- providing that directors may be removed prior to the expiration of their terms by stockholders only for cause and upon the affirmative vote of a majority of the voting power of all outstanding shares of the combined company; and,
- advance notice procedures that stockholders must comply with in order to nominate candidates to our board of directors or to propose matters to be acted upon at a stockholders' meeting, which may discourage or deter a potential acquirer from conducting a solicitation of proxies to elect the acquirer's own slate of directors or otherwise attempting to obtain control of the Company.

Other Risks

Disruptions in the worldwide economy may materially and adversely affect our business, financial condition and results of operations.

Adverse and uncertain economic conditions, such as those caused by the inflationary environment experienced in fiscal year 2022 that is expected to continue in fiscal year 2023, geopolitical events and COVID-19, have, in the past affected, and, in the future, may affect distributor, retailer and consumer demand for our products. In addition, our ability to manage normal commercial relationships with our suppliers, contract manufacturers, distributors, retailers, consumers and creditors may suffer. Consumers may shift purchases to lower-priced or other perceived value offerings during economic downturns and periods of high inflation, making it more difficult to sell our premium products. Due to the relative costs of our products, during economic downturns and periods of high inflation, it may be more difficult to convince consumers to switch to or continue to use our brands or convince new users to choose our brands without expensive sampling programs and price promotions. In addition, consumers may choose to purchase private-label products rather than branded products because they are generally less expensive. Distributors and retailers may become more conservative in their ordering in response to these conditions and seek to reduce their inventories. Our results of operations depend on, among other things, our ability to maintain and increase sales volume with our existing distributors and retailers, to attract new consumers and to provide products that appeal to consumers at prices they are willing and able to pay. Prolonged unfavorable economic conditions may have an adverse effect on our sales and profitability.

Our international operations expose us to regulatory, economic, political and social risks in the countries in which we operate.

The international nature of our operations involves several risks, including changes in U.S. and foreign regulations, tariffs, taxes and exchange controls, economic downturns, inflation and political and social instability in the countries in which we operate and our dependence on foreign personnel. Moreover, although our products in our foreign operations typically mirror those in the United States, consumers outside the United States may have different tastes, preferences, nutritional approaches and perceptions of our brands and business operations than U.S. consumers. Our international business is small compared to our U.S. business, and as a result, our operations are more spread out which can add to our costs and limit our ability to react effectively and timely to adverse events. We cannot be certain that we can enter and successfully compete in additional foreign markets or that we can continue to compete in the foreign markets in which we currently operate.

Doing business outside the United States requires us to comply with the laws and regulations of the U.S. government and various foreign jurisdictions, which place restrictions on our operations, trade practices, partners and investment decisions. In particular, our operations are subject to U.S. and foreign anti-corruption and trade control laws and regulations, such as the FCPA or the Bribery Act, export controls and economic sanctions programs, including those administered by the OFAC and the EU. Because of doing business in foreign countries and with foreign partners, we are exposed to a heightened risk of violating anti-corruption and trade control laws and sanctions regulations. The FCPA prohibits us from providing anything of value to foreign officials for the purposes of obtaining or retaining business or securing any improper business advantage. In addition, the Bribery Act extends beyond bribery of foreign public officials and also applies to transactions with private persons. The provisions of the Bribery Act are also more onerous than the FCPA in several other respects, including jurisdictional reach, non-exemption of facilitation payments and, potentially, penalties.

Our continued expansion outside the United States, including in developing countries, and our development of new partnerships and joint venture relationships worldwide, could increase the risk of FCPA, OFAC, Bribery Act or EU sanctions violations in the future. Violations of anti-corruption and trade control laws and sanctions regulations may cause reputational damage and are punishable by civil penalties, including fines, denial of export privileges, injunctions, asset seizures, debarment from government contracts and revocations or restrictions of licenses, and criminal fines and imprisonment.

Finally, our business could be negatively affected by changes in the U.S. and Canadian political environments, in particular. We operate primarily in the U.S. and Canada and we ship a large number of products between the U.S. and Canada. Adverse changes to trade agreements, import or export regulations, customs duties or tariffs by either or both governments may have a negative effect on our business, financial conditions and results of operations.

Our international operations expose us to fluctuations in exchange rates, which may materially and adversely affect our operating results.

We source large quantities of our core ingredients from foreign suppliers, and as a result, any material upward movement in foreign exchange rates relative to the U.S. dollar will adversely affect our profitability. Furthermore, the substantial majority of our revenue is generated domestically, while a substantial portion of our third-party manufacturing is completed in Canada. Any U.S. dollar weakness may therefore materially and adversely affect revenue and cash flows while also increasing supply and manufacturing costs.

Our amended and restated certificate of incorporation provides that, to the extent allowed by law, the doctrine of “corporate opportunity” does not apply with respect to the directors, officers, employees or representatives of Conyers Park Sponsor, LLC (“Conyers Park Sponsor”) Centerview Capital Holdings LLC (“Centerview Capital”) and Centerview Partners and their respective affiliates, excepted as provided below.

The doctrine of corporate opportunity generally provides that a corporate fiduciary may not develop an opportunity using corporate resources, acquire an interest adverse to that of the corporation or acquire property that is reasonably incident to the present or prospective business of the corporation or in which the corporation has a present or expectancy interest, unless that opportunity is first presented to the corporation and the corporation chooses not to pursue that opportunity. The doctrine of corporate opportunity is intended to preclude officers, directors or other fiduciaries from personally benefiting from opportunities that belong to the corporation. Our amended and restated certificate of incorporation provides that, to the extent allowed by law, the doctrine of “corporate opportunity” does not apply with respect to the directors, officers, employees or representatives of Conyers Park Sponsor, Centerview Capital and Centerview Partners and their respective affiliates. The doctrine of corporate opportunity shall apply with respect to any of our directors or officers with respect to a corporate opportunity that was offered in writing to such person solely in his or her capacity as our director or officer and such opportunity is one which they are legally and contractually permitted to undertake and would otherwise be reasonable for us to pursue. Therefore, except as provided above, these parties have no duty to communicate or present corporate opportunities to us, and have the right to either hold any corporate opportunity for their (and their affiliates’) own account and benefit or to recommend, assign or otherwise transfer such corporate opportunity to persons other than us.

As a result, certain of our stockholders, directors and their respective affiliates are not prohibited from operating or investing in competing businesses. We therefore may find ourselves in competition with certain of our stockholders, directors or their respective affiliates, and we may not know of, or be able to pursue, transactions that could potentially be beneficial to us. Accordingly, we may lose a corporate opportunity or suffer competitive harm, which could negatively affect our business or prospects.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Our corporate headquarters is located at 1225 17th Street, Suite 1000, Denver, CO 80202. We lease this property, which occupies approximately 27,600 square feet. In addition, we lease or otherwise have rights to use office space and storage space in El Segundo, California, Broomfield, Colorado, Bentonville metro-area, Arkansas, and Naples, Florida. We also lease two distribution centers in Greenfield, Indiana. We utilize over 1.29 million square feet of floor space among our distribution centers.

Item 3. Legal Proceedings.

From time to time, we have been and may again become involved in legal proceedings arising in the ordinary course of our business. We are not presently a party to any litigation that we believe to be material and we are not aware of any pending or threatened litigation against us that we believe could have a material adverse effect on our business, operating results, financial condition or cash flows.

Item 4. Mine Safety Disclosures.

Not applicable.

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Market Information and Holders

Our common stock is currently quoted on the Nasdaq Capital Market under the symbol “SMPL.”

As of October 17, 2022, there were 98,993,701 shares outstanding and 20 record holders of our common stock.

Dividends

We currently do not pay dividends and have not paid any cash dividends on our common stock to date. We currently intend to retain our future earnings to finance the development and expansion of our business and as such, we do not expect to pay any cash dividends on our common stock in the foreseeable future. The payment of future dividends, if any, will be at the discretion of our Board of Directors and will depend on our financial condition, results of operations, capital requirements, restrictions contained in current and/or future financing instruments, provisions of applicable law, and any other factors our Board of Directors deems relevant.

Issuer Purchases of Equity Securities

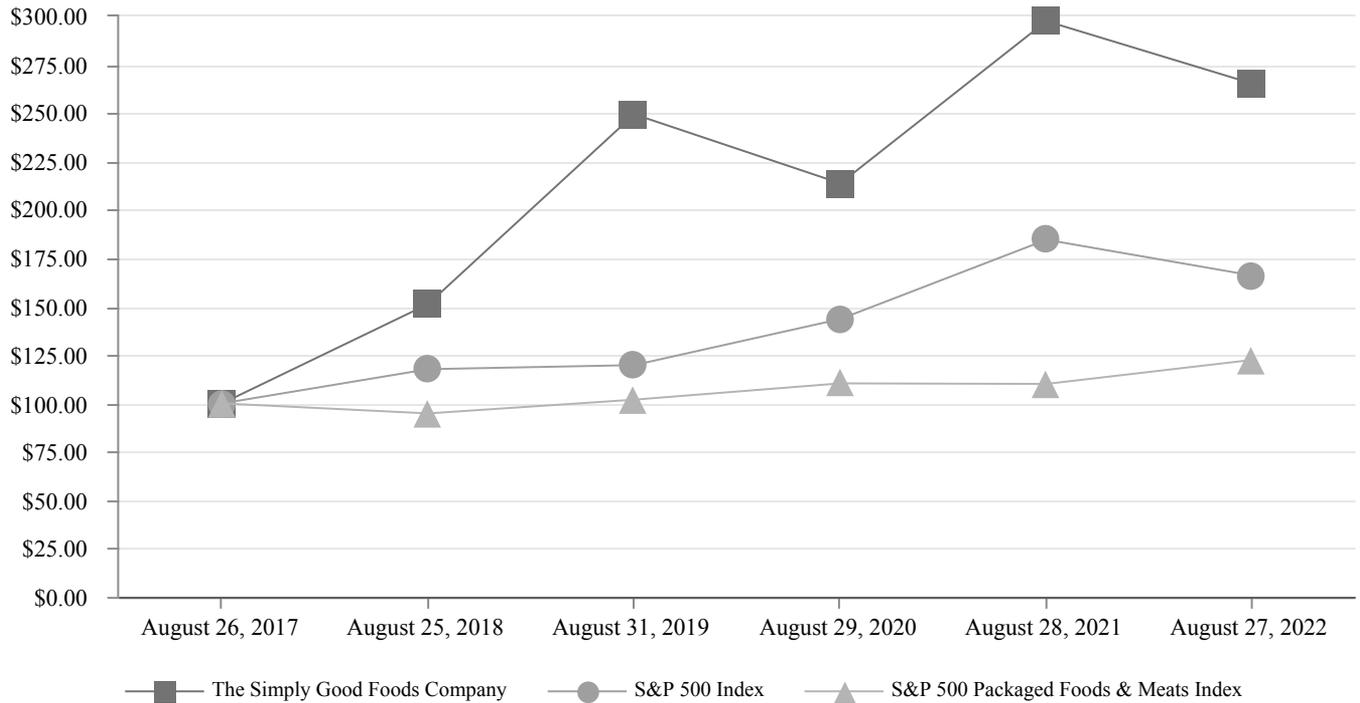

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾	Maximum Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs ⁽¹⁾
May 29, 2022 - June 25, 2022	58,638	\$ 36.80	58,638	\$ 67,191,259
June 26, 2022 - July 23, 2022	165,000	34.89	165,000	61,434,744
July 24, 2022 - August 27, 2022	707,140	33.15	707,140	37,995,160
Total	930,778	\$ 33.69	930,778	\$ 37,995,160

⁽¹⁾ We adopted a \$50.0 million stock repurchase program on November 13, 2018. On April 13, 2022, we announced that our Board of Directors had approved the addition of \$50.0 million to our stock repurchase program, resulting in authorized stock repurchases of up to an aggregate of \$100.0 million. As of August 27, 2022, approximately \$38.0 million remained available under the stock repurchase program. Under the stock repurchase program, we may repurchase shares from time to time in the open market or in privately negotiated transactions. The stock repurchase program does not obligate us to acquire any specific number of shares or acquire shares over any specific period of time. We may suspend or discontinue the stock repurchase program at any time, and the stock repurchase program does not have an expiration date.

Performance Graph

The following stock performance graph compares the cumulative total stockholder return over the last five fiscal years for (i) the Company's common stock, (ii) the Standard & Poor's 500 Index, and (iii) the Standard & Poor's 500 Packaged Foods & Meats Index. The graph assumes the value of the investment in our common stock and each index was \$100.00 on August 26, 2017 and assumes reinvestment of any dividends.

The stock price performance below is not necessarily indicative of future stock price performance.

Company Name / Index	Annual Return Percentage					
	Fiscal Years Ending					
	August 26, 2017	August 25, 2018	August 31, 2019	August 29, 2020	August 28, 2021	August 27, 2022
The Simply Good Foods Company	\$ 100.00	\$ 151.35	\$ 249.41	\$ 213.72	\$ 297.56	\$ 265.24
S&P 500 Index	\$ 100.00	\$ 117.67	\$ 119.79	\$ 143.59	\$ 184.58	\$ 166.09

Item 6. Reserved.

Not applicable.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our Consolidated Financial Statements and related notes included in Item 8 of this Report. In addition to historical information, the following discussion contains forward-looking statements, including, but not limited to, statements regarding the Company’s expectation for future performance, liquidity and capital resources that involve risks, uncertainties and assumptions that could cause actual results to differ materially from the Company’s expectations. The Company’s actual results may differ materially from those contained in or implied by any forward-looking statements. Factors that could cause such differences include those identified below and those described in “Cautionary Note Regarding Forward-Looking Statements,” and in Item 1A “Risk Factors” of this Report. The Company assumes no obligation to update any of these forward-looking statements.

Our fiscal year ends the last Saturday in August. Our fiscal years 2022, 2021, and 2020 ended August 27, 2022, August 28, 2021, and August 29, 2020, respectively, and were each fifty-two week periods. Our fiscal quarters are comprised of thirteen weeks each, except for fifty-three week fiscal periods for the which the fourth quarter is comprised of fourteen weeks, and end on the thirteenth Saturday of each quarter (fourteenth Saturday of the fourth quarter, when applicable). Our fiscal quarters for fiscal 2022 ended on November 27, 2021, February 26, 2022, May 28, 2022 and August 27, 2022.

Unless the context requires otherwise in this Report, the terms “we,” “us,” “our,” the “Company” and “Simply Good Foods” refer to The Simply Good Foods Company and its subsidiaries.

Overview

The Simply Good Foods Company is a consumer packaged food and beverage company that aims to lead the nutritious snacking movement with trusted brands that offer a variety of convenient, innovative, great-tasting, better-for-you snacks and meal replacements, and other product offerings. The product portfolio we develop, market and sell consists primarily of protein bars, ready-to-drink (“RTD”) shakes, sweet and salty snacks and confectionery products marketed under the Atkins®, Atkins Endulge®, Quest® and Quest Hero™ brand names. We believe Simply Good Foods is poised to expand its wellness platform through innovation and organic growth along with acquisition opportunities in the nutritional snacking space.

Our nutritious snacking platform consists of brands that specialize in providing products for consumers that follow certain nutritional philosophies and health-and-wellness trends: Atkins® for those following a low-carb lifestyle and Quest® for consumers seeking a variety of protein-rich foods and beverages that also limit sugars and simple carbs. We distribute our products in major retail channels, primarily in North America, including grocery, club, and mass merchandise, as well as through e-commerce, convenience, specialty, and other channels. Our portfolio of nutritious snacking brands gives us a strong platform with which to introduce new products, expand distribution, and attract new consumers to our products.

Business Trends

Our consolidated results of operations for the fiscal year ended August 27, 2022 improved from the end of fiscal year 2021, driven in part by the increasing normalization of consumer mobility and shopper traffic patterns in brick-and-mortar retailers versus prior periods that were more severely pressured by COVID-19 mitigation strategies, including movement restrictions and closures of or reduced access to customer establishments. We expect our business performance during fiscal year 2023 will continue to be affected by the dynamic macroeconomic inflationary environment in the United States and elsewhere, elevated levels of supply chain cost inflation, and the level of consumer mobility, which includes the rate at which consumers return to working outside the home.

Overall consumer spending, particularly in the United States, continued to recover from the effects of the COVID-19 pandemic, which resulted in well documented industry-wide supply chain disruptions across the United States and globally during fiscal year 2022. As a result, during the fifty-two weeks ended August 27, 2022, we experienced corresponding unfavorable effects of higher raw material costs, higher freight and logistics costs, and supply chain challenges, including supply chain disruptions resulting from labor shortages and disruptions in ingredients. We expect these cost pressures and supply chain challenges to continue into fiscal year 2023. We have also continued to see contract manufacturer and logistics challenges, largely related to availability of labor, which we believe along with the ingredient shortages discussed above have contributed to lower retail and e-commerce sales of our products due to periodic out-of-stock situations, delayed recognition of sales and higher than historical inventory levels at times. We could experience additional lost sale opportunities at our retail and e-commerce customers if our products are not available for purchase because of continued or expanded disruptions in our supply chain relating to an inability to obtain ingredients or packaging, labor challenges at our logistics providers or our contract manufacturers, or if our customers experience delays in stocking our products.

We have actively engaged with our retail customers, contract manufacturers, and logistics and transportation providers, to meet demand for our products and to remain informed of any challenges within our business operations. We have also instituted price increases effective in the first and fourth quarters of fiscal year 2022. Management believes these price increases and additional cost savings initiatives will enable us to continue to invest in projects that drive growth.

The improvement in consumer mobility and shopper traffic patterns experienced during fiscal year 2022 has been variable, and there continues to be uncertainty related to the sustainability and longevity of these trends. The ultimate effect COVID-19, supply chain challenges, cost pressures discussed above, and the overall effects of the current high inflation environment on consumer purchasing patterns could have on our business continues to be not fully known. Additionally, management is continuing to monitor the conflict in Ukraine, especially regarding the availability and cost of raw materials that are produced in this region and Europe in general. Management is also monitoring for signs of any expansion of economic or supply chain disruptions or broader supply chain inflationary costs resulting either directly or indirectly from the crisis in Eastern Europe. Factors contributing to the uncertainty described above, among other things, include (i) continued supply chain disruptions, including disruptions resulting from labor shortages and other cost pressures, (ii) changes to customer operations, (iii) a reversal in improving consumer purchasing and consumption behavior, and (iv) unforeseen business disruptions or other effects due to current global geopolitical tensions, including relating directly or indirectly to the Ukraine crisis.

Based on information available to us as of the date of this Report, we believe we will be able to deliver products at acceptable levels to fulfill customer orders on a timely basis; therefore, we expect our products will continue to be available for purchase to meet consumer meal replacement and snacking needs for the foreseeable future. We continue to monitor customer and consumer demand along with our supply chain and logistics capabilities and intend to adapt our plans as needed to continue to drive our business and meet our obligations

Please also see the information under Item 1A. “Risk Factors” for additional information regarding the risks of pandemics, such as COVID-19, higher raw material, freight, and logistics costs, and supply chain challenges.

Restructuring and Related Charges

In May 2020, we announced certain restructuring activities in conjunction with the implementation of our future-state organization design, which created a fully integrated organization with our completed Quest Acquisition. The new organization design became effective on August 31, 2020. These restructuring plans primarily included workforce reductions, changes in management structure, and the relocation of business activities from one location to another.

We substantially completed our restructuring activities during fiscal year 2022. Since the announcement of the restructuring activities in May 2020, we incurred aggregate restructuring and restructuring-related costs of \$9.9 million. As of August 27, 2022, there was no outstanding restructuring liability.

For the fifty-two weeks ended August 27, 2022, August 28, 2021, and August 29, 2020, we incurred a total of \$0.1 million, \$4.3 million, and \$5.5 million in restructuring and restructuring-related costs, respectively, which have been included within *General and administrative* on the Consolidated Statements of Income and Comprehensive Income. Refer to Note 16, Restructuring and Related Charges, of our Consolidated Financial Statements included in this Report for additional information regarding restructuring activities.

SimplyProtein Sale

Effective September 24, 2020, we sold the assets exclusively related to our SimplyProtein® brand of products for approximately \$8.8 million of consideration, including cash of \$5.8 million and a note receivable for \$3.0 million, to a newly formed entity led by the Company’s former Canadian-based management team who had been responsible for this brand prior to the sale transaction (the “SimplyProtein Sale”). In addition to purchasing these assets, the buyer assumed certain liabilities related to the SimplyProtein® brand’s business. There was no gain or loss recognized as a result of the SimplyProtein Sale. The transaction has enabled our management to focus its full time and resources on our core Atkins® and Quest® branded businesses and other strategic initiatives.

Quest Acquisition

In November 2019, we completed the acquisition of Quest, a healthy lifestyle food company, for a cash purchase price of approximately \$1.0 billion (subject to customary adjustments). For more information, please see “Liquidity and Capital Resources—Quest Acquisition.”

Our Reportable Segment

During the fifty-two weeks ended August 27, 2022, we substantially completed our efforts to fully integrate our operations and organization structure after the Quest Acquisition. We aligned the nature of our production processes and the methods used to distribute products to customers for the Atkins® and Quest® brands. We also designed our organizational structure to support entity-wide business functions across brands, products, customers, and geographic regions. Additionally, our chief operating decision maker reviews operating results and forecasts at the consolidated level. As a result, we determined our operations are organized into one, consolidated operating segment and reportable segment. Previously, during the fifty-two weeks ended August 28, 2021 and August 29, 2020, we had two operating segments, Atkins and Quest, which were aggregated into one reporting segment due to similar financial, economic and operating characteristics.

Key Financial Definitions

Net sales. Net sales consist primarily of product sales less the cost of promotional activities, slotting fees and other sales credits and adjustments, including product returns.

Cost of goods sold. Cost of goods sold consists primarily of the costs we pay to our contract manufacturing partners to produce the products sold. These costs include the purchase of raw ingredients, packaging, shipping and handling, warehousing, depreciation of warehouse equipment, and a tolling charge for the contract manufacturer. Cost of goods sold includes products provided at no charge as part of promotions and the non-food materials provided with customer orders.

Operating expenses. Operating expenses consist primarily of selling and marketing, general and administrative, and depreciation and amortization. The following is a brief description of the components of operating expenses:

- *Selling and marketing.* Selling and marketing expenses comprise broker commissions, customer marketing, media and other marketing costs.
- *General and administrative.* General and administrative expenses comprise expenses associated with corporate and administrative functions that support our business, including employee compensation, stock-based compensation, professional services, integration costs, restructuring costs, insurance and other general corporate expenses.
- *Depreciation and amortization.* Depreciation and amortization costs consist of costs associated with the depreciation of fixed assets and capitalized leasehold improvements and amortization of intangible assets.

Results of Operations

During the fifty-two weeks ended August 27, 2022, our net sales increased \$163.1 million, or 16.2%, and our gross profit increased \$35.8 million, or 8.7%, compared to the fifty-two weeks ended August 28, 2021. Net sales for the fifty-two weeks ended August 27, 2022 were positively affected by the price increases effective in the first and fourth quarters of fiscal year 2022, and both the Atkins® and Quest® brands experienced sales and earnings growth driven by increased retail and e-commerce sales volume. However, unfavorable effects of higher raw material costs, freight, and logistics costs and supply chain challenges in the fifty-two weeks ended August 27, 2022 resulted in decreased gross profit margin as compared to the fifty-two weeks ended August 28, 2021. As previously discussed above in “Business Trends,” we expect these cost pressures and supply chain challenges to continue into fiscal year 2023.

In assessing the performance of our business, we consider a number of key performance indicators used by management and typically used by our competitors, including the non-GAAP measures EBITDA and Adjusted EBITDA. Because not all companies use identical calculations, this presentation of EBITDA and Adjusted EBITDA may not be comparable to other similarly titled measures of other companies. See “Reconciliation of EBITDA and Adjusted EBITDA” below for a reconciliation of EBITDA and Adjusted EBITDA to net income for each applicable period.

A discussion regarding our financial condition and results of operations for the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021 is presented below. A discussion regarding our financial condition and results of operations for the fifty-two weeks ended August 28, 2021 compared to the fifty-two weeks ended August 29, 2020 can be found under Item 7 of our Annual Report on Form 10-K for the fiscal year ended August 28, 2021, filed with the SEC on October 26, 2021.

Comparison of Results for the Fifty-Two Weeks Ended August 27, 2022 and the Fifty-Two Weeks Ended August 28, 2021

The following table presents, for the periods indicated, selected information from our consolidated financial results, including information presented as a percentage of net sales:

<i>(In thousands)</i>	52-Weeks Ended August 27, 2022	% of Net Sales	52-Weeks Ended August 28, 2021	% of Net Sales
Net sales	\$ 1,168,678	100.0 %	\$ 1,005,613	100.0 %
Cost of goods sold	723,117	61.9 %	595,847	59.3 %
Gross profit	445,561	38.1 %	409,766	40.7 %
Operating expenses:				
Selling and marketing	121,685	10.4 %	112,928	11.2 %
General and administrative	103,832	8.9 %	106,181	10.6 %
Depreciation and amortization	17,285	1.5 %	16,982	1.7 %
Total operating expenses	242,802	20.8 %	236,091	23.5 %
Income from operations	202,759	17.3 %	173,675	17.3 %
Other income (expense):				
Interest income	15	— %	84	— %
Interest expense	(21,881)	(1.9)%	(31,557)	(3.1)%
Loss in fair value change of warrant liability	(30,062)	(2.6)%	(66,197)	(6.6)%
Gain on legal settlement	—	— %	5,000	0.5 %
Gain (loss) on foreign currency transactions	191	— %	(5)	— %
Other expense	(453)	— %	(140)	— %
Total other expense	(52,190)	(4.5)%	(92,815)	(9.2)%
Income before income taxes	150,569	12.9 %	80,860	8.0 %
Income tax expense	41,995	3.6 %	39,980	4.0 %
Net income	<u>\$ 108,574</u>	<u>9.3 %</u>	<u>\$ 40,880</u>	<u>4.1 %</u>
Other financial data:				
Adjusted EBITDA ⁽¹⁾	<u>\$ 234,043</u>	<u>20.0 %</u>	<u>\$ 207,273</u>	<u>20.6 %</u>

⁽¹⁾ Adjusted EBITDA is a non-GAAP financial metric. See “Reconciliation of EBITDA and Adjusted EBITDA” below for a reconciliation of net income to EBITDA and Adjusted EBITDA for each applicable period.

Net sales. Net sales of \$1,168.7 million represented an increase of \$163.1 million, or 16.2%, for the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021. The increase was primarily attributable to retail and e-commerce sales volume growth for both the Atkins® and Quest® brands, which increased our North America net sales by 18.1% in the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021. Additionally, we instituted price increases effective in the first and fourth quarters of fiscal year 2022. The increase in net sales was partially offset by a 23.8% decline in our international business due to the decision to wind down our European business. The European exit represented a 1.2% headwind to total net sales growth.

Cost of goods sold. Cost of goods sold increased \$127.3 million, or 21.4%, for the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021. The cost of goods sold increase was driven by sales volume growth for both the Atkins® and Quest® brands, as discussed above. Additionally, our cost of goods sold for the fifty-two weeks ended August 27, 2022 was unfavorably affected by higher raw material, freight, and logistics costs and supply chain challenges. As previously discussed above in “Business Trends,” we expect these cost pressures and supply chain challenges to continue into fiscal year 2023.

Gross profit. Gross profit increased \$35.8 million, or 8.7%, for the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021, which was primarily driven by the sales volume growth for both the Quest® and Atkins® brands as discussed above. Gross profit of \$445.6 million, or 38.1% of net sales, for the fifty-two weeks ended August 27, 2022 decreased 260 basis points from 40.7% of net sales for the fifty-two weeks ended August 28, 2021. The decrease in gross profit margin was primarily the result

of the unfavorable effects of higher raw material, freight, and logistics costs and supply chain challenges in the fifty-two weeks ended August 27, 2022 as previously discussed. The decrease in gross profit margin was partially offset by the favorable effects of the price increases which became effective in the first and fourth quarters of fiscal year 2022.

Operating expenses. Operating expenses increased \$6.7 million, or 2.8%, for the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021 due to the following:

- **Selling and marketing.** Selling and marketing expenses increased \$8.8 million, or 7.8%, for the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021, primarily related to additional brand building initiatives for both Atkins® and Quest®.
- **General and administrative.** General and administrative expenses decreased \$2.3 million, or 2.2%, for the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021. The decrease was primarily attributable to reductions in costs related to business integration activities of \$2.5 million, restructuring charges of \$4.2 million, and incentive compensation in the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021. These decreases were partially offset by an increase in stock-based compensation of \$3.4 million and increased corporate expenses in the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021.
- **Depreciation and amortization.** Depreciation and amortization expenses increased \$0.3 million, or 1.8%, for the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021, primarily due to increased depreciation expense related to the \$5.2 million of purchases of property and equipment during the fifty-two weeks ended August 27, 2022.

Interest income. Interest income was immaterial for the fifty-two weeks ended August 27, 2022 compared to interest income of \$0.1 million for the fifty-two weeks ended August 28, 2021.

Interest expense. Interest expense decreased \$9.7 million for the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021 primarily due to principal payments reducing the outstanding balance of the Term Facility (as defined below) to \$406.5 million as of August 27, 2022 from \$456.5 million as of August 28, 2021. Additionally, interest expense related to the amortization of deferred financing costs and debt discount decreased \$2.1 million for the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021.

Loss in fair value change of warrant liability. During the fifty-two weeks ended August 27, 2022 and August 28, 2021, we recorded a non-cash loss of \$30.1 million and \$66.2 million, respectively, related to changes in valuation of our liability-classified warrants issued through a private placement (“Private Warrants”), which was primarily driven by movements in our stock price. On January 7, 2022, the Private Warrants were fully exercised on a cashless basis, resulting in a net issuance of 4,830,761 shares of our common stock. As a result, there were no outstanding liability-classified Private Warrants as of August 27, 2022.

Gain on legal settlement. We recorded a \$5.0 million gain on a legal settlement during the fifty-two weeks ended August 28, 2021.

Gain (loss) on foreign currency transactions. Foreign currency transactions resulted in a \$0.2 million gain and an immaterial loss for the fifty-two weeks ended August 27, 2022 and August 28, 2021, respectively. During the fifty-two weeks ended August 27, 2022, we recognized a foreign currency translation gain of \$1.1 million related to the liquidation of a foreign subsidiary. The remaining variance is attributable to changes in foreign currency rates related to our international operations.

Income tax expense. Income tax expense increased \$2.0 million for the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021. The increase in our income tax expense is primarily driven by higher income from operations.

Net income. Net income was \$108.6 million for the fifty-two weeks ended August 27, 2022, an increase of \$67.7 million, compared to net income of \$40.9 million for the fifty-two weeks ended August 28, 2021. The increase in net income was primarily related to the \$29.1 million increase in income from operations driven by the Atkins® and Quest® brand sales volume growth as discussed above, the \$36.1 million decrease in the non-cash loss in fair value change of our Private Warrant liability, and the \$9.7 million decrease in interest expense in the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021. These increases were partially offset by the \$2.0 million increase in income tax expense in the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021 as well as the non-recurring \$5.0 million gain on a legal settlement in the fifty-two weeks ended August 28, 2021.

Adjusted EBITDA. Adjusted EBITDA increased \$26.8 million, or 12.9%, for the fifty-two weeks ended August 27, 2022 compared to the fifty-two weeks ended August 28, 2021, driven primarily by sales volume growth for the Atkins® and Quest® brands, which was partially offset by the unfavorable effects of higher raw material, freight, and logistics costs and supply chain challenges in the fifty-two weeks ended August 27, 2022 as discussed above. For a reconciliation of Adjusted EBITDA to its most directly comparable GAAP measure, see “Reconciliation of EBITDA and Adjusted EBITDA” below.

Reconciliation of EBITDA and Adjusted EBITDA

EBITDA and Adjusted EBITDA are non-GAAP financial measures commonly used in our industry and should not be construed as alternatives to net income as an indicator of operating performance or as alternatives to cash flow provided by operating activities as a measure of liquidity (each as determined in accordance with GAAP). Simply Good Foods defines EBITDA as net income or loss before interest income, interest expense, income tax expense, depreciation and amortization, and Adjusted EBITDA as further adjusted to exclude the following items: stock-based compensation expense, integration costs, restructuring costs, gain or loss in fair value change of warrant liability, gain or loss due to legal settlements, and other non-core expenses. The Company believes that EBITDA and Adjusted EBITDA, when used in conjunction with net income, are useful to provide additional information to investors. Management of the Company uses EBITDA and Adjusted EBITDA to supplement net income because these measures reflect operating results of the on-going operations, eliminate items that are not directly attributable to the Company's underlying operating performance, enhance the overall understanding of past financial performance and future prospects, and allow for greater transparency with respect to the key metrics the Company's management uses in its financial and operational decision making. The Company also believes that EBITDA and Adjusted EBITDA are frequently used by securities analysts, investors and other interested parties in the evaluation of companies in its industry. EBITDA and Adjusted EBITDA may not be comparable to other similarly titled captions of other companies due to differences in the non-GAAP calculation.

The following unaudited table provides a reconciliation of EBITDA and Adjusted EBITDA to its most directly comparable GAAP measure, which is net income, for the fifty-two weeks ended August 27, 2022 and August 28, 2021:

<i>(In thousands)</i>	52-Weeks Ended August 27, 2022	52-Weeks Ended August 28, 2021
Net income	\$ 108,574	\$ 40,880
Interest income	(15)	(84)
Interest expense	21,881	31,557
Income tax expense	41,995	39,980
Depreciation and amortization	19,299	18,174
EBITDA	191,734	130,507
Stock-based compensation expense	11,697	8,265
Integration of Quest	468	2,928
Restructuring	98	4,324
Loss in fair value change of warrant liability	30,062	66,197
Gain on legal settlement	—	(5,000)
Other ⁽¹⁾	(16)	52
Adjusted EBITDA	<u>\$ 234,043</u>	<u>\$ 207,273</u>

⁽¹⁾ Other items consist principally of exchange impact of foreign currency transactions and other expenses.

Liquidity and Capital Resources

Overview

We have historically funded our operations with cash flow from operations and, when needed, with borrowings under our Credit Agreement (as defined below). Our principal uses of cash have been working capital, debt service, repurchases of our common stock, and acquisition opportunities.

We had \$67.5 million in cash as of August 27, 2022. We believe our sources of liquidity and capital will be sufficient to finance our continued operations, growth strategy and additional expenses we expect to incur for at least the next twelve months. As circumstances warrant, we may issue debt and/or equity securities from time to time on an opportunistic basis, dependent upon market conditions and available pricing. We make no assurance that we can issue and sell such securities on acceptable terms or at all.

Our material future cash requirements from contractual and other obligations relate primarily to our principal and interest payments for our Term Facility, as defined and discussed below, and our operating and finance leases. Refer to Note 7, Long-Term Debt and Line of Credit, and Note 10, Leases, of the Consolidated Financial Statements included in Item 8 of this Report for additional information related to the expected timing and amount of payments related to our contractual and other obligations.

Debt and Credit Facilities

On July 7, 2017, we entered into a credit agreement with Barclays Bank PLC and other parties (as amended to date, the “Credit Agreement”). The Credit Agreement at that time provided for (i) a term facility of \$200.0 million (“Term Facility”) with a seven-year maturity and (ii) a revolving credit facility of up to \$75.0 million (the “Revolving Credit Facility”) with a five-year maturity. Substantially concurrent with the consummation of the business combination between Conyers Park Acquisition Corp. and NCP-ATK Holdings, Inc. on July 7, 2017, the full \$200.0 million of the Term Facility (the “Term Loan”) was drawn.

On November 7, 2019, we entered into a second amendment (the “Incremental Facility Amendment”) to the Credit Agreement to increase the principal borrowed on the Term Facility by \$460.0 million. The Term Facility together with the incremental borrowing make up the Initial Term Loans (as defined in the Incremental Facility Amendment). The Incremental Facility Amendment was executed to partially finance the acquisition of Quest Nutrition, LLC on November 7, 2019. No amounts under the Term Facility were repaid as a result of the execution of the Incremental Facility Amendment.

Effective as of December 16, 2021, we entered into a third amendment (the “Extension Amendment”) to the Credit Agreement. The Extension Amendment provided for an extension of the stated maturity date of the Revolving Commitments and Revolving Loans (each as defined in the Credit Agreement) from July 7, 2022 to the earlier of (i) 91 days prior to the maturity date of the Initial Term Loans on July 7, 2024 and (ii) December 16, 2026.

On January 21, 2022, we entered into a repricing amendment (the “2022 Repricing Amendment”) to the Credit Agreement. The 2022 Repricing Amendment, among other things, (i) reduced the interest rate per annum applicable to the Initial Term Loans outstanding under the Credit Agreement immediately prior to the effective date of the 2022 Repricing Amendment, (ii) reset the prepayment premium for the existing Initial Term Loans to apply to Repricing Transactions (as defined in the Credit Agreement) that occur within six months after the effective date of the 2022 Repricing Amendment, and (iii) implemented the Secured Overnight Financing Rate (“SOFR”) and related replacement provisions for the London Interbank Offered Rate (“LIBOR”).

Effective as of the 2022 Repricing Amendment dated January 21, 2022, the interest rate per annum is based on either:

- i. A base rate equaling the higher of (a) the “prime rate,” (b) the federal funds effective rate plus 0.50%, or (c) the Adjusted Term SOFR Rate (as defined in the Credit Agreement) applicable for an interest period of one month plus 1.00% plus (x) 2.25% margin for the Term Loan or (y) 2.00% margin for the Revolving Credit Facility; or
- ii. SOFR plus a credit spread adjustment equal to 0.10% for one-month SOFR, 0.15% for up to three-month SOFR and 0.25% for up to six-month SOFR, subject to a floor of 0.50%, plus (x) 3.25% margin for the Term Loan or (y) 3.00% margin for the Revolving Credit Facility.

The Simply Good Foods Company is not a borrower under the Credit Agreement and has not provided a guarantee of the Credit Agreement. Simply Good Foods USA, Inc., is the administrative borrower and certain other subsidiary holding companies are co-borrowers under the Credit Agreement. Each of our domestic subsidiaries that is not a named borrower under the Credit Agreement has provided a guarantee on a secured basis. As security for the payment or performance of the debt under the Credit Agreement, the borrowers and the guarantors have pledged certain equity interests in their respective subsidiaries and granted the lenders a security interest in substantially all of their domestic assets. All guarantors other than Quest Nutrition, LLC are holding companies with no assets other than their investments in their respective subsidiaries.

The Credit Agreement contains certain financial and other covenants that limit our ability to, among other things, incur and/or undertake asset sales and other dispositions, liens, indebtedness, certain acquisitions and investments, consolidations, mergers, reorganizations and other fundamental changes, payment of dividends and other distributions to equity and warrant holders, and prepayments of material subordinated debt, in each case, subject to customary exceptions materially consistent with credit facilities of such type and size. The Revolving Credit Facility has a maximum total net leverage ratio equal to or less than 6.00:1.00 contingent on credit extensions in excess of 30% of the total amount of commitments available under the Revolving Credit Facility. Any failure to comply with the restrictions of the credit facilities may result in an event of default. We were in compliance with all financial covenants as of August 27, 2022 and August 28, 2021, respectively.

As of August 27, 2022, the outstanding balance of the Term Facility was \$406.5 million. We are not required to make principal payments on the Term Facility over the twelve months following the period ended August 27, 2022. The outstanding balance of the Term Facility is due upon its maturity in July 2024. As of August 27, 2022, there were no amounts drawn against the Revolving Credit Facility.

Stock Repurchase Program

On April 13, 2022, we announced that our Board of Directors had approved the addition of \$50.0 million to our stock repurchase program, resulting in authorized stock repurchases of up to an aggregate of \$100.0 million. During the fifty-two weeks ended August 27, 2022, we repurchased 1,720,520 shares of common stock for \$59.9 million, averaging a purchase price per share of \$34.79. We did not repurchase any shares of common stock during the fifty-two weeks ended August 28, 2021 and August 29, 2020.

As of August 27, 2022, approximately \$38.0 million remained available for repurchases under our \$100.0 million stock repurchase program. Refer to Note 12, Stockholders' Equity of the Consolidated Financial Statements included in Item 8 of this Report for additional information related to our stock repurchase program.

Warrants to Purchase Common Stock

As of August 28, 2021, we had outstanding liability-classified Private Warrants that allowed holders to purchase 6,700,000 shares of our common stock. Such Private Warrants were held by Conyers Park Sponsor, LLC ("Conyers Park"), a related party. Each whole warrant entitled the holder to purchase one share of our common stock at a price of \$11.50 per share. On January 7, 2022, Conyers Park elected to exercise the Private Warrants in full on a cashless basis, resulting in a net issuance of 4,830,761 shares of the Company's common stock. As a result, there were no outstanding liability-classified Private Warrants as of August 27, 2022. Refer to Note 12, Stockholders' Equity of the Consolidated Financial Statements included in Item 8 of this Report for additional details regarding the Private Warrants.

Public Equity Offering

On October 9, 2019, we completed an underwritten public offering of 13,379,205 shares of our common stock at a price to the public of \$26.35 per share. We paid underwriting discounts and commissions of \$0.19 per share resulting in net proceeds to us of \$26.16 per share, or approximately \$350.0 million (the "Offering"). We paid \$0.8 million for legal, accounting and registrations fees related to the Offering. The net proceeds were used to pay a portion of the purchase price and related fees and expenses for the Quest Acquisition.

Quest Acquisition

On August 21, 2019, our wholly-owned subsidiary Simply Good Foods USA, Inc., formerly known as Atkins Nutritionals, Inc. ("Simply Good USA") entered into a Stock and Unit Purchase Agreement (the "Purchase Agreement") with VMG Voyage Holdings, LLC, VMG Tax-Exempt II, L.P., Voyage Employee Holdings, LLC, and other sellers, as defined in the Purchase Agreement, to Quest, a healthy lifestyle food company. On November 7, 2019, pursuant to the Purchase Agreement, Simply Good USA completed the Quest Acquisition, for a cash purchase price of approximately \$1.0 billion, subject to customary post-closing adjustments.

The Quest Acquisition was funded through a combination of cash, equity and debt financing. Total consideration paid on the closing date was \$988.9 million. Cash sources of funding included \$195.3 million of cash on hand, net proceeds of approximately \$350.0 million from an underwritten public offering of common stock, and \$443.6 million in new term loan debt. In the third fiscal quarter of 2020, we received a post-closing release from escrow of approximately \$2.1 million related to net working capital adjustments, resulting in a total net consideration paid of \$986.8 million. *Business transaction costs* within the Consolidated Statements of Income and Comprehensive Income for the fifty-two weeks ended August 29, 2020 was \$27.1 million, which included \$14.5 million of transaction advisory fees related to the Quest Acquisition, \$3.2 million of banker commitment fees, \$6.1 million of non-deferrable debt issuance costs related to the incremental term loan, and \$3.3 million of other costs, including legal, due diligence, and accounting fees.

Cash Flows

The following table sets forth the major sources and uses of cash for the fifty-two weeks ended August 27, 2022 and August 28, 2021. A discussion regarding the major sources and uses of cash for the fifty-two weeks ended August 29, 2020 can be found under Item 7 of our Annual Report on Form 10-K for the fiscal year ended August 28, 2021, filed with the SEC on October 26, 2021.

<i>(In thousands)</i>	52-Weeks Ended August 27, 2022	52-Weeks Ended August 28, 2021
Net cash provided by operating activities	\$ 110,639	\$ 132,089
Net cash used in investing activities	\$ (8,156)	\$ (2,506)
Net cash used in financing activities	\$ (110,032)	\$ (150,049)

Operating activities. Our net cash provided by operating activities decreased \$21.5 million to \$110.6 million for the fifty-two weeks ended August 27, 2022 compared to \$132.1 million for the fifty-two weeks ended August 28, 2021. The decrease in cash provided by operating activities was primarily attributable to changes in working capital, comprised of changes in accounts receivable, net, inventories, prepaid expenses, accounts payable, and accrued expenses and other current liabilities, which are driven by the timing of payments and receipts and seasonal building of inventory. Changes in working capital consumed cash of \$63.8 million in the fifty-two weeks ended August 27, 2022 compared to \$21.5 million of cash consumed in the fifty-two weeks ended August 28, 2021. Additionally, cash paid for taxes increased \$17.0 million to \$49.2 million for the fifty-two weeks ended August 27, 2022 as compared to \$32.2 million for the fifty-two weeks ended August 28, 2021. These decreases in cash provided by operating activities were partially offset by the \$29.1 million increase in income from operations to \$202.8 million for the fifty-two weeks ended August 27, 2022 as compared to \$173.7 million for the fifty-two weeks ended August 28, 2021, primarily attributable to retail and e-commerce sales volume growth for both the Atkins® and Quest® brands as discussed in “Results of Operations” above. Additionally, cash paid for interest was \$19.2 million in the fifty-two weeks ended August 27, 2022, which was a decrease of \$8.6 million as compared to the \$27.8 million paid for interest in the fifty-two weeks ended August 28, 2021.

Investing activities. Our net cash used in investing activities was \$8.2 million for the fifty-two weeks ended August 27, 2022 compared to \$2.5 million for the fifty-two weeks ended August 28, 2021. Our net cash used in investing activities for the fifty-two weeks ended August 27, 2022 primarily comprised \$5.2 million of purchases of property and equipment and the issuance of a \$2.4 million note receivable. The \$2.5 million of net cash used in investing activities for the fifty-two weeks ended August 28, 2021 primarily comprised the \$5.9 million purchases of property and equipment and the issuance of a \$1.6 million note receivable, partially offset by the \$5.8 million of cash proceeds received from the SimplyProtein Sale.

Financing activities. Our net cash used in financing activities was \$110.0 million for the fifty-two weeks ended August 27, 2022 compared to \$150.0 million for the fifty-two weeks ended August 28, 2021. Net cash used in financing activities for the fifty-two weeks ended August 27, 2022 primarily consisted of \$50.0 million in principal payments on the Term Facility and \$59.9 million in repurchases in common stock. Net cash used in financing activities for the fifty-two weeks ended August 28, 2021 primarily consisted of \$150.0 million in principal payments on the Term Facility.

Critical Accounting Policies, Judgments and Estimates

General

Our consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the U.S. While the majority of our revenue, expenses, assets and liabilities are not based on estimates, there are certain accounting principles that require management to make estimates regarding matters that are uncertain and susceptible to change. Critical accounting policies are defined as those policies that are reflective of significant judgments, estimates and uncertainties, which could potentially result in materially different results under different assumptions and conditions. Management regularly reviews the estimates and assumptions used in the preparation of the financial statements for reasonableness and adequacy. Our significant accounting policies are discussed in Note 2, Summary of Significant Accounting Policies, of our Consolidated Financial Statements in this filing; however, the following discussion pertains to accounting policies we believe are most critical to the portrayal of its financial condition and results of operations and that require significant, difficult, subjective or complex judgments. Other companies in similar businesses may use different estimation policies and methodologies, which may affect the comparability of our financial condition, results of operations and cash flows to those of other companies.

Revenue Recognition

We recognize revenue when performance obligations under the terms of a contract with its customer are satisfied. We have determined that fulfilling and delivering products is a single performance obligation. Revenue is recognized at the point in time when we have satisfied our performance obligation and the customer has obtained control of the products. This generally occurs when the product is delivered to or picked up by our customer based on applicable shipping terms, which is typically within 30 days.

Revenue is measured as the amount of consideration expected to be received in exchange for fulfilled product orders, including estimates of variable consideration. The most common forms of variable consideration include trade promotions, such as consumer incentives, coupon redemptions and other marketing activities, allowances for unsaleable product, and any additional amounts where a distinct good or service cannot be identified or the value cannot be reasonably estimated. Estimates of variable consideration are made using various information including historical data on performance of similar trade promotional activities, market data from IRI, and our best estimate of current activity. Revisions can include changes for consideration paid to customers that lack sufficient evidence to support a distinct good or service assertion, or for which a reasonably estimable fair value cannot be determined, primarily related to our assessments of cooperative advertising programs. We review these estimates regularly and makes revisions as necessary. Uncertainties

related to the estimate of variable consideration are resolved in a short time frame and do not require any additional constraint on variable consideration. Adjustments to variable consideration have historically been insignificant.

Although some payment terms may be longer, the majority of our payment terms are less than 60 days. As a result, we do not have any material significant payments terms as payment is received shortly after the time of sale.

While our revenue recognition does not involve significant judgment, it represents a key accounting policy.

Trade Promotions

We offer trade promotions through various programs to customers and consumers. Trade promotions include discounts, rebates, slotting and other marketing activities. Trade promotions are recorded as a reduction to net sales with a corresponding reduction to accounts receivable at the time of revenue recognition for the underlying sale. The recognition of trade promotions requires management to make estimates regarding the volume of incentive that will be redeemed and their total cost. These estimates are made using various information including historical data on performance of similar trade promotional activities, market data from IRI, and the Company's best estimates of current activity. Our consolidated financial statements could be materially affected if the actual promotion rates are different from the estimated rates.

As of August 27, 2022 and August 28, 2021, the allowance for trade promotions was \$23.9 million and \$22.3 million, respectively. Differences between estimated expense and actual redemptions are recognized as a change in management estimate in a subsequent period. These differences have historically been insignificant.

Goodwill and Other Intangible Assets

Goodwill and indefinite-lived intangible assets, comprising our brands and trademarks, are not amortized, but instead are tested for impairment at least annually, or more frequently if indicators of impairment exist. We conduct our annual impairment tests at the beginning of the fourth fiscal quarter. We perform our goodwill impairment assessment for each reporting unit that has goodwill. The process of evaluating goodwill and indefinite-lived intangibles for impairment is subjective and requires significant judgment at many points during the analysis.

During the fifty-two weeks ended August 27, 2022, we substantially completed our efforts to fully integrate our operations and organization structure after the Quest Acquisition. We aligned the nature of our production processes and the methods used to distribute products to customers for the Atkins® and Quest® brands. We also designed our organizational structure to support entity-wide business functions across brands, products, customers, and geographic regions. Additionally, our chief operating decision maker reviews operating results and forecasts at the consolidated level. As a result, we determined our operations are organized into one, consolidated operating segment and reporting unit. Previously, during the fifty-two weeks ended August 28, 2021 and August 29, 2020, we had two reporting units which were our operating segments, Atkins and Quest.

We assess goodwill and indefinite-lived intangible assets using either a qualitative or quantitative approach to determine whether it is more likely than not that the fair values of the reporting units or indefinite-lived intangible assets are less than their carrying amounts. The qualitative assessment evaluates factors including macro-economic conditions, industry-specific and company-specific considerations, legal and regulatory environments, and historical performance. If we determine that it is more likely than not that the fair value of a reporting unit or an indefinite-lived intangible asset is less than its carrying value, a quantitative assessment is performed. Otherwise, no further assessment is required. The quantitative approach compares the estimated fair value of the reporting unit, including goodwill, or the indefinite-lived intangible asset to its carrying amount. The material inputs and assumptions underlying the quantitative assessments of goodwill and intangible impairment are based on operational forecasts derived from expectations of future operating performance, which require considerable management judgment regarding matters that are uncertain and susceptible to change. Impairment is indicated if the estimated fair value of the reporting unit or indefinite-lived intangible asset is less than the carrying amount, and an impairment charge is recognized for the differential.

For fiscal year 2022 and 2021, we performed qualitative assessments of goodwill and indefinite-lived intangible assets. The qualitative assessments did not identify indicators of impairment, and it was determined that it was more likely than not each reporting unit and indefinite-lived intangible had fair values in excess of their carrying values. Accordingly, no further impairment assessment was necessary, and no impairment charges related to goodwill or indefinite-lived intangibles were recognized in the fifty-two weeks ended August 27, 2022 or August 28, 2021. Additionally, we determined there was not a material risk for future possible impairments as of the date of the most recent assessment.

For fiscal year 2020, we elected to bypass the qualitative assessment and proceed directly to performing the first step of the quantitative goodwill impairment assessment for each reporting unit. We performed the first step of the quantitative goodwill impairment assessment by comparing the fair value of each of our reporting units, Atkins and Quest, to its carrying amount, including goodwill. The estimated fair values of the Atkins and Quest reporting units substantially exceeded their carrying values. We determined neither reporting unit was impaired, therefore, no impairment charges related to goodwill were recorded in the fifty-two weeks ended August 29, 2020.

Additionally, for fiscal year 2020, we elected to qualitatively assess for impairment the indefinite-lived intangible related to our Quest brand and trademark. The qualitative assessment indicated that it was more likely than not that the Quest brand and trademark indefinite-lived intangible's fair value exceeded its carrying amount, and as a result we did not perform a quantitative assessment. For our indefinite-lived brand and trademark intangible related to our Atkins brand, we elected to bypass the qualitative assessment and proceed directly to performing the quantitative impairment assessment. The estimated fair value of the Atkins brand and trademark indefinite-lived intangible substantially exceeded its carrying value. During the fourth quarter of fiscal 2020, we determined there were indicators of impairment related to the SimplyProtein brand intangible asset, including but not limited to an offer to sell the SimplyProtein brand. Therefore, we performed a quantitative assessment of our brand intangible asset, which indicated the fair value did not exceed the carrying value, resulting in a loss on impairment of \$3.0 million in the fifty-two weeks ended August 29, 2020.

We also have intangible assets that have determinable useful lives, consisting primarily of customer relationships, proprietary recipes and formulas, licensing agreements, and software and website development costs. Costs of these finite-lived intangible assets are amortized on a straight-line basis over their estimated useful lives. Finite-lived intangible assets are tested for impairment when events or circumstances indicated that the carrying amount may not be recoverable. For the fifty-two weeks ended August 27, 2022, August 28, 2021 and August 29, 2020, we did not identify indicators of impairment related to our finite-lived intangible assets, and as such there were no impairments recorded related to finite-lived intangible assets. We also determined that there was no material risk for future possible intangible impairments related to our finite-lived intangible assets as of the date of the most recent assessments.

Income Taxes

We are subject to income taxes in the United States and numerous other jurisdictions. Significant judgment is required in determining our provision for income tax, including evaluating uncertainties in the application of accounting principles and complex tax laws.

Income taxes include federal, state and foreign taxes currently payable and deferred taxes arising from temporary differences between income for financial reporting and income tax purposes. Deferred tax assets and liabilities are determined based on the differences between the financial statement balances and the tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the year that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to amounts expected to be realized. Significant management judgment is required in determining the effective tax rate, evaluating tax positions and determining the net realizable value of deferred tax assets.

Warrant Liability

As of August 28, 2021, we had outstanding Private Warrants that allowed holders to purchase 6,700,000 shares of our common stock. Such Private Warrants were held by Conyers Park, a related party. Each whole warrant entitled the holder to purchase one share of our common stock at a price of \$11.50 per share. On January 7, 2022, Conyers Park elected to exercise the Private Warrants in full on a cashless basis, resulting in a net issuance of 4,830,761 shares of the Company's common stock. As a result of the cashless exercise on January 7, 2022, there were no outstanding Private Warrants as of August 27, 2022.

During the reporting periods the Private Warrants were outstanding, we accounted for our Private Warrants as a derivative warrant liability in accordance with ASC Topic 815-40, Derivatives and Hedging: Contracts in Entity's Own Equity. Accordingly, we recognized the Private Warrants as a liability at fair value and adjusted the Private Warrants to fair value at each reporting period through other income. We utilized the Black-Scholes option-pricing valuation model ("Black-Scholes model") to estimate the fair value of the Private Warrants at each reporting date.

The application of the Black-Scholes model utilizes significant assumptions, including expected volatility, the determination of which requires significant judgment. In order to determine the most accurate measure of this volatility, we measured expected volatility based on several inputs, including considering a peer group of publicly traded companies, Simply Good Foods' implied volatility based on traded options, the implied volatility of comparable warrants, and the implied volatility of any outstanding public warrants during the periods they were outstanding. As a result of the unobservable inputs that were used to determine the expected volatility of the Private Warrants, the fair value measurement of these warrants reflected a Level 3 measurement within the fair value measurement hierarchy. The expected volatility was historically a key assumption or input to the valuation of the Private Warrants, however changes in the expected volatility assumption had less of an effect on the Black-Scholes model valuation as the Private Warrants approached their expiration.

New Accounting Pronouncements

Refer to Note 2, Summary of Significant Accounting Policies, of the Consolidated Financial Statements included in Item 8 of this Report for information regarding recently issued accounting standards.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Our future income, cash flows and fair values relevant to financial instruments are dependent upon prevalent market interest rates. Market risk refers to the risk of loss from adverse changes in market prices and interest rates.

Supply chain costs and inflation. We are exposed to risks associated with changes in the costs of our raw materials as well as changes to our supply and distribution costs. During the fifty-two weeks ended August 27, 2022, our gross margins and profitability were negatively affected by higher raw material costs, higher freight and logistics costs, and supply chain challenges, including supply chain disruptions resulting from labor shortages as well as disruptions in ingredients, caused, in part, by the COVID-19 pandemic, the uncertain economic environment, and macroeconomic and geopolitical events and trends. We expect these cost pressures and supply chain challenges to continue into fiscal year 2023. In addition, current or future governmental policies may increase the risk of inflation, which could further increase the costs of ingredients, packaging and finished goods for our business. As a result, we have instituted price increases effective in the first and fourth quarters of fiscal year 2022. Management believes these price increases and additional cost savings initiatives will enable us to continue to invest in projects that drive growth. However, there can be no assurance that the price increases will fully offset the effects of higher raw material and supply and distribution costs on our results of operations and financial condition. Refer to Item 1A, Risk Factors, for additional discussion of our risks associated with the costs of our raw materials, our supply chain, and our risks associated with pandemics, epidemics or disease outbreaks, such as COVID-19.

Interest rate risk. We are subject to interest rate risk in connection with borrowing based on a variable interest rate. Derivative financial instruments, such as interest rate swap agreements and interest rate cap agreements, may be used for the purpose of managing fluctuating interest rate exposures that exist from our variable rate debt obligations that are expected to remain outstanding. Interest rate changes do not affect the market value of such debt, but could affect the amount of our interest payments, and accordingly, our future earnings and cash flows, assuming other factors are held constant. As of August 27, 2022, the outstanding balance of the Term Facility was \$406.5 million. Based on the amount outstanding of the Term Facility at the end of fiscal year 2022, a 1% increase in interest rates would increase our annual interest expense by approximately \$4.1 million.

Foreign currency risk. We are exposed to changes in currency rates as a result of investments in foreign operations and revenue generated in currencies other than the U.S. Dollar. Revenue and profit generated by international operations will increase or decrease compared to prior periods as a result of changes in foreign currency exchange rates. Historically, our foreign currency risk has primarily related to our operations in Canada, which were largely related to the SimplyProtein brand. With the SimplyProtein Sale in September 2020 as well as the restructuring-related business activities in Europe, we have mitigated some of our risk of exposure to changes in foreign currency rates.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and the Board of Directors of The Simply Good Foods Company

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of The Simply Good Foods Company and subsidiaries (the "Company") as of August 27, 2022 and August 28, 2021, the related consolidated statements of income and comprehensive income, stockholders' equity, and cash flows, for the fifty-two week periods ended August 27, 2022, August 28, 2021, and August 29, 2020 and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of August 27, 2022 and August 28, 2021, and the results of its operations and its cash flows for each of the three years in the period ended August 27, 2022, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of August 27, 2022, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated October 21, 2022, expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Revenue Recognition — Trade Promotions — Refer to Note 2 to the financial statements

Critical Audit Matter Description

The Company offers trade promotions through various programs to customers and consumers. Trade promotions include discounts, rebates, slotting, and other marketing activities. Trade promotions are recorded as a reduction to net sales with a corresponding reduction to accounts receivable at the time of revenue recognition for the underlying sale. The recognition of trade promotions requires the Company to make estimates regarding the volume of incentives that will be redeemed and their total cost. These estimates are made using various information including historical data on performance of similar trade promotional activities, market data, and the Company's best estimates of current activity. As of August 27, 2022, the allowance for trade promotions balance, which is recorded as a reduction to accounts receivable, was approximately \$23.9 million.

Given the subjectivity of estimating the expected promotional claims, performing audit procedures to evaluate whether the allowance for trade promotions balance is appropriately recorded as of August 27, 2022, required a high degree of auditor judgment and an increased extent of effort.

How the Critical Audit Matter Was Addressed in the Audit

Our auditing procedures related to the allowance for trade promotions balance included the following, among others:

- For a selection of allowance for trade promotions balance recorded as of August 27, 2022, we:
 - Confirmed contract terms directly with the customer.
 - Agreed contract terms from the accounting records to the promotion agreement with the customer and verified the promotion period was prior to August 28, 2022.
 - Evaluated the appropriateness of the year-end trade accrual estimate using historical data on performance of similar trade promotional activities, market data, and subsequent customer activity.
- We evaluated management's ability to estimate promotional claims incurred, but not yet received for potential management bias by comparing historical promotional claims received to management's estimates of the claims to be received.
- For a selection of customer promotional claims resolved after August 27, 2022, we compared that amount to the August 27, 2022 allowance for promotions balance and traced the resolved deduction to a properly recorded sale.

1. Nature of Operations and Principles of Consolidation

Description of Business

The Simply Good Foods Company (“Simply Good Foods” or the “Company”) is a consumer packaged food and beverage company that aims to lead the nutritious snacking movement with trusted brands that offer a variety of convenient, innovative, great-tasting, better-for-you snacks and meal replacements, and other product offerings. The product portfolio the Company develops, markets and sells consists primarily of protein bars, ready-to-drink (“RTD”) shakes, sweet and salty snacks and confectionery products marketed under the Atkins®, Atkins Endulge®, Quest® and Quest Hero™ brand names. Simply Good Foods is poised to expand its wellness platform through innovation and organic growth along with acquisition opportunities in the nutritional snacking space.

The Company’s nutritious snacking platform consists of brands that specialize in providing products for consumers that follow certain nutritional philosophies and health-and-wellness trends: Atkins® for those following a low-carb lifestyle and Quest® for consumers seeking a variety of protein-rich foods and beverages that also limit sugars and simple carbs. The Company distributes its products in major retail channels, primarily in North America, including grocery, club, and mass merchandise, as well as through e-commerce, convenience, specialty, and other channels. The Company’s portfolio of nutritious snacking brands gives it a strong platform with which to introduce new products, expand distribution, and attract new consumers to its products.

The common stock of Simply Good Foods is listed on the Nasdaq Capital Market under the symbol “SMPL.”

While the Company’s business has improved from the end of fiscal year 2021, driven in part by the increasing normalization of consumer mobility and shopper traffic patterns in brick-and-mortar retailers versus prior periods that were pressured by COVID-19 movement restrictions, the ultimate effect COVID-19, supply chain challenges, cost pressures, and the overall effects of the current high inflation environment on consumer purchasing patterns could have on our business continues to be not fully known. Additionally, management is continuing to monitor the conflict in Ukraine, especially regarding the availability and cost of raw materials that are produced in this region and Europe in general. Management is also monitoring for signs of any expansion of economic or supply chain disruptions or broader supply chain inflationary costs resulting either directly or indirectly from the crisis in Eastern Europe. Factors contributing to the uncertainty described above, among other things, include (i) continued supply chain disruptions, including disruptions resulting from labor shortages and other cost pressures, (ii) changes to customer operations, (iii) a reversal in improving consumer purchasing and consumption behavior, and (iv) unforeseen business disruptions or other effects due to current global geopolitical tensions, including relating directly or indirectly to the Ukraine crisis.

Basis of Presentation

The consolidated financial statements have been prepared in accordance with U.S. Generally Accepted Accounting Principles (“GAAP”). The Company maintains its accounting records on a 52/53-week fiscal year, ending on the last Saturday in August.

The financial information presented within the Company’s consolidated financial statements has been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). The accompanying financial statements include Consolidated Balance Sheets for the periods ended August 27, 2022 and August 28, 2021. The remaining financial statements include the fifty-two weeks ended August 27, 2022, the fifty-two weeks ended August 28, 2021, and the fifty-two weeks ended August 29, 2020.

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All intercompany accounts and transactions have been eliminated. Unless the context otherwise requires, “we,” “us,” “our” and the “Company” refer to Simply Good Foods and its subsidiaries on a consolidated basis.

2. Summary of Significant Accounting Policies

Use of Estimates

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements. Estimates also affect the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Business Combination

On August 21, 2019, the Company's wholly-owned subsidiary Simply Good Foods USA, Inc., formerly known as Atkins Nutritionals, Inc., ("Simply Good USA") entered into a Stock and Unit Purchase Agreement (the "Purchase Agreement") to acquire Quest Nutrition, LLC ("Quest"), a healthy lifestyle food company (the "Quest Acquisition"). On November 7, 2019, Simply Good USA completed the Quest Acquisition via Simply Good USA's acquisition of 100% of the equity interests of Voyage Holdings, LLC, and VMG Quest Blocker, Inc. (the "Target Companies") for a cash purchase price of approximately \$1.0 billion subject to customary post-closing adjustments for the Target Companies' levels of cash, indebtedness, net working capital and transaction expenses as of the closing date.

The Quest Acquisition was accounted for using the acquisition method of accounting prescribed by ASC Topic 805, Business Combinations ("ASC 805"), whereby the results of operations, including the revenues and earnings of Quest, are included in the financial statements from the date of acquisition. Additionally, assets acquired and liabilities assumed were recognized at their fair values based on widely accepted valuation techniques in accordance with ASC Topic 820, Fair Value Measurements, as of the closing date. The process for estimating fair values requires the use of significant estimates, assumptions and judgments, including determining the timing and estimates of future cash flows and developing appropriate discount rates. ASC 805 establishes a measurement period to provide companies with a reasonable amount of time to obtain the information necessary to identify and measure various items in a business combination and cannot extend beyond one year from the acquisition date. The Company completed its final assessment of purchase price allocation for the Quest Acquisition to the estimated fair value of the net assets acquired at the date of acquisition during the first quarter of fiscal year 2021. Measurement period adjustments were recognized in the reporting period in which the adjustments were determined and calculated as if the accounting had been completed at the acquisition date.

Fair Value Measurements

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. Assets and liabilities are valued based upon observable and non-observable inputs. Valuations using Level 1 inputs are based on unadjusted quoted prices that are available in active markets for the identical assets or liabilities at the measurement date. Level 2 inputs utilize significant other observable inputs available at the measurement date, other than quoted prices included in Level 1. Valuations using Level 3 inputs are based on significant unobservable inputs that cannot be corroborated by observable market data and require significant judgment. There were no significant transfers between levels during any period presented.

Cash

Cash consists of cash on hand, deposits available on demand and other short-term, highly liquid investments with original maturities of three months or less.

Accounts Receivable, Net and Expected Credit Losses

Accounts receivable, net consists primarily of trade receivables, net of allowances for doubtful accounts, returns, and trade promotions. The Company sells its products for cash or on credit terms, which are established in accordance with local and industry practices and typically require payment within 30 days of delivery and may allow discounts for early payment. The Company estimates its allowance for doubtful accounts and the related expected credit loss based upon the Company's historical credit loss experience, adjusted for asset-specific risk characteristics, current economic conditions, and reasonable forecasts. Accounts receivable are written off when determined to be uncollectible.

Charges related to credit loss on accounts receivables from transactions with external customers were approximately \$0.1 million, \$0.6 million, and \$0.5 million for the fifty-two weeks ended August 27, 2022, August 28, 2021, and August 29, 2020, respectively. As of August 27, 2022 and August 28, 2021, the allowance for doubtful accounts was \$1.2 million and \$1.1 million, respectively. Additionally, as of August 27, 2022, the Company had an expected credit loss reserve of \$1.0 million on its \$3.0 million note receivable related to the SimplyProtein Sale, as defined in Note 5, Goodwill and Intangibles, of which \$0.5 million was recorded during each of the fifty-two weeks ended August 27, 2022 and August 28, 2021, respectively.

Inventories

Inventories are valued at the lower of cost or net realizable value on a first-in, first-out basis, adjusted for the value of inventory that is determined to be excess, obsolete, expired or unsaleable. Obsolete inventory is reserved at 50% for inventory four to six months from expiration, and 100% for items within three months of expiration. Reserves are also taken for certain products or packaging materials when it is determined their cost may not be recoverable.

Inventories, as presented with the Consolidated Balance Sheets, is summarized as follows:

<i>(In thousands)</i>	August 27, 2022	August 28, 2021
Finished goods	\$ 116,047	\$ 91,893
Raw materials	10,870	6,007
Reserve for obsolete inventory	(1,438)	(631)
Total inventories	<u>\$ 125,479</u>	<u>\$ 97,269</u>

Property and Equipment, Net

Property and equipment, net is stated at the allocated fair value for acquired assets. Additions to property and equipment are recorded at cost and depreciated on a straight-line basis over their estimated useful lives. The general ranges of estimated useful lives are:

Furniture and fixtures	7 years
Computer equipment, software and website development costs	3 - 5 years
Machinery and equipment	7 years
Office equipment	3 - 5 years

Leasehold improvements are amortized over the shorter of the remaining term of the lease or the useful life of the improvement utilizing the straight-line method.

The Company performs impairment tests for *Property and equipment, net* when circumstances indicate that the carrying value of the asset may not be recoverable. There were no indicators of impairment in the fifty-two weeks ended August 27, 2022, August 28, 2021, or August 29, 2020.

Goodwill and Intangible Assets, Net

Goodwill and Intangible assets, net result primarily from the consummation of the business combination between Conyers Park Acquisition Corp. and NCP-ATK Holdings, Inc. on July 7, 2017, which created the Company, and the Quest Acquisition. *Intangible assets* primarily includes brands and trademarks with indefinite lives and customer-related relationships with finite lives. Upon acquisition, the purchase price is first allocated to identifiable assets and liabilities, including customer-related intangible assets and trademarks, with any remaining purchase price recorded as *Goodwill*.

Goodwill and indefinite-lived intangible assets are not amortized but instead are tested for impairment at least annually, or more frequently if indicators of impairment exist. The Company conducts its annual impairment tests at the beginning of the fourth fiscal quarter. Goodwill and indefinite-lived intangible assets are assessed using either a qualitative or quantitative approach to determine whether it is more likely than not that the fair value of a reporting unit or an indefinite-lived intangible asset is less than its carrying amount. The qualitative assessment evaluates factors including macro-economic conditions, industry-specific and company-specific considerations, legal and regulatory environments, and historical performance. If the Company determines that it is more likely than not that the fair value of a reporting unit or an indefinite-lived intangible asset is less than its carrying value, a quantitative assessment is performed. Otherwise, no further assessment is required. The quantitative approach compares the estimated fair value of the reporting unit, including goodwill, or the indefinite-lived intangible asset to its carrying amount. Impairment is indicated if the estimated fair value of the reporting unit or indefinite-lived intangible asset is less than the carrying amount, and an impairment charge is recognized for the differential.

For fiscal year 2022, the Company performed a qualitative goodwill impairment assessment for its consolidated reporting unit and its indefinite-lived intangible assets. The qualitative assessments did not identify indicators of impairment, and it was determined that it was more likely than not the reporting unit and indefinite-lived intangibles had fair values in excess of their carrying values. Accordingly, no further impairment assessment was necessary, and the Company determined neither its reporting unit or any indefinite-lived intangibles were impaired. There were no impairment charges related to goodwill in the fifty-two weeks ended August 27, 2022 or since the inception of the Company. There were no impairment charges related to indefinite-lived intangibles recognized in the fifty-two weeks ended August 27, 2022 or August 28, 2021. There was a \$3.0 million loss on impairment of an indefinite-lived intangible related to the SimplyProtein brand in the fifty-two weeks ended August 29, 2020. Refer to Note 5, Goodwill and Intangibles for additional information regarding the Company's reporting units and impairment assessments.

Finite-lived intangible assets are amortized on a straight-line basis over their estimated useful lives. The Company reviews for impairment indicators of finite-lived intangibles and other long-lived assets as described in the “Property and Equipment, Net” significant accounting policy.

Deferred Financing Costs and Debt Discounts

Costs incurred in obtaining long-term financing paid to parties other than creditors are considered a deferred financing cost and are amortized over the terms of the long-term financing agreements using the effective-interest method. Amounts paid to creditors are recorded as a reduction in the proceeds received by the creditor and are considered a discount on the issuance of debt.

Income Taxes

Income taxes include federal, state and foreign taxes currently payable, and deferred taxes arising from temporary differences between income for financial reporting and income tax purposes. Deferred tax assets and liabilities are determined based on the differences between the financial statement balances and the tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the fiscal year that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to amounts expected to be realized.

Leases

Contracts are evaluated to determine whether they contain a lease at inception. Leases are classified as either finance leases or operating leases based on criteria in ASC Topic 842, Leases. The Company’s operating leases are generally comprised of real estate and certain equipment used in warehousing products. The Company’s finance leases are generally comprised of warehouse equipment.

Right-of-use assets and lease liabilities are recognized at the lease commencement date based on the present value of lease payments over the lease term. The majority of the Company’s leases do not provide an implicit rate; therefore, the Company uses its secured incremental borrowing rate based on the information available at the lease commencement date in determining the present value of future payments for those leases. The Company’s incremental borrowing rate for a lease is the rate of interest it would pay to borrow on a collateralized basis over a similar term to the lease in a similar economic environment. The Company applied incremental borrowing rates using a portfolio approach. Right-of-use assets also include any lease payments made and exclude lease incentives. Lease terms may include options to extend or terminate the lease when it is reasonably certain that the Company will exercise that option. The Company has elected not to recognize right-of-use assets and lease liabilities for short-term operating leases that have a term of one year or less.

The Company monitors for triggering events or conditions that require a reassessment of its leases. When the reassessment requires a re-measurement of the lease liability, a corresponding adjustment is made to the carrying amount of the right-of-use asset. Additionally, the Company reviewed for impairment indicators of its right-of-use assets and other long-lived assets as described in the “Property and Equipment, Net” significant accounting policy.

Warrant Accounting

The Company does not use derivative instruments to hedge exposures to cash flow, market, or foreign currency risks. The Company evaluates all of its financial instruments, including issued private placement stock purchase warrants, to determine if such instruments are derivatives or contain features that qualify as embedded derivatives, pursuant to ASC Topic 480, Distinguishing Liabilities from Equity, and ASC Topic 815-40, Derivatives and Hedging: Contracts in Entity’s Own Equity (“ASC 815-40”). The classification of derivative instruments, including whether such instruments should be recorded as liabilities or as equity, is assessed as part of this evaluation.

As of August 28, 2021, the Company had outstanding liability-classified private warrants that allowed holders to purchase 6,700,000 shares of the Company’s common stock (the “Private Warrants”). Such Private Warrants were held by Conyers Park Sponsor, LLC (“Conyers Park”), a related party. Each whole warrant entitled the holder to purchase one share of the Company’s common stock at a price of \$11.50 per share. On January 7, 2022, Conyers Park elected to exercise the Private Warrants in full on a cashless basis, resulting in a net issuance of 4,830,761 shares of the Company’s common stock. As a result of the cashless exercise on January 7, 2022, there were no outstanding liability-classified Private Warrants as of August 27, 2022.

During the reporting periods the Private Warrants were outstanding, they were precluded from equity classification, being liability-classified. The Company accounted for these Private Warrants as a derivative warrant liability in accordance with ASC 815-40. Accordingly, the Company recognized the Private Warrants as a liability at fair value and adjusted the Private Warrants to fair value at each reporting period through other income. The fair value adjustments were determined using a Black-Scholes option-pricing methodology (“Black-Scholes model”). The valuation was primarily based on observable market data while the related theoretical private

warrant volatility assumption within the Black-Scholes model represented a Level 3 measurement within the fair value measurement hierarchy. The periodic remeasurement of the Private Warrants was reflected in *(Loss) gain in fair value change of warrant liability* within the Consolidated Statements of Income and Comprehensive Income.

Revenue Recognition

The Company recognizes revenue when performance obligations under the terms of a contract with its customer are satisfied. The Company has determined that fulfilling and delivering products is a single performance obligation. Revenue is recognized at the point in time when the Company has satisfied its performance obligation and the customer has obtained control of the products. This generally occurs when the product is delivered to or picked up by the customer based on applicable shipping terms, which is typically within 30 days.

Revenue is measured as the amount of consideration expected to be received in exchange for fulfilled product orders, including estimates of variable consideration. The most common forms of variable consideration include trade promotions, such as consumer incentives, coupon redemptions and other marketing activities, allowances for unsaleable product, and any additional amounts where a distinct good or service cannot be identified or the value cannot be reasonably estimated. Trade promotions are recorded as a reduction to net sales with a corresponding reduction to accounts receivable at the time of revenue recognition for the underlying sale. The recognition of trade promotions requires management to make estimates regarding the volume of incentive that will be redeemed and their total cost. As of August 27, 2022 and August 28, 2021, the allowance for trade promotions was \$23.9 million and \$22.3 million, respectively.

Estimates of variable consideration are made using various information including historical data on performance of similar trade promotional activities, market data from IRI, and the Company's best estimate of current activity. The Company reviews these estimates regularly and makes revisions as necessary. Revisions can include changes for consideration paid to customers that lack sufficient evidence to support a distinct good or service assertion, or for which a reasonably estimable fair value cannot be determined, primarily related to the Company's assessments of cooperative advertising programs. Uncertainties related to the estimate of variable consideration are resolved in a short time frame and do not require any additional constraint on variable consideration. Adjustments to variable consideration are recognized in the period the adjustments are identified and have historically been insignificant. Revenue is recognized net of any taxes collected from customers and subsequently remitted to governmental authorities.

The Company provides standard assurance type warranties that its products will comply with all agreed-upon specifications. No services beyond an assurance type warranty are provided to customers. While customers generally have a right to return defective or non-conforming products, past experience has demonstrated that product returns have been immaterial. Customer remedies for defective or non-conforming products may include a refund or exchange. As a result, the right of return is estimated and recorded as a reduction in revenue at the time of sale, if necessary.

The Company's customer contracts identify product quantity, price and payment terms. Payment terms are granted consistent with industry standards. Although some payment terms may be more extended, the majority of the Company's payment terms are less than 60 days. As a result, revenue is not adjusted for the effects of a significant financing component. Amounts billed and due from customers are classified as *Accounts receivable, net* on the Consolidated Balance Sheets.

The Company utilizes third-party contract manufacturers for the manufacture of its products. The Company has evaluated whether it is the principal or agent in these relationships. The Company has determined that it is the principal in all cases, as it retains the responsibility for fulfillment and risk of loss, as well as establishes the price.

In accordance with ASC Topic 606, Revenue from Contracts with Customers, the Company has elected the practical expedient to expense the incremental costs to obtain a contract, because the amortization period would be less than one year, and the practical expedient for shipping and handling costs. Shipping and handling costs incurred to deliver products to customers are accounted for as fulfillment activities, rather than a promised service, and as such are included in *Cost of goods sold* in the Consolidated Statements of Income and Comprehensive Income.

Revenues from transactions with external customers for each of the Company's products would be impracticable to disclose and management does not view its business by product line. For revenue disaggregated by geographic area and brand refer to Note 15, Segment and Customer Information.

Cost of Goods Sold

Costs of goods sold represent costs directly related to the manufacture and distribution of the Company's products. Such costs include raw materials, co-manufacturing costs, packaging, shipping and handling, third-party distribution, and depreciation of distribution center equipment and leasehold improvements.

Shipping and Handling Costs

Shipping and handling costs include costs paid to third-party warehouse operators associated with delivering product to customers and depreciation and amortization of assets at the third-party warehouse. Shipping and handling costs are recognized in *Cost of goods sold*. Costs relating to products shipped to customers were \$91.7 million, \$66.5 million, and \$49.8 million for the fifty-two weeks ended August 27, 2022, August 28, 2021, and August 29, 2020, respectively.

Advertising Costs

Production costs related to television commercials are expensed when first aired. All other advertising costs are expensed when incurred or when the advertising service is received through *Selling and marketing*. Total advertising costs were \$84.3 million, \$74.9 million, and \$55.3 million for the fifty-two weeks ended August 27, 2022, August 28, 2021, and August 29, 2020, respectively.

Production costs related to television commercials not yet aired and prepaid advertising services not yet received are included in *Prepaid expenses* in the accompanying Consolidated Balance Sheets. As of August 27, 2022 and August 28, 2021, total prepaid advertising expenses were \$2.0 million and \$1.6 million, respectively.

Research and Development Activities

The Company's research and development activities primarily consist of generating and testing new product concepts, new flavors and packaging. The Company expenses research and development costs as incurred related to compensation, facility costs, consulting, and supplies. Research and development activities are primarily internal and associated costs are included in *General and administrative*. The Company's total research and development expenses were \$4.1 million, \$3.5 million, and \$4.0 million for the fifty-two weeks ended August 27, 2022, August 28, 2021, and August 29, 2020, respectively.

Share-Based Compensation

The Company uses share-based compensation, including stock options, restricted stock units, performance stock units, and stock appreciation rights, to provide long-term performance incentives for its employees, directors, and consultants of the Company. Share-based compensation is recognized on a straight-line basis over the requisite service period of the award based on their grant-date fair value. Forfeitures are recognized as they occur. Share-based compensation expense is included in *General and administrative*.

Defined Contribution Plan

The Company sponsors defined contribution plans to provide retirement benefits to its employees. The Company's 401(k) plan and similar plans for non-domestic employees are based on a portion of eligible pay up to a defined maximum. All matching contributions are made in cash. Expense associated with defined contribution plans was \$1.1 million, \$1.4 million, and \$1.3 million for the fifty-two weeks ended August 27, 2022, August 28, 2021, and August 29, 2020, respectively.

Foreign Currency Translation

For all foreign operations, the functional currency is the local currency. Assets and liabilities of these operations are translated into U.S. dollars using the exchange rate in effect at the end of each reporting period. Income statement accounts are translated at the average exchange rate prevailing during each reporting period. Translation adjustments are recorded as a component of *Other comprehensive income*. Gains or losses resulting from transactions in foreign currencies are included in *Other income (expense)*.

Recently Issued and Adopted Accounting Pronouncements

Recently Issued Accounting Pronouncements Not Yet Adopted

In March 2020, the Financial Accounting Standards Board (the "FASB") issued Accounting Standards Update ("ASU") 2020-04, Reference Rate Reform (Topic 848), Facilitation of the Effects of Reference Rate Reform on Financial Reporting, which provides optional guidance for a limited period of time to ease the potential burden in accounting for reference rate reform on financial reporting. The amendments in this ASU are effective for all entities and can be applied to contract modifications due to rate reform and eligible existing and new hedging relationships entered into between March 12, 2020 and December 31, 2022. The amendments of this ASU should be applied on a prospective basis.

On January 21, 2022, the Company entered into a repricing amendment (the “2022 Repricing Amendment”) to its credit agreement with Barclays Bank PLC and other parties (as amended to date, the “Credit Agreement”), as described in Note 7, Long-Term Debt and Line of Credit. In addition to replacing the London Interbank Offered Rate (“LIBOR”) as the Credit Agreement’s reference rate with the Secured Overnight Financing Rate (“SOFR”), the 2022 Repricing Amendment contemporaneously modified other terms that changed, or had the potential to change, the amount or timing of contractual cash flows as contemplated by the guidance in ASU 2020-04. As such, the contract modifications related to the 2022 Repricing Amendment were outside of the scope of the optional guidance in ASU 2020-04. The Company will continue to monitor the effects of rate reform, if any, on any new or amended contracts through December 31, 2022. The Company does not anticipate the amendments in this ASU will be material to its consolidated financial statements.

Recently Adopted Accounting Pronouncements

In December 2019, the FASB issued ASU 2019-12, Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes, which amends existing guidance related to the accounting for income taxes. This ASU was intended to simplify the accounting for income taxes by removing certain exceptions to the general principles of accounting for income taxes and to improve the consistent application of GAAP for other areas of accounting for income taxes by clarifying and amending existing guidance. The Company adopted this ASU as of the first day of fiscal year 2022. The adoption of this ASU did not have a material effect on the consolidated financial statements.

In October 2020, the FASB issued ASU 2020-10, Codification Improvements, which provided updates for technical corrections, clarifications to guidance, simplifications to wording or structure of guidance, and other minor improvements across various areas of accounting within GAAP. The Company adopted this ASU as of the first day of fiscal year 2022 on a prospective basis. The adoption of this ASU did not have a material effect on the consolidated financial statements.

No other new accounting pronouncement issued or effective during the fiscal year had or is expected to have a material effect on the Company’s consolidated financial statements.

3. Business Combination

On August 21, 2019, Simply Good USA entered into the Purchase Agreement to acquire Quest. On November 7, 2019, Simply Good USA completed the Quest Acquisition for a cash purchase price at closing of \$988.9 million subject to customary post-closing adjustments. Simply Good USA acquired Quest as a part of the Company’s vision to lead the nutritious snacking movement with trusted brands that offer a variety of convenient, innovative, great-tasting, better-for-you snacks and meal replacements. Quest is a healthy lifestyle food company offering a variety of bars, cookies, chips, ready-to-drink shakes and pizzas that compete in many of the attractive, fast growing sub-segments within the nutritional snacking category.

The Quest Acquisition was funded through a combination of cash, equity and debt financing. Total consideration paid on the closing date was \$988.9 million. Cash sources of funding included \$195.3 million of cash on hand, net proceeds of approximately \$350.0 million from an underwritten public offering of common stock, and \$443.6 million in new term loan debt. In the third fiscal quarter of 2020, the Company received a post-closing release from escrow of approximately \$2.1 million related to net working capital adjustments, resulting in a total net consideration paid of \$986.8 million. *Business transaction costs* within the Consolidated Statements of Income and Comprehensive Income for the fifty-two weeks ended August 29, 2020 was \$27.1 million, which included \$14.5 million of transaction advisory fees related to the Quest Acquisition, \$3.2 million of banker commitment fees, \$6.1 million of non-deferrable debt issuance costs related to the incremental term loan, and \$3.3 million of other costs, including legal, due diligence, and accounting fees.

Included in the transaction advisory fees paid for the Quest Acquisition was \$12.0 million paid to Centerview Partners LLC, an investment banking firm that served as the lead financial advisor to the Company for this transaction. Three members of the Company’s Board of Directors, Messrs. Kilts, West, and Ratzan, have business relationships with certain partners of Centerview Partners LLC (including relating to Centerview Capital Consumer, a private equity firm and affiliate of Conyers Park Sponsor LLC), but they are not themselves partners, executives or employees of Centerview Partners LLC, and Centerview Partners LLC is not a related party of the Company pursuant to applicable rules and policies. The advisory fee paid to Centerview Partners LLC represents approximately 1.2% of the total cash purchase price paid by the Company on the closing date of the Quest Acquisition. All transaction advisory fees relating to the Quest Acquisition were approved by the Company’s Audit Committee.

The following table sets forth the final purchase price allocation of the Quest Acquisition to the estimated fair value of the net assets acquired at the date of acquisition, in thousands:

Assets acquired:	
Cash and cash equivalents	\$ 4,745
Accounts receivable, net	25,359
Inventories	44,032
Prepaid assets	1,214
Other current assets	3,812
Property and equipment, net ⁽¹⁾	9,843
Intangible assets, net ⁽²⁾	868,375
Other long-term assets	20,997
Liabilities assumed:	
Accounts payable	25,200
Other current liabilities	11,237
Deferred income taxes ⁽³⁾	10,754
Other long-term liabilities	18,891
Total identifiable net assets	912,295
Goodwill ⁽⁴⁾	74,525
Total assets acquired and liabilities assumed	<u>\$ 986,820</u>

- ⁽¹⁾ Property and equipment, net primarily consisted of leasehold improvements for the Quest headquarters of \$6.9 million, furniture and fixtures of \$2.2 million, and equipment of \$0.7 million. The Quest headquarters lease ends in April 2029. The useful lives of the leasehold improvements, furniture and fixtures, and equipment are consistent with the Company's accounting policies.
- ⁽²⁾ Intangible assets were recorded at fair value consistent with ASC Topic 820, Fair Value Measurement, as a result of the Quest Acquisition. Intangible assets consisted of \$750.0 million of indefinite brands and trademarks, \$115.0 million of amortizable customer relationships, and \$3.4 million of internally developed software. The useful lives of the intangible assets are disclosed in Note 5 of the Consolidated Financial Statements. The fair value measurements of the assets and liabilities were based on significant inputs not observable in the market and thus represent Level 3 measurements within the fair value measurement hierarchy. Level 3 fair market values were determined using a variety of information, including estimated future cash flows and market comparable data and companies. The fair values of the intangible assets were estimated using inputs primarily from the income approach and the with/without method, which estimates the value using the cash flow impact in a hypothetical scenario where the customer relationships are not in place. The significant assumptions used in estimating the fair value of the intangible assets include the estimated life the asset will contribute to cash flows, profitability, and the estimated discount rate.
- ⁽³⁾ Primarily as a result of the fair value attributable to the identifiable intangible assets, the deferred income tax liability was \$10.8 million.
- ⁽⁴⁾ Goodwill was recorded at fair value consistent with ASC Topic 820, Fair Value Measurement, as a result of the Quest Acquisition. Amounts recorded for goodwill created in an acquisition structured as a stock purchase for tax are generally not expected to be deductible for tax purposes. Amounts recorded for goodwill resulting in a tax basis step-up are generally expected to be deductible for tax purposes. Tax deductible goodwill was estimated to be \$67.7 million. Goodwill represents the future economic benefits arising from other assets acquired that could not be individually identified and separately recognized.

The Company completed its final assessment of purchase price allocation for the Quest Acquisition to the estimated fair value of the net assets acquired at the date of acquisition during the first quarter of fiscal 2021. Since the initial preliminary estimates reported in the first fiscal quarter of 2020, the Company updated certain amounts reflected in the final purchase price allocation, as summarized in the fair values of assets acquired and liabilities assumed in the table above. Specifically, the carrying amount of the intangible assets, net increased by \$20.0 million as a result of valuation adjustments related to the Company's finalization of tax attributes, which also resulted in a decrease to deferred income taxes of \$3.2 million. Additionally, accounts receivable, net decreased \$4.3 million and inventories increased \$0.9 million due to fair value measurement period adjustments, and the carrying amount of property and equipment, net decreased by \$0.5 million to reflect its estimated fair value. As a result of these adjustments and the change in total net consideration paid of approximately \$2.1 million related to net working capital adjustments discussed above, goodwill decreased \$21.5 million. Measurement period adjustments were recognized in the reporting period in which the adjustments were determined and calculated as if the accounting had been completed at the acquisition date.

The results of Quest's operations have been included in the Company's consolidated financial statements since November 7, 2019, the date of acquisition. The following table provides net sales from the acquired Quest business included in the Company's results:

<i>(In thousands)</i>	52-Weeks Ended August 29, 2020
Net sales	286,803

Unaudited Pro Forma Financial Information

Pro forma financial information is not intended to represent or be indicative of the actual results of operations of the combined business that would have been reported had the Quest Acquisition been completed at the beginning of the fiscal year 2019, nor is it representative of future operating results of the Company.

The following unaudited pro forma combined financial information presents combined results of the Company and Quest as if the Quest Acquisition had occurred at the beginning of fiscal 2019:

<i>(In thousands)</i>	52-Weeks Ended August 29, 2020
Net sales	\$ 885,044
Gross profit	\$ 355,395
Net income	\$ 90,028

4. Property and Equipment, Net

Property and equipment, net, as presented with the Consolidated Balance Sheets, is summarized as follows:

<i>(In thousands)</i>	August 27, 2022	August 28, 2021
Furniture and fixtures	\$ 7,232	\$ 3,100
Computer equipment and software	1,432	1,093
Machinery and equipment	6,292	1,934
Leasehold improvements	9,883	8,219
Finance lease right-of-use-assets	1,185	1,185
Construction in progress	137	6,189
Property and equipment, gross	26,161	21,720
Less: accumulated depreciation	(8,004)	(5,136)
Property and equipment, net	\$ 18,157	\$ 16,584

Total depreciation expense was \$3.2 million for the fifty-two weeks ended August 27, 2022, \$2.3 million for the fifty-two weeks ended August 28, 2021, and \$1.8 million for the fifty-two weeks ended August 29, 2020.

5. Goodwill and Intangibles

Changes to *Goodwill* during the fifty-two weeks ended August 27, 2022 and the fifty-two weeks ended August 28, 2021 were as follows:

<i>(In thousands)</i>	Goodwill
Balance as of August 29, 2020	\$ 544,774
Acquisition of business measurement period adjustments	1,178
Sale of business	(2,818)
Balance as of August 28, 2021	\$ 543,134
Balance as of August 27, 2022	\$ 543,134

The change in *Goodwill* attributed to the acquisition of a business during the fifty-two weeks ended August 28, 2021 was the result of subsequent measurement period adjustments made to finalize the acquisition method of accounting for the Quest Acquisition as described in Note 3, Business Combination. Additionally, effective September 24, 2020, the Company sold the assets exclusively related to its SimplyProtein® brand of products for approximately \$8.8 million of consideration, including cash of \$5.8 million and a note receivable for \$3.0 million, to a newly formed entity led by the Company’s former Canadian-based management team who had been responsible for this brand prior to the sale transaction (the “SimplyProtein Sale”). In addition to purchasing these assets, the buyer assumed certain liabilities related to the SimplyProtein brand’s business. There was no gain or loss recognized as a result of the SimplyProtein Sale. In conjunction with the SimplyProtein Sale, the Company disposed of \$2.8 million of goodwill associated with the SimplyProtein business.

During the fifty-two weeks ended August 27, 2022, the Company substantially completed its efforts to fully integrate its operations and organization structure after the Quest Acquisition. The Company aligned the nature of its production processes and the methods used to distribute products to customers for the Atkins® and Quest® brands. The Company also designed its organizational structure to support entity-wide business functions across brands, products, customers, and geographic regions. Additionally, the Company’s chief operating decision maker reviews operating results and forecasts at the consolidated level. As a result, the Company determined its operations are organized into one, consolidated operating segment and reporting unit. Previously, during the fifty-two weeks ended August 28, 2021 and August 29, 2020, the Company had two reporting units which were its operating segments, Atkins and Quest.

For fiscal year 2022, the Company performed a qualitative goodwill impairment assessment for its consolidated reporting unit. The qualitative assessment did not identify indicators of impairment, and it was determined that it was more likely than not the reporting unit had a fair value in excess of its carrying value. Accordingly, no further impairment assessment was necessary, and the Company determined its reporting unit was not impaired. There were no impairment charges related to goodwill in the fifty-two weeks ended August 27, 2022 or since the inception of the Company.

Intangible assets, net in the Consolidated Balance Sheets consist of the following:

<i>(In thousands)</i>	Useful life	August 27, 2022		
		Gross carrying amount	Accumulated amortization	Net carrying amount
Intangible assets with indefinite life:				
Brands and trademarks	Indefinite life	\$ 974,000	\$ —	\$ 974,000
Intangible assets with finite lives:				
Customer relationships	15 years	\$ 174,000	\$ 41,703	\$ 132,297
Licensing agreements	13 years	22,000	8,581	13,419
Proprietary recipes and formulas	7 years	7,000	5,131	1,869
Software and website development costs	3 - 5 years	5,863	4,190	1,673
		<u>\$ 1,182,863</u>	<u>\$ 59,605</u>	<u>\$ 1,123,258</u>

<i>(In thousands)</i>	Useful life	August 28, 2021		
		Gross carrying amount	Accumulated amortization	Net carrying amount
Intangible assets with indefinite life:				
Brands and trademarks	Indefinite life	\$ 974,000	\$ —	\$ 974,000
Intangible assets with finite lives:				
Customer relationships	15 years	\$ 174,000	\$ 30,103	\$ 143,897
Licensing agreements	13 years	22,000	6,664	15,336
Proprietary recipes and formulas	7 years	7,000	4,131	2,869
Software and website development costs	3 - 5 years	5,560	2,924	2,636
Intangible assets in progress	3 - 5 years	303	—	303
		<u>\$ 1,182,863</u>	<u>\$ 43,822</u>	<u>\$ 1,139,041</u>

Changes in *Intangible assets, net* during the fifty-two weeks ended August 27, 2022 were primarily related to recurring amortization expense. Changes in *Intangible assets, net* during the fifty-two weeks ended August 28, 2021 were primarily related to the SimplyProtein Sale and recurring amortization expense. In conjunction with the SimplyProtein Sale, the Company sold its SimplyProtein brand intangible asset, which had a carrying value of approximately \$5.0 million as of the date of the sale.

During the fifty-two weeks ended August 27, 2022, the Company performed qualitative impairment assessments for its indefinite-lived intangible assets. The qualitative assessments did not identify indicators of impairment, and it was determined that it was more likely than not each indefinite-lived intangible asset had fair values in excess of their carrying values. Accordingly, no further impairment assessment was necessary. There were no impairment charges related to indefinite-lived intangibles recognized in the fifty-two weeks ended August 27, 2022 or August 28, 2021, respectively. There was a \$3.0 million loss on impairment of an indefinite-lived intangible related to the SimplyProtein brand in the fifty-two weeks ended August 29, 2020.

During the fifty-two weeks ended August 27, 2022, the Company did not identify indicators of impairment related to its finite-lived intangible assets, which are tested for impairment when events or circumstances indicated that the carrying amount may not be recoverable. There were no impairment charges related to the Company's finite-lived intangible assets in the fifty-two weeks ended August 27, 2022, August 28, 2021, or August 29, 2020, respectively.

Amortization expense related to intangible assets was \$15.8 million for the fifty-two weeks ended August 27, 2022, \$15.6 million for the fifty-two weeks ended August 28, 2021, and \$14.0 million for the fifty-two weeks ended August 29, 2020.

Estimated future amortization for each of the next five fiscal years and thereafter is as follows:

<i>(In thousands)</i>	Amortization
2023	\$ 15,658
2024	14,917
2025	13,518
2026	13,517
2027	13,517
Thereafter	78,131
Total	<u>\$ 149,258</u>

6. Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities in the Consolidated Balance Sheets were comprised of the following:

<i>(In thousands)</i>	August 27, 2022	August 28, 2021
Accrued professional fees	\$ 1,039	\$ 2,124
Accrued advertising allowances and claims	3,856	4,309
Accrued bonus expenses	12,761	16,689
Accrued freight expenses	2,065	2,812
Accrued payroll-related expenses	1,995	1,871
Accrued commissions	1,422	1,909
Income taxes payable	223	9,020
VAT payable	5,171	4,386
Accrued restructuring	—	851
Accrued capital expenditures	350	788
Other accrued expenses	4,544	5,059
Current operating lease liabilities	6,249	3,788
Accrued expenses and other current liabilities	<u>\$ 39,675</u>	<u>\$ 53,606</u>

7. Long-Term Debt and Line of Credit

On July 7, 2017, the Company entered into a credit agreement with Barclays Bank PLC and other parties (as amended to date, the "Credit Agreement"). The Credit Agreement at that time provided for (i) a term facility of \$200.0 million ("Term Facility") with a seven-year maturity and (ii) a revolving credit facility of up to \$75.0 million (the "Revolving Credit Facility") with a five-year maturity. Substantially concurrent with the consummation of the business combination which formed the Company between Conyers Park Acquisition Corp. and NCP-ATK Holdings, Inc. on July 7, 2017, the full \$200.0 million of the Term Facility (the "Term Loan") was drawn.

On November 7, 2019, the Company entered into a second amendment (the “Incremental Facility Amendment”) to the Credit Agreement to increase the principal borrowed on the Term Facility by \$460.0 million. The Term Facility together with the incremental borrowing make up the Initial Term Loans (as defined in the Incremental Facility Amendment). The Incremental Facility Amendment was executed to partially finance the acquisition of Quest Nutrition, LLC on November 7, 2019. No amounts under the Term Facility were repaid as a result of the execution of the Incremental Facility Amendment.

Effective as of December 16, 2021, the Company entered into a third amendment (the “Extension Amendment”) to the Credit Agreement. The Extension Amendment provided for an extension of the stated maturity date of the Revolving Commitments and Revolving Loans (each as defined in the Credit Agreement) from July 7, 2022 to the earlier of (i) 91 days prior to the maturity date of the Initial Term Loans on July 7, 2024 and (ii) December 16, 2026.

On January 21, 2022, the Company entered into a repricing amendment (the “2022 Repricing Amendment”) to the Credit Agreement. The 2022 Repricing Amendment, among other things, (i) reduced the interest rate per annum applicable to the Initial Term Loans outstanding under the Credit Agreement immediately prior to the effective date of the 2022 Repricing Amendment, (ii) reset the prepayment premium for the existing Initial Term Loans to apply to Repricing Transactions (as defined in the Credit Agreement) that occur within six months after the effective date of the 2022 Repricing Amendment, and (iii) implemented the Secured Overnight Financing Rate (“SOFR”) and related replacement provisions for the London Interbank Offered Rate (“LIBOR”).

Effective as of the 2022 Repricing Amendment dated January 21, 2022, the interest rate per annum is based on either:

- i. A base rate equaling the higher of (a) the “prime rate,” (b) the federal funds effective rate plus 0.50%, or (c) the Adjusted Term SOFR Rate (as defined in the Credit Agreement) applicable for an interest period of one month plus 1.00% plus (x) 2.25% margin for the Term Loan or (y) 2.00% margin for the Revolving Credit Facility; or
- ii. SOFR plus a credit spread adjustment equal to 0.10% for one-month SOFR, 0.15% for up to three-month SOFR and 0.25% for up to six-month SOFR, subject to a floor of 0.50%, plus (x) 3.25% margin for the Term Loan or (y) 3.00% margin for the Revolving Credit Facility.

The Simply Good Foods Company is not a borrower under the Credit Agreement and has not provided a guarantee of the Credit Agreement. Simply Good Foods USA, Inc., is the administrative borrower and certain other subsidiary holding companies are co-borrowers under the Credit Agreement. Each of the Company’s domestic subsidiaries that is not a named borrower under the Credit Agreement has provided a guarantee on a secured basis. As security for the payment or performance of the debt under the Credit Agreement, the borrowers and the guarantors have pledged certain equity interests in their respective subsidiaries and granted the lenders a security interest in substantially all of their domestic assets. All guarantors other than Quest Nutrition, LLC are holding companies with no assets other than their investments in their respective subsidiaries.

The Credit Agreement contains certain financial and other covenants that limit the Company’s ability to, among other things, incur and/or undertake asset sales and other dispositions, liens, indebtedness, certain acquisitions and investments, consolidations, mergers, reorganizations and other fundamental changes, payment of dividends and other distributions to equity and warrant holders, and prepayments of material subordinated debt, in each case, subject to customary exceptions materially consistent with credit facilities of such type and size. The Revolving Credit Facility has a maximum total net leverage ratio equal to or less than 6.00:1.00 contingent on credit extensions in excess of 30% of the total amount of commitments available under the Revolving Credit Facility. Any failure to comply with the restrictions of the credit facilities may result in an event of default. The Company was in compliance with all financial covenants as of August 27, 2022 and August 28, 2021, respectively.

Long-term debt consists of the following:

<i>(In thousands)</i>	August 27, 2022	August 28, 2021
Term Facility (effective rate of 6.2% at August 27, 2022)	\$ 406,500	\$ 456,500
Finance lease liabilities (effective rate of 5.6% at August 27, 2022)	406	690
Less: Deferred financing fees	3,620	5,636
Total debt	403,286	451,554
Less: Current finance lease liabilities	264	285
Long-term debt, net of deferred financing fees	<u>\$ 403,022</u>	<u>\$ 451,269</u>

As of August 27, 2022, the Company had letters of credit in the amount of \$3.5 million outstanding. These letters of credit offset against the \$75.0 million availability of the Revolving Credit Facility and exist to support three of the Company’s leased buildings and insurance programs relating to workers’ compensation. No amounts were drawn against these letters of credit at August 27, 2022.

The Company is not required to make principal payments on the Term Facility over the twelve months following the period ended August 27, 2022. The outstanding balance of the Term Facility is due upon its maturity in July 2024.

As of August 27, 2022, aggregate principal maturities of debt for each of the next five fiscal years and thereafter are as follows:

<i>(In thousands)</i>	Principal maturities
2023	\$ 264
2024	406,642
2025	—
2026	—
2027	—
Thereafter	—
Total debt	<u>\$ 406,906</u>

The Company utilizes market approaches to estimate the fair value of certain outstanding borrowings by discounting anticipated future cash flows derived from the contractual terms of the obligations and observable market interest and foreign exchange rates. The Company carries debt at historical cost and discloses fair value. As of August 27, 2022 and August 28, 2021, the book value of the Company's debt approximated fair value. The estimated fair value of the Term Loan is valued based on observable inputs and classified as Level 2 in the fair value hierarchy.

8. Fair Value of Financial Instruments

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. To increase the comparability of fair value measurements, a three-tier fair value hierarchy, which prioritizes the inputs used in the valuation methodologies, is used:

Level 1 – Valuations based on quoted prices for identical assets and liabilities in active markets.

Level 2 – Valuations based on observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets and liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data.

Level 3 – Valuations based on unobservable inputs reflecting the Company's own assumptions, consistent with reasonably available assumptions made by other market participants. These valuations require significant judgment.

Level 3 Measurements

As of August 28, 2021, the Company had outstanding liability-classified Private Warrants that allowed holders to purchase 6,700,000 shares of the Company's common stock. Such Private Warrants were held by Conyers Park Sponsor, LLC ("Conyers Park"), a related party. On January 7, 2022, Conyers Park elected to exercise the Private Warrants in full on a cashless basis, resulting in a net issuance of 4,830,761 shares of the Company's common stock. As a result of Conyers Park's election to exercise the Private Warrants, there were no outstanding liability-classified Private Warrants as of August 27, 2022. Refer to Note 12, Stockholders' Equity, for additional details regarding the cashless exercise of the Private Warrants.

The Company utilized the Black-Scholes model to estimate the fair value of the Private Warrants at each reporting date. The application of the Black-Scholes model utilizes significant assumptions, including volatility. Significant judgment is required in determining the expected volatility, historically the key assumption, of the Private Warrants. In order to determine the most accurate measure of this volatility, the Company measured expected volatility based on several inputs, including considering a peer group of publicly traded companies, the Company's implied volatility based on traded options, the implied volatility of comparable warrants, and the implied volatility of any outstanding public warrants during the periods they were outstanding. As a result of the unobservable inputs that were used to determine the expected volatility of the Private Warrants, the fair value measurement of these warrants reflected a Level 3 measurement within the fair value measurement hierarchy.

There were no Private Warrants outstanding as of August 27, 2022. As of August 28, 2021 and August 29, 2020, the Company had 6,700,000 Private Warrants outstanding with a fair value price per Private Warrant of \$23.86 and \$13.98, respectively.

The table below summarizes the inputs used to calculate the fair value of the warrant liability at each of the following reporting dates:

	August 28, 2021	August 29, 2020
Exercise price	\$ 11.50	\$ 11.50
Stock price	\$ 35.35	\$ 25.39
Dividend yield	— %	— %
Expected term (in years)	0.86	1.85
Risk-free interest rate	0.06 %	0.14 %
Expected volatility	21.70 %	29.20 %
Per share value of warrants	\$ 23.86	\$ 13.98

The periodic remeasurement of the warrant liability has been reflected in *(Loss) gain in fair value change of warrant liability* within the Consolidated Statements of Income and Comprehensive Income. The adjustments for the fifty-two weeks ended August 27, 2022, August 28, 2021, and August 29, 2020 resulted in a loss of \$30.1 million, a loss of \$66.2 million and a gain of \$30.9 million, respectively.

There were no transfers of financial instruments between the three levels of the fair value hierarchy during the fiscal years ended August 27, 2022, August 28, 2021, and August 29, 2020, respectively.

9. Income Taxes

The sources of income before income taxes are as follows:

<i>(In thousands)</i>	52-Weeks Ended August 27, 2022	52-Weeks Ended August 28, 2021	52-Weeks Ended August 29, 2020
Domestic	\$ 148,080	\$ 79,526	\$ 78,418
Foreign	2,489	1,334	546
Total income before income taxes	<u>\$ 150,569</u>	<u>\$ 80,860</u>	<u>\$ 78,964</u>

Income tax expense was comprised of the following:

<i>(In thousands)</i>	52-Weeks Ended August 27, 2022	52-Weeks Ended August 28, 2021	52-Weeks Ended August 29, 2020
Current:			
Federal	\$ 22,733	\$ 23,225	\$ 3,056
State and local	6,226	5,800	1,835
Foreign	1,247	1,552	219
Total current expense	<u>\$ 30,206</u>	<u>\$ 30,577</u>	<u>\$ 5,110</u>
Deferred:			
Federal	\$ 11,218	\$ 5,982	\$ 6,747
State and local	1,614	3,096	1,637
Foreign	(1,043)	325	(168)
Total deferred income tax expense	<u>11,789</u>	<u>9,403</u>	<u>8,216</u>
Total tax expense	<u>\$ 41,995</u>	<u>\$ 39,980</u>	<u>\$ 13,326</u>

A reconciliation of the federal statutory income tax rate to the effective income tax rate is as follows:

<i>(In thousands)</i>	52-Weeks Ended August 27, 2022	52-Weeks Ended August 28, 2021	52-Weeks Ended August 29, 2020
Statutory income tax expense:	21.0 %	21.0 %	21.0 %
Change in fair value of warrant liabilities	5.0	20.5	(10.8)
State income tax expense, net of federal	4.2	4.3	5.0
Valuation allowance	(1.5)	(1.2)	(1.2)
Taxes on foreign income above the U.S. tax	1.3	1.6	0.1
Change in tax rate	(0.2)	1.8	1.5
Non-deductible transaction costs	—	—	0.1
Other permanent items	(1.9)	1.4	1.2
Income tax expense	<u>27.9 %</u>	<u>49.4 %</u>	<u>16.9 %</u>

The tax effects of temporary differences that gave rise to significant portions of the deferred tax assets and liabilities at August 27, 2022 and August 28, 2021 were as follows:

<i>(In thousands)</i>	August 27, 2022	August 28, 2021
Deferred tax assets		
Accounts receivable allowances	\$ 1,519	\$ 2,353
Inventories write-downs	277	71
Accrued expenses	4,330	4,089
Net operating loss carryforwards	149	2,394
Share-based compensation	3,430	3,265
Tax credits	86	173
Lease liabilities	12,733	12,271
Other	5,985	5,665
Deferred tax assets	<u>28,509</u>	<u>30,281</u>
Valuation allowance	—	(2,218)
Deferred tax asset, net of valuation allowance	<u>\$ 28,509</u>	<u>\$ 28,063</u>
Deferred tax liabilities:		
Prepaid expense	\$ (699)	\$ (748)
Excess tax over book depreciation	(3,776)	(2,121)
Website development costs	(403)	(659)
Intangible assets	(116,682)	(105,997)
Lease right-of-use assets	(11,660)	(11,709)
Other	(833)	(584)
Deferred tax liabilities	<u>(134,053)</u>	<u>(121,818)</u>
Net deferred tax liabilities	<u>\$ (105,544)</u>	<u>\$ (93,755)</u>

The Company had state net operating loss carryforwards of \$2.1 million and \$2.5 million and foreign net operating losses of \$0.0 million and \$9.4 million at August 27, 2022 and August 28, 2021, respectively. The state net operating loss carryforwards will begin to expire in 2029.

As of August 27, 2022, the Company has no valuation allowances on its deferred tax assets. The Company had previously recorded a valuation allowance of \$2.2 million on deferred tax assets related to foreign net operating loss carryforwards generated within the United Kingdom and the Netherlands. As of August 27, 2022, the Company no longer had operations in either jurisdiction. Accordingly, during the fifty-two weeks ended August 27, 2022, the Company wrote off the United Kingdom and Netherlands net operating loss carryforwards and the corresponding \$2.2 million valuation allowance as the net operating loss carryforwards were no longer utilizable.

As of August 27, 2022, the Company does not intend to indefinitely reinvest its foreign earnings within its subsidiary in Canada and has not recognized any tax liabilities related to this jurisdiction. It is the Company's intention to reinvest the earnings of its other non-U.S. subsidiaries in its Australia and New Zealand operations. As of August 27, 2022, the Company has not made a provision for U.S. or additional foreign withholding taxes for any outside basis differences inherent in its investments in foreign subsidiaries that are indefinitely reinvested. It is not practicable to estimate the amount of deferred tax liability related to investments in these foreign subsidiaries.

As of August 27, 2022 and August 28, 2021, the Company has no unrecognized tax benefits.

The Company records interest and penalties associated with unrecognized tax benefits as a component of tax expense. As of August 27, 2022 and August 28, 2021, the Company has not accrued interest or penalties on unrecognized tax benefits, as there is no position recorded as of these fiscal years. No changes to the uncertain tax position balance are anticipated within the next 12 months, and are not expected to materially affect the financial statements.

As of August 27, 2022, tax years 2016 to 2021 remain subject to examination in the United States and the tax years 2016 to 2021 remain subject to examination in other major foreign jurisdictions where the Company conducts business. State income tax returns are generally subject to examination for a period of three to five years after the filing of the respective return.

10. Leases

The components of lease expense were as follows.

<i>(In thousands)</i>	Statement of Operations Caption	52-Weeks Ended August 27, 2022	52-Weeks Ended August 28, 2021	52-Weeks Ended August 29, 2020
Operating lease cost:				
Lease cost	<i>Cost of goods sold and General and administrative</i>	\$ 9,077	\$ 6,752	\$ 5,242
Variable lease cost ⁽¹⁾	<i>Cost of goods sold and General and administrative</i>	3,068	1,681	1,648
Total operating lease cost		\$ 12,145	\$ 8,433	\$ 6,890
Short-term lease cost				
	<i>General and administrative</i>	\$ —	\$ —	\$ 30
Finance lease cost:				
Amortization of right-of use assets	<i>Cost of goods sold</i>	\$ 273	\$ 273	\$ 273
Interest on lease liabilities	<i>Interest expense</i>	30	45	60
Total finance lease cost		\$ 303	\$ 318	\$ 333
Total lease cost				
		\$ 12,448	\$ 8,751	\$ 7,253

⁽¹⁾ Variable lease cost primarily consists of common area maintenance, such as cleaning and repairs.

In conjunction with the Company's restructuring activities as discussed in Note 16, Restructuring and Related Charges, the Company recorded an immaterial gain on lease termination related to its lease in the Netherlands in the fifty-two weeks ended August 27, 2022 and a \$0.5 million impairment charge, net of a gain on lease termination, related to its leases in Toronto, Ontario and the Netherlands in the fifty-two weeks ended August 28, 2021. The effect of these restructuring activities has been included within *General and administrative* on the Consolidated Statements of Income and Comprehensive Income. Refer to Note 16, Restructuring and Related Charges, for additional information regarding restructuring activities.

The right-of-use assets and corresponding liabilities related to both operating and finance leases are as follows:

<i>(In thousands)</i>	Balance Sheets Caption	August 27, 2022	August 28, 2021
Assets			
Operating lease right-of-use assets	<i>Other long-term assets</i>	\$ 46,460	\$ 46,197
Finance lease right-of-use assets	<i>Property and equipment, net</i>	367	640
Total lease assets		<u>\$ 46,827</u>	<u>\$ 46,837</u>
Liabilities			
Current:			
Operating lease liabilities	<i>Accrued expenses and other current liabilities</i>	\$ 6,249	\$ 3,788

Operating lease liabilities	<i>Other long-term liabilities</i>	44,482	44,892
Finance lease liabilities	<i>Long-term debt, less current maturities</i>	142	405
Total lease liabilities		<u>\$ 51,137</u>	<u>\$ 49,370</u>

Future maturities of lease liabilities as of August 27, 2022 were as follows:

<i>(In thousands)</i>	Operating Leases	Finance Leases
Fiscal year ending:		
2023	\$ 8,452	\$ 278
2024	9,424	145
2025	8,680	—
2026	6,880	—
2027	7,036	—
Thereafter	19,848	—
Total lease payments	60,320	423
Less: Interest	(9,589)	(17)
Present value of lease liabilities	<u>\$ 50,731</u>	<u>\$ 406</u>

The weighted-average remaining lease terms and weighted-average discount rates for operating and finance leases were as follows:

	August 27, 2022	August 28, 2021
Weighted-average remaining lease term (in years)		
Operating leases	7.27	8.38
Finance leases	1.51	2.44
Weighted-average discount rate		
Operating leases	4.7 %	4.9 %
Finance leases	5.6 %	5.6 %

Supplemental and other information related to leases was as follows:

<i>(In thousands)</i>	52-Weeks Ended August 27, 2022	52-Weeks Ended August 28, 2021	52-Weeks Ended August 29, 2020
Cash paid for amounts included in the measurement of lease liabilities			
Operating cash flows from operating leases	\$ 9,656	\$ 7,622	\$ 6,534
Operating cash flows from finance leases	\$ 631	\$ 37	\$ 18
Financing cash flows from finance leases	\$ 313	\$ 314	\$ 338

11. Commitments and Contingencies

Litigation

The Company is a party to certain litigation and claims that are considered normal to the operations of the business. From time to time, the Company has been and may again become involved in legal proceedings arising in the ordinary course of business. The Company is not presently a party to any litigation that it believes to be material, and the Company is not aware of any pending or threatened litigation against it that its management believes could have a material adverse effect on its business, operating results, financial condition or cash flows.

During the fifty-two weeks ended August 28, 2021, the Company received a \$5.0 million gain on a legal settlement, which has been presented as an item within *Other income (expense)* in the Consolidated Statements of Income and Comprehensive Income.

Other

The Company enters into endorsement contracts with certain celebrity figures and social media influencers to promote and endorse the Atkins® and Quest® brands and product lines. These contracts contain endorsement fees, which are expensed ratably over the life of the contract, and performance fees, that are recognized at the time of achievement. Based on the terms of contracts in place and achievement of performance conditions as of August 27, 2022, the Company will be required to make payments of \$0.9 million over the next year.

12. Stockholders' Equity

Public Equity Offering

On October 9, 2019, the Company completed an underwritten public offering of 13,379,205 shares of common stock at a price to the public of \$26.35 per share. The Company paid underwriting discounts and commissions of \$0.19 per share resulting in net proceeds to the Company of \$26.16 per share, or approximately \$350.0 million (the "Offering"). The Company paid \$0.8 million for legal, accounting and registrations fees related to the Offering. The net proceeds were used to pay a portion of the purchase price and related fees and expenses for the Quest Acquisition.

Warrants to Purchase Common Stock

As of August 28, 2021, the Company had outstanding liability-classified Private Warrants that allowed holders to purchase 6,700,000 shares of the Company's common stock. Such Private Warrants were held by Conyers Park, a related party. Each whole warrant entitled the holder to purchase one share of the Company's common stock at a price of \$11.50 per share. On January 7, 2022, Conyers Park elected to exercise the Private Warrants in full on a cashless basis, resulting in a net issuance of 4,830,761 shares of the Company's common stock. As a result of the cashless exercise on January 7, 2022, there were no outstanding liability-classified Private Warrants as of August 27, 2022.

As discussed in Note 8, Fair Value of Financial Instruments, the liability-classified warrants were remeasured on a recurring basis, primarily based on observable market data while the related theoretical private warrant volatility assumption within the Black-Scholes model represents a Level 3 measurement within the fair value measurement hierarchy. The periodic fair value remeasurements of the warrant liability, including the cashless exercise and the settlement of the warrant liability, have been reflected in *(Loss) gain in fair value change of warrant liability* within the Consolidated Statements of Income and Comprehensive Income.

Stock Repurchase Program

The Company adopted a \$50.0 million stock repurchase program on November 13, 2018. On April 13, 2022, the Company announced that its Board of Directors had approved the addition of \$50.0 million to its stock repurchase program, resulting in authorized stock repurchases of up to an aggregate of \$100.0 million. Under the stock repurchase program, the Company may repurchase shares from time to time in the open market or in privately negotiated transactions. The stock repurchase program does not obligate the Company to acquire any specific number of shares or acquire shares over any specific period of time. The stock repurchase program may be suspended or discontinued at any time by the Company and does not have an expiration date.

During the fifty-two weeks ended August 27, 2022, the Company repurchased 1,720,520 shares of common stock at an average share price of \$34.79 per share. The Company did not repurchase any shares of common stock during the fifty-two weeks ended August 28, 2021 or August 29, 2020. As of August 27, 2022, approximately \$38.0 million remained available under the stock repurchase program.

Accumulated Other Comprehensive Loss

During the fifty-two weeks ended August 27, 2022, the Company recognized a foreign currency translation gain of \$1.1 million related to the liquidation of a foreign subsidiary. The gain is reflected as a component of *Other income (expense)* in *Gain (loss) on foreign currency transactions* within the Consolidated Statements of Income and Comprehensive Income.

13. Earnings Per Share

Basic earnings or loss per share is based on the weighted average number of common shares issued and outstanding. In computing diluted earnings per share, basic earnings per share is adjusted for the assumed issuance of all potentially dilutive securities, including the Company's employee stock options, non-vested stock units, and Private Warrants for the periods during which they were outstanding. During periods when the effect of the outstanding Private Warrants was dilutive, the Company assumed share settlement of the instruments as of the beginning of the reporting period and adjusted the numerator to remove the change in fair value of the warrant liability and adjusted the denominator to include the dilutive shares, calculated using the treasury stock method. During periods when the effect of the outstanding Private Warrants was anti-dilutive, the share settlement was excluded.

In periods in which the Company has a net loss, diluted loss per share is based on the weighted average number of common shares issued and outstanding as the effect of including common stock equivalents outstanding would be anti-dilutive.

The following table reconciles the numerators and denominators used in the computations of both basic and diluted earnings per share:

<i>(In thousands, except share and per share data)</i>	52-Weeks Ended August 27, 2022	52-Weeks Ended August 28, 2021	52-Weeks Ended August 29, 2020
Basic earnings per share computation:			
Numerator:			
Net income available to common stock stockholders	\$ 108,574	\$ 40,880	\$ 65,638
Denominator:			
Weighted average common shares outstanding – basic	98,754,913	95,743,413	93,968,953
Basic earnings per share from net income	<u>\$ 1.10</u>	<u>\$ 0.43</u>	<u>\$ 0.70</u>
Diluted earnings per share computation:			
Numerator:			
Net income available to common stock stockholders	\$ 108,574	\$ 40,880	\$ 65,638
Gain in fair value change of warrant liability	—	—	(30,938)
Numerator for diluted earnings per share	<u>\$ 108,574</u>	<u>\$ 40,880</u>	<u>\$ 34,700</u>
Denominator:			
Weighted average common shares outstanding – basic	98,754,913	95,743,413	93,968,953
Private Warrants	—	—	3,327,656
Employee stock options	1,578,329	1,311,889	1,001,542
Non-vested stock units	255,914	310,296	45,571
Weighted average common shares – diluted	<u>100,589,156</u>	<u>97,365,598</u>	<u>98,343,722</u>
Diluted earnings per share from net income	<u>\$ 1.08</u>	<u>\$ 0.42</u>	<u>\$ 0.35</u>

Diluted earnings per share calculations for the fifty-two weeks ended August 27, 2022 and August 28, 2021 excluded 0.7 million and 4.1 million shares, issuable upon exercise of Private Warrants, respectively, that would have been anti-dilutive.

Diluted earnings per share calculations for the fifty-two weeks ended August 27, 2022, August 28, 2021, and August 29, 2020 excluded 0.3 million shares, an immaterial number of shares, and 0.6 million shares of common stock issuable upon exercise of stock options, respectively, that would have been anti-dilutive.

Diluted earnings per share calculations for the fifty-two weeks ended August 27, 2022, August 28, 2021, and August 29, 2020 excluded an immaterial number of non-vested stock units that would have been anti-dilutive.

14. Omnibus Incentive Plan

Stock-based compensation includes stock options, restricted stock units, performance stock unit awards, and stock appreciation rights, which are awarded to employees, directors, and consultants of the Company. Stock-based compensation expense is recognized on a straight-line basis over the requisite service period of the award based on its grant date fair value. Stock-based compensation expense is included within *General and administrative* expense, which is the same financial statement caption where the recipient's other compensation is reported.

For the fifty-two weeks ended August 27, 2022, August 28, 2021, and August 29, 2020, the Company recorded stock-based compensation expense of \$11.7 million, \$8.3 million, and \$7.6 million, respectively.

In July 2017, the Company's stockholders approved the 2017 Omnibus Incentive Plan (the "Incentive Plan"). The Incentive Plan provides for the issuance of a maximum of 9,067,917 shares of stock-denominated awards to directors, employees, officers and agents of the Company. As of August 27, 2022, there were 3.9 million shares available for grant under the Incentive Plan.

Stock Options

Stock options granted under the Incentive Plan are granted at a price equal to or more than the fair value of common stock on the date the option is granted. Stock options under the Incentive Plan generally become exercisable ratably over three years from the date of grant and must be exercised within ten years from the date of grant.

The following table summarizes stock option activity for the fifty-two weeks ended August 27, 2022:

<i>(In thousands, except share and per share data)</i>	Shares underlying options	Weighted average exercise price	Weighted average remaining life (years)	Aggregate intrinsic value
Outstanding as of August 28, 2021	2,993,163	\$ 16.31	6.83	\$ 57,227
Granted	138,479	40.88		
Exercised	(352,791)	12.31		
Forfeited	(2,300)	19.89		
Outstanding as of August 27, 2022	2,776,551	\$ 18.04	6.10	\$ 39,702
Vested and expected to vest as of August 27, 2022	2,776,551	\$ 18.04	6.10	\$ 39,702
Exercisable as of August 27, 2022	2,191,573	\$ 14.54	5.43	\$ 37,191

The following table summarizes information about stock options outstanding at August 27, 2022:

Range of Exercise Prices	Number outstanding	Weighted average exercise price	Weighted average remaining life (years)	Number exercisable	Weighted average exercise price
\$ 12.00 - 17.77	1,655,003	\$ 12.38	4.97	1,655,003	\$ 12.38
\$ 17.78 - 23.55	588,458	20.23	7.21	397,751	20.15
\$ 23.56 - 29.33	194,611	24.33	7.18	138,819	24.25
\$ 29.34 - 35.11	—	—	0.00	—	—
\$ 35.12 - 40.88	338,479	38.33	9.06	—	—
	2,776,551	\$ 18.04	6.10	2,191,573	\$ 14.54

The weighted average fair value of options granted during the fifty-two weeks ended August 27, 2022, August 28, 2021, and August 29, 2020 were \$15.32, \$9.99 and \$7.79, respectively.

The fair value of each option grant is estimated on the date of grant using the Black-Scholes Option Pricing Model based on the following assumptions:

	52-Weeks Ended August 27, 2022	52-Weeks Ended August 28, 2021	52-Weeks Ended August 29, 2020
Expected volatility	37.07%	36.80 % - 38.75%	30.27 % - 33.82%
Expected dividend yield	—%	—%	—%
Expected option term	6	6	6
Risk-free rate of return	1.26%	0.80 % - 0.935%	0.38 % - 1.80%

Because the Company's Incentive Plan has not been in place for a sufficient amount of time as compared to the expected stock option terms nor does the Company have sufficient history with changes in option vesting schedules and changes in the pool of employees receiving option grants, the Company estimates the expected term using its historical experience of the time awards have been outstanding as well as an expected time outstanding, which takes into account the award vesting and contractual term. Additionally, due to a lack of sufficient trading history for the Company's common stock, expected stock price volatility is based on a combination of a sampling of comparable publicly traded companies and the Company's historical common stock price activity. The Company believes the sample of comparable publicly traded companies used as inputs to its expected stock price volatility most closely models the nature of the business and stock price volatility. The risk-free rates are based on the implied yield available on U.S. Treasury zero-coupon issues with an equivalent remaining term. Future annual dividends over the expected term are estimated to be nil.

As of August 27, 2022, the Company had \$4.3 million of total unrecognized compensation cost related to stock option plans that will be recognized over a weighted average period of 1.6 years. During the fifty-two weeks ended August 27, 2022, August 28, 2021, and August 29, 2020, the Company received \$4.3 million, \$0.7 million, and \$4.2 million in cash from stock option exercises, respectively.

Restricted Stock Units

Restricted stock units granted under the Incentive Plan are granted at a price equal to closing market price of the Company's common stock on the date of grant. Restricted stock units under the Incentive Plan generally vest over three years.

The following table summarizes restricted stock unit activity for the fifty-two weeks ended August 27, 2022:

	Units	Weighted average grant-date fair value
Non-vested as of August 28, 2021	496,334	\$ 24.56
Granted	171,795	39.97
Vested	(180,096)	23.14
Forfeited	(35,030)	28.71
Non-vested as of August 27, 2022	453,003	\$ 30.68

As of August 27, 2022, the Company had \$8.4 million of total unrecognized compensation cost related to restricted stock units that will be recognized over a weighted average period of 1.4 years.

Performance Stock Units

During the fifty-two weeks ended August 27, 2022, the Board of Directors granted performance stock units under the Company's equity compensation plan. Performance stock units vest in a range between 0% and 200% based upon certain performance criteria in a three-year period. Performance stock units were valued using a Monte-Carlo simulation.

The following table summarizes performance stock unit activity for the fifty-two weeks ended August 27, 2022:

	Units	Weighted average grant-date fair value
Non-vested as of August 28, 2021	380,097	\$ 19.31
Granted	50,212	63.42
Vested	(166,688)	11.93
Forfeited	(8,598)	19.33
Non-vested as of August 27, 2022	255,023	\$ 32.82

As of August 27, 2022, the Company had \$3.6 million of total unrecognized compensation cost related to performance stock units that will be recognized over a weighted average period of 1.0 years.

Stock Appreciation Rights

Stock appreciation rights ("SARs") permit the holder to participate in the appreciation of the Company's common stock price and are awarded to non-employee, consultants of the Company. The Company's SARs settle in shares of its common stock once the applicable vesting criteria has been met. SARs cliff vest three years from the date of grant and must be exercised within ten years.

The following table summarizes SARs activity for the fifty-two weeks ended August 27, 2022:

	Shares Underlying SARs	Weighted average exercise price	Weighted average remaining contractual life (in years)
Outstanding as of August 28, 2021	150,000	\$ 24.20	
Granted	—	—	
Exercised	—	—	
Forfeited	—	—	
Outstanding as of August 27, 2022	150,000	\$ 24.20	7.18
Vested and expected to vest as of August 27, 2022	150,000	\$ 24.20	7.18
Exercisable as of August 27, 2022	—	\$ —	0.00

As of August 27, 2022, the Company had an immaterial amount of total unrecognized compensation cost related to its SARs that will be recognized over a weighted average period of 0.2 years.

15. Segment and Customer Information

During the fifty-two weeks ended August 27, 2022, the Company substantially completed its efforts to fully integrate its operations and organization structure after the Quest Acquisition. The Company aligned the nature of its production processes and the methods used to distribute products to customers for the Atkins® and Quest® brands. The Company also designed its organizational structure to support entity-wide business functions across brands, products, customers, and geographic regions. Additionally, the Company's chief operating decision maker reviews operating results and forecasts at the consolidated level. As a result, the Company determined its operations are organized into one, consolidated operating segment and reportable segment. Previously, during the fifty-two weeks ended August 28, 2021 and August 29, 2020, the Company had two operating segments, Atkins and Quest, which were aggregated into one reporting segment due to similar financial, economic and operating characteristics.

Reconciliation of the totals of reported segment revenue, profit or loss measurement, assets and other significant items reported by segment to the corresponding GAAP totals is not applicable to the Company as it only has one reportable segment. Additionally, revenues from transactions with external customers for each of Simply Good Foods' products would be impracticable to disclose and management does not view its business by product line. The following is a summary of revenue disaggregated by geographic area and brand:

<i>(In thousands)</i>	52-Weeks Ended August 27, 2022	52-Weeks Ended August 28, 2021	52-Weeks Ended August 29, 2020
North America ⁽¹⁾			
Atkins	\$ 540,328	\$ 506,860	\$ 501,472
Quest	593,943	453,619	286,803
Total North America	1,134,271	960,479	788,275
International	34,407	45,134	28,366
Total	\$ 1,168,678	\$ 1,005,613	\$ 816,641

⁽¹⁾ The North America geographic area consists of net sales substantially related to the United States and there is no individual foreign country to which more than 10% of the Company's net sales are attributed or that is otherwise deemed individually material.

The following is a summary of long lived assets by geographic area:

<i>(In thousands)</i>	August 27, 2022	August 28, 2021
Long lived assets		
North America ⁽¹⁾	\$ 18,157	\$ 16,584
Total	\$ 18,157	\$ 16,584

⁽¹⁾ The North America geographic area consists of long-lived assets substantially related to the United States and there is no individual foreign country in which more than 10% of the Company's long-lived assets are located or that is otherwise deemed individually material.

Significant Customers

Credit risk for the Company was concentrated in three customers who each comprised more than 10% of the Company's total sales for the fifty-two weeks ended August 27, 2022, August 28, 2021, and August 29, 2020.

	52-Weeks Ended August 27, 2022	52-Weeks Ended August 28, 2021	52-Weeks Ended August 29, 2020
Customer 1	31 %	31 %	34 %
Customer 2	13 %	12 %	10 %
Customer 3	10 %	n/a	n/a

n/a - Not applicable as the customer was not significant during these fiscal years.

At August 27, 2022 and August 28, 2021, the following amounts of the Company's accounts receivable, net were related to these significant customers for the periods in which the customers were significant:

<i>(In thousands)</i>	August 27, 2022		August 28, 2021	
Customer 1	\$ 44,638	34 %	\$ 37,483	34 %
Customer 2	\$ 21,829	16 %	\$ 27,962	25 %
Customer 3	\$ 18,521	14 %	n/a	n/a

n/a - Not applicable as the customer was not significant during these fiscal years.

No other customers of the Company accounted for more than 10% of sales during these periods. The Company generally does not require collateral from its customers and has not incurred any significant losses on uncollectible accounts receivable.

16. Restructuring and Related Charges

In May 2020, the Company announced certain restructuring activities in conjunction with the implementation of the Company's future-state organization design, which created a fully integrated organization with its completed Quest Acquisition. The new organization design became effective on August 31, 2020. These restructuring plans primarily included workforce reductions, changes in management structure, and the relocation of business activities from one location to another.

The Company substantially completed its restructuring activities during the fifty-two weeks ended August 27, 2022. Since the announcement of the restructuring activities in May 2020, the Company incurred aggregate restructuring and restructuring-related costs of \$9.9 million.

The one-time termination benefits and employee severance costs incurred in relation to these restructuring activities were accounted for in accordance with ASC Topic 420, Exit or Disposal Cost Obligations, and ASC Topic 712, Compensation - Nonretirement Post-employment Benefits, respectively. The Company recognized a liability and the related expense for these restructuring costs when the liability was incurred and could be measured. Restructuring accruals were based upon management estimates at the time and could change depending upon changes in facts and circumstances subsequent to the date the original liability was recorded. The effect of these restructuring activities was included within *General and administrative* on the Consolidated Statements of Income and Comprehensive Income.

Changes to the restructuring liability during the fifty-two weeks ended August 27, 2022 and August 28, 2021 were as follows:

<i>(In thousands)</i>	Termination benefits and severance	Other	Restructuring liability
Balance as of August 29, 2020	\$ 4,139	\$ —	\$ 4,139
Charges	3,458	342	3,800
Cash payments	(6,746)	(342)	(7,088)
Balance as of August 28, 2021	\$ 851	\$ —	\$ 851
Charges	52	76	128
Cash payments	(903)	(76)	(979)
Balance as of August 27, 2022	<u>\$ —</u>	<u>\$ —</u>	<u>\$ —</u>

The Company's total restructuring and restructuring-related costs incurred in the fifty-two weeks ended August 27, 2022 were \$0.1 million, which included an immaterial gain on lease termination related to its lease in the Netherlands in addition to the restructuring costs shown above. In the fifty-two weeks ended August 28, 2021, the Company incurred a total of \$4.3 million in restructuring and restructuring-related costs, which included a \$0.5 million impairment charge, net of a gain on lease termination, related to its leases in Toronto, Ontario and the Netherlands. The Company's total restructuring and restructuring-related costs incurred in the fifty-two weeks ended August 29, 2020 were \$5.5 million.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

We maintain disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), that are designed to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required financial disclosures.

Management, including the participation of our Chief Executive Officer and our Chief Financial Officer, conducted an evaluation (pursuant to Rule 13a-15(b) under the Exchange Act) of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Report. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of August 27, 2022, the Company’s disclosure controls and procedures were effective.

Management’s Report on Internal Control over Financial Reporting

Management is responsible for designing, implementing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements in accordance with U.S. generally accepted accounting principles. Management assessed the effectiveness of our internal control over financial reporting as of August 27, 2022. Management based its assessment on criteria established in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on the assessment using this criteria, management has concluded that our internal control over financial reporting was effective as of August 27, 2022.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Additionally, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The effectiveness of our internal control over financial reporting as of August 27, 2022 was audited by Deloitte & Touche LLP, our independent registered public accounting firm, as stated in their report appearing below, which expressed an unqualified opinion on the effectiveness of our internal control over financial reporting as of August 27, 2022.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended August 27, 2022 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and the Board of Directors of The Simply Good Foods Company

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of The Simply Good Foods Company and subsidiaries (the "Company") as of August 27, 2022, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of August 27, 2022, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the fifty-two weeks ended August 27, 2022], of the Company and our report dated October 21, 2022, expressed an unqualified opinion on those financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying "Management's Report on Internal Control over Financial Reporting." Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.
